with Solution**Secton 1 Logic**

Q1 The question contains a pair of words followed by four options. The relationship between the first pair of words is similar to the relationship between the third word and one of the options. Choose the correct option that best completes the analogy.

Eye : Myopia :: Teeth : ?

- 1) Pyorrhoea
- 2) Cataract
- 3) Trachoma
- 4) Eczema
- 5) Psoriasis

Q2 The question contains a pair of words followed by four options. The relationship between the first pair of words is similar to the relationship between the third word and one of the options. Choose the correct option that best completes the analogy.

Wimbledon Trophy: Tennis :: Walker's Cup: ?

- 1) Hockey
- 2) Golf
- 3) cricket
- 4) Polo
- 5) Wrestling

Q 3 The question contains a pair of words followed by four options. The relationship between the first pair of words is similar to the relationship between the third word and one of the options. Choose the correct option that best completes the analogy.

Virology: Virus :: Entomology : ?

- 1) Insects
- 2) Bacteria
- 3) Fungi
- 4) Animals
- 5) Fishes

Q4 The question contains a pair of words followed by four options The relationship between the first pair of words is similar to the relationship between the third word and one of the options. Choose the correct option that best completes the analogy

Scale: Length :: Odometer : ?

- 1) Smell
- 2) Temperature
- 3) Speed
- 4) Rain
- 5) Current

Q 5 The question contains a pair of words followed by four options The relationship between the first pair of words is similar to the relationship between the third word and one of the options. Choose the correct option that best completes the analogy

Annihilation : Fire :: Cataclysm : ?

- 1) Steam
- 2) Earthquake
- 3) Emergency
- 4) Disaster
- 5) Radiation

Q 6 Find the odd word from the given alternatives.

- 1) Petrol
- 2) Acetone
- 3) Kerosene
- 4) Mercury
- 5) Propoane

Q 7 Find the odd word from the given alternatives.

- 1) 728
- 2) 512
- 3) 343
- 4) 216
- 5) 125

Q 8 Find the odd word from the given alternatives.

- 1) Prophecy
- 2) Omen
- 3) History
- 4) Forecast
- 5) Prediction

Q 9 Find the odd one out from the given alternatives

- 1) 2, 3, 5, 7,
- 2) 11, 13, 17, 19
- 3) 23, 29, 31, 37
- 4) 40,41, 43, 47
- 5) 53, 59, 61, 67

Q 10 Find the odd one out from the given alternatives

- 1) Time
- 2) Distance
- 3) Speed
- 4) Mass
- 5) Energy

Q 11 If MANGO is written as RFSLT, how is ORANGE written in that code?

- 1) QTPKJD
- 2) PQNJIF
- 3) UXGTMK
- 4) QTPJDF
- 5) **TWFSIJ**

Q 12 If WATER is written as YCVGT, then what is written as HKTG

- 1) FIRE
- 2) LOVE
- 3) BALD
- 4) KITE
- 5) CARD

Q 13 If MUSIC is coded as LVRJB: how is NOTES coded in that code?

- 1) MPSFR
- 2) MQVFT
- 3) OPUFT
- 4) MQVET
- 5) PQVET

Q 14 If A1B3C5D7E9 is coded as B2C4D6E8F0, how is M3N5O7P9 coded in the same way?

- 1) N4O6P8Q0
- 2) N4O6P8Q1
- 3) L4M6N8O0
- 4) N4O6P8R0
- 5) O5P7Q9R0

Q 15 If 1294 is written as 3516, how is 1385 written in the same code?

- 1) 3890
- 2) 2950
- 3) 2049
- 4) 3607

5) 3039

Q 16 A woman introduces a man as the son of the brother of her mother. How is the man related to the woman?

- 1) Brother
- 2) Uncle
- 3) Nephew
- 4) Cousin
- 5) Father

Q 17 If A is the mother of B, B is the son of C, and D is the brother of C, how is D related to A?

- 1) Brother-in-law
- 2) Uncle
- 3) Nephew
- 4) Cousin
- 5) Father

Q 18 Vinod is the brother of Bhaskar. Manohar is the sister of Vinod. Biswal is the brother of Preetam and Preetam is the daughter of Bhaskar. Who is the uncle of Biswal?

- 1) Bhaskar
- 2) Manohar
- 3) Preetam
- 4) Vinod
- 5) Data not sufficient

Q 19 If A# B means A is brother of B, A @ B means A is mother of B, A \$ B means A is father of B, A & B means A is sister of B. In the expression G @ O & S # V \$ J, how is S related to father of J, who is a male?

- 1) Brother
- 2) Uncle
- 3) Son
- 4) Nephew
- 5) Brother - in - law

Q 20 Read the following information carefully to answer the questions given below :

- (i) 'A X B' means A is the brother of B;
- (ii) 'A ÷ B' means B is the father of A;
- (iii) A+B' means A is the sister of B;
- (iv) A-B' means A is the mother of B;

Which of the following means 'Q is the paternal uncle of K?

- 1) $K + B \div N \times Q + D$
- 2) $K \times B \div N \times Q \times D$
- 3) $Q \times L \div R \times K$
- 4) $K \times P \div M \times Q$
- 5) $K + P \div M \times Q$

Q 21 A clock is so placed that at 12 noon its minute hand points towards northeast.

In which direction does its hour hand point at 1:30 p.m.?

- 1) North
- 2) South
- 3) East
- 4) West
- 5) North-East

Q 22 If a man is facing west and turns 45° clockwise, then 180° clockwise, and then 270° counterclockwise. In which direction is he facing now?

- 1) South
- 2) South-West
- 3) North
- 4) North-West
- 5) North-East

Q 23-24 Read the following information and answer the given questions

Fanner Batuk Singh has a larger square field divided into nine smaller square fields, all equal, arranged in three rows of three fields each. One side of the field runs exactly east-west. The middle square must be planted with rice because it is wet. The wheat and barley should be continuous so that they can be harvested all at once by a mechanical harvester. Two of the fields should be planted with soybeans. The northwestern most field should be planted with peanuts and the southern third of the field is suitable only for vegetables.

If Batuk Singh decides to plant the wheat next to the peanuts, in which square will the barley be?

- 1) The square immediately north of the rice.
- 2) The square immediately east of the rice
- 3) The square immediately west of the rice
- 4) The square immediately north east of the rice
- 5) The square immediately north west of the rice

Q 24 Which square can be planted v

- 1) The square immediately north of the rice
- 2) The square immediately west of the rice
- 3) The square immediately south of the rice
- 4) The square immediately south west of the rice
- 5) The square immediately north west of the rice

Q 25 In the question below, two statements are given, followed by two conclusions numbered I and II. You have to take the given two statements to be true even if they seem to be at variance from commonly known facts Read the conclusion and then decide which of the given conclusions logically follows from the two given statements, disregarding commonly known facts.

Statements: No women teacher can play. Some women teachers are athletes.

Conclusions:

- I. Male athletes can play
- II. Some athletes can play

- 1) Only conclusion I follows
- 2) Only conclusion II follows
- 3) Either I or II follows
- 4) Neither I nor II follow
- 5) Both I and II follows

Q 26 Mohan and Ramesh are ranked seventh and eleventh respectively from the top in a class of 41 students. What will be their respective ranks from the bottom in the class?

- 1) 30th and 34th
- 2) 35th and 31st
- 3) 34th and 30th
- 4) 34th and 31st
- 5) 36th and 32nd

Q 27- 29 Six boys, A, B, C, D, E and F. are marching in a line. They are arranged according to their height. The tallest are at the back and shortest in front.

- F is between B and A
- E is shorter than D but taller than C, who is taller than A.
- E and F have two boys between them.
- A is not the shortest among them all.

Where is E ?

- 1) Between A and B
- 2) Between A and C

- 3) Between D and C
4) Between F and C
5) Between F and B

Q 28 Who is the tallest?

- 1) A
2) B
3) C
4) D
5) E

Q 29 If we start counting from the shortest, which boy is forth one in the line?

- 1) A
2) B
3) C
4) D
5) E

Q 30 Who is the shortest?

- 1) A
2) B
3) C
4) D
5) E

Q 31 Complete the series;

4, 7, 12, 19, 28, ?

- 1) 37
2) 29
3) 39
4) 32
5) 35

Q 32 Complete the series;
WXCD, UVEF, STGH, QRIJ, ?

- 1) OPKL
2) OPQR
3) LRMS
4) AYBZ
5) KLYZ

Q 33 How many meaningful words can be formed with the letter of the word LAME?

- 1) 1
2) 2
3) 3
4) 4
5) 5

Q 34 How many meaningful four-letter words can be formed using the second, sixth, eighth and tenth letters of the word 'ARCHITECTURE'?

- 1) 1
2) 2
3) 3
4) 4
5) 5

Q 35 A word has been given in capital letters followed by four other words. Out of these, only one can be formed using the letters of the given word. Find out that word.

IMPATIENCE

- 1) CENTRE
2) REMAIN
3) PENCIL
4) IMPACT
5) PACKET

Q 36 A number arrangement machine, when given a particular input, rearranges it following a particular rule. The following is an illustration of the input and the stages of arrangement.

Input : 245, 316, 436, 519, 868, 710, 689

Step I : 710, 316, 436, 519, 868, 245, 689

Step II : 710, 316, 245, 519, 868, 436, 689

Step III : 710, 316, 245, 436, 868, 519, 689

Step IV : 710, 316, 245, 436, 519, 868, 689

Step IV is the last step of input. How many steps will be required to get the final output from the following input ?

Input : 544, 653, 325, 688, 461, 231, 857

- 1) 4
2) 5
3) 6
4) 3
5) 2

Q 37 A word and number arrangement machine, when given an input line of words and numbers, rearranges them following a particular rule at each step. The following is an illustration of input and rearrangement:

Input : exam 81 56 over down up 16 64

Step I : down exam 81 56 over up 16 64

Step II : down 81 exam 56 over up 16 64
 Step III : down 81 exam 64 56 over up 16
 Step IV : down 81 exam 64 over 56 up 16
 Step IV is the last step of the rearrangement of the above input.

As per the rule followed in the above steps, answer the following questions.

Input: 98 11 64 22 but will an it

Which of the following will be step VI?

- 1) Step VI not possible as Step V is the last step
- 2) an 98 but 64 it 22 11 will
- 3) an 98 but 64 it 22 will 11
- 4) an 11 but 22 it 64 will 98
- 5) an 11 but 22 it 64 98 will

Q 38 32 now 20 gift 53 box 62 at

Which of the following will be Step IV?

- 1) at 62 box 53 32 now 20 gift
- 2) at 62 box 53 gift 32 now 20
- 3) at 62 box 53 gift 20 now 32
- 4) at 62 box 53 gift 32 20 now
- 5) Step IV is not possible as Step III is the last step

Q 39 Input: pay by 18 36 nose ear 72 54

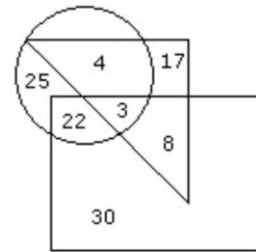

Which of the following steps will be the last step?

- 1) 3
- 2) 4
- 3) 5
- 4) 6
- 5) 7

Q 40 A club has 256 members, of whom 144 can play football, 123 can play tennis, and 132 can play cricket. Moreover, 58 members can play both football and tennis, 25 can play both cricket and tennis, while 63 can play both football and cricket. If every member can play at least one game, then the number of members who can play only tennis is

- 1) 48
- 2) 43
- 3) 45
- 4) 52
- 5) 50

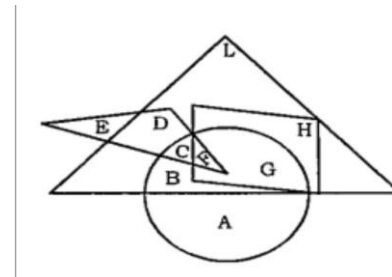

Q 41 Study the following figure and answer the questions given below.

How many artists are players?

- 1) 32
- 2) 15
- 3) 25
- 4) 17
- 5) 12

Q 42-45 In the following figure, the smaller triangle represents the teachers, the big triangle, the politicians, the circle, the graduates and the rectangle, the members of Parliament. Different regions are represented by the letters of the English alphabet.

On the basis of the above diagram, answer the following questions:

Which among the following regions represents the graduates or teachers, but not politicians?

- 1) B G
- 2) G H
- 3) A E
- 4) E F
- 5) A C

Q 43 On the basis of the above diagram, answer the following questions:

Which among the following regions represents the graduate politicians, but not the members of parliament?

- 1) B, C
- 2) L, B
- 3) D, H
- 4) D, L
- 5) L, H

Q 44 Which among the following regions represents the politicians who are neither graduates nor teachers?

- 1) E, F
- 2) D, E
- 3) L, H
- 4) C, D
- 5) C, L

Q 45 Which of the following regions represent the members of parliament who are graduate as well as teachers?

- 1) G
- 2) H
- 3) F
- 4) C
- 5) B

Q 46-50 The following questions are based on the information given below:

A cuboid shaped wooden block is 6 cm in length, 4 cm in breadth and 1 cm in height.

Two faces measuring 4 cm x 1 cm are coloured black.

Two faces measuring 6 cm x 1 cm are coloured red.

Two faces measuring 6 cm x 4 cm are coloured green.

The block is divided into 6 equal cubes of side 1 cm (from 6 cm side), 4 equal cubes of side 1 cm (from 4 cm side).

How many cubes having red, green and black colours on at least one side of the cube will be formed ?

- 1) 16
- 2) 8
- 3) 4
- 4) 12
- 5) 24

Q 47 How many small cubes will be formed ?

- 1) 24
- 2) 12
- 3) 64
- 4) 20
- 5) 6

Q 48 How many cubes will have 4 coloured sides and two non-coloured sides?

- 1) 4
- 2) 8
- 3) 12

- 4) 16
- 5) 20

Q 49 How many cubes will have green colour on two sides and rest of the four sides having no colour ?

- 1) 4
- 2) 8
- 3) 12
- 4) 16
- 5) 10

Q 50 How many cubes will remain if the cubes having black and green colors are removed ?

- 1) 8
- 2) 12
- 3) 16
- 4) 20
- 5) 10

Q 51 Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R)

Assertion (A) : Tides indicate the regular and periodic rise and fall in sea level.

Reason (R) : Tides are caused by the gravitational pull of the Moon and the Sun.

In light of the above statements, choose the *correct* answer from the options given below

- 1) Both (A) and (R) are true and (R) is the correct explanation of (A).
- 2) Both (A) and (R) are true but (R) is NOT the correct explanation of (A).
- 3) (A) is true but (R) is false.
- 4) (A) is false but (R) is true.
- 5) Both (A) and (R) are false

Q 52 Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R)

Assertion (A) : When a body is dipped in a liquid fully or partially, there is a decrease in its weight

Reason (R) : The decrease in weight is due to the higher density of the displaced liquid.

In light of the above statements, choose the *correct* answer from the options given below

- 1) Both (A) and (R) are true and (R) is the correct explanation of (A).
- 2) Both (A) and (R) are true but (R) is NOT the correct explanation of (A).
- 3) (A) is true but (R) is false.
- 4) (A) is false but (R) is true.
- 5) Both (A) and (R) are false

Q 53 Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R).

Assertion (A) : When a man is standing in a lift which is either at rest or moving up or moving down, with uniform speed, he does not find any apparent change in his weight.

Reason (R) : The reaction of the floor of the lift is equal to his weight.

In light of the above statements, choose the *correct* answer from the options given below.

- 1) Both (A) and (R) are true and (R) is the correct explanation of (A).
- 2) Both (A) and (R) are true but (R) is NOT the correct explanation of (A).
- 3) (A) is true but (R) is false.
- 4) (A) is false but (R) is true.
- 5) Both (A) and (R) are false

Q 54 Given below is a statement and two assumptions These assumptions may or may not be implicit in the statement.

Statement: Nobody can predict as to how long our country will take to contain unfortunate and disastrous terrorist activities.

Assumption A: It is impossible to put an end to terrorist activities

Assumption B: Efforts to control the terrorist activities are on

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

- 1) Only Assumption A is implicit
- 2) Only Assumption B is implicit

- 3) Neither Assumption A nor Assumption B is implicit
- 4) Both Assumption A and Assumption B are implicit
- 5) Either Assumption A or Assumption B is implicit

Q 55 Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement: The X-Airlines has temporarily suspended flights to a few destinations for the next four days due to the strike call given by the Pilots' Association.

Assumption A: The airlines may be able to restore all the flights after four days.

Assumption B: The Pilots' Association may withdraw the strike call within four days

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

- 1) Only Assumption A is implicit
- 2) Only Assumption B is implicit
- 3) Neither Assumption A nor Assumption B are implicit
- 4) Both Assumption A and Assumption B are implicit
- 5) Either Assumption A or Assumption B is implicit

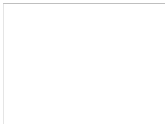

Q 56-60 Read the following information carefully and answer the questions given below:

Sumeet, Philips, Wasim, Bishan and Chetan are five players of the College Cricket Team and their hometowns are Surat, Pune, Warangal, Bangalore and Chandigarh, but not in that order. The five specialist slots of spinner, pace bowler, wicket keeper, batsman and captain are held by them, again not in the order of their names stated above.

- (i) Their names, hometowns and specialities do not start with the same letter.
- (ii) Neither Philips nor Wasim is the captain, and they do not belong to either Surat or Bangalore.
- (iii) Sumeet is neither a wicket keeper nor a batsman.
- (iv) Pune is not Bishan's hometown.
- (v) The player who hails from Bangalore is a wicket keeper.
- (vi) The captain's hometown is Pune, while the batsman does not hail from Warangal.

Who is the spinner?

- 1) Philips

- 
- 2) Chetan
 - 3) Bishan
 - 4) Wasim
 - 5) Sumeet

Q 57 The spinner's hometown is

- 1) Chandigarh
- 2) Bangalore
- 3) Pune
- 4) Surat
- 5) Warangal

Q 58 Chandigarh is the hometown of

- 1) Sumeet
- 2) Bishan
- 3) Wasim
- 4) Philips
- 5) Chetan

Q 59 Who is the pace-bowler?

- 1) Chetan
- 2) Wasim
- 3) Sumeet
- 4) Bishan
- 5) Philips

Q 60 Chetan's hometown is

- 1) Pune
- 2) Surat
- 3) Bangalore
- 4) Warangal
- 5) Chandigarh

Q 61 - 63 A person is asked to put in a basket one apple when ordered 'One', one guava when ordered 'Two', one orange when ordered 'Three' and is asked to take out from the basket one apple and one guava both when ordered 'Four' The order sequence executed by the person is as follows

1 2 3 3 2 1 4 2 3 1 4 2 2 3 3 1 4 1 1 3 2 3 4

How many fruits will be there in the basket at the end of the above order sequence?

- 1) 10
- 2) 11
- 3) 12
- 4) 13
- 5) 14

Q 62 How many guavas will be there in the basket at the end of the above order sequence?

- 1) 1
- 2) 2
- 3) 3
- 4) 4
- 5) 5

Q 63 How many apples will be there in the basket at the end of the above order sequence?

- 1) 1
- 2) 2
- 3) 3
- 4) 4
- 5) 5

Q 64-67 Consider a group comprising 4 students- Reena, Beena, Meena and Neena, who stand in a row. Reena and Beena stand in sixth and seventh position respectively from the left Meena and Neena stand in the fourth and fifth positions, respectively from the right. When Beena and Meena exchange their positions, then Beena will be fifteenth from the left.

Reena's position from the right is

- 1) 11
- 2) 6
- 3) 13
- 4) 14
- 5) 18

Q 65 Originally, Neena's position from the left is

- 1) 10
- 2) 14
- 3) 8
- 4) 13
- 5) 16

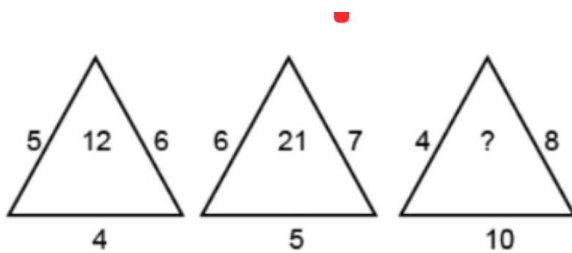

Q 66 If Neena and Reena also exchange their positions between themselves, then after exchange Neena's position from the left will be?

- 1) 6
- 2) 8
- 3) 10
- 4) 12
- 5) 14

Q 67 After the exchange of positions between Beena and Meena, what is Meena's position from right?

- 1) 5
- 2) 8
- 3) 10
- 4) 12
- 5) 14

Q 68 Find the missing character from among the given options.

- 1) 30
- 2) 32
- 3) 34
- 4) 22
- 5) 24

Q 69 Find the missing character from among the given alternatives.

F	I	O
A	J	K
E	M	?

- 1) Q
- 2) R
- 3) S
- 4) B
- 5) T

Q70 Find the missing character from among the given alternatives.

3C	2B	4A
27A	?	64B
9B	4A	16C

- 1) 12B
- 2) 8C

- 3) 18C
- 4) 16C
- 5) 16B

Q 71-73 Study the following information carefully and answer the questions given below:

Following are the conditions for granting an advance of Rs. 10 lakhs to the farmers for purchasing tractor, by a Gramin Bank.

The farmer must-

- (i) have at least five acres of cultivable land
- (ii) be able to produce collateral of at least Rs 8 lakhs.
- (iii) not be more than 50 years old as on 1.12.2024
- (iv) not have any outstanding unpaid loan from the bank.
- (v) be able to produce a recommendation letter from the Panchayat Pradhan.

In the case of a farmer who satisfies all other criteria except-

- (A) at (i) above, but is able to cultivate more than one crop in each piece of land, the case is to be referred to Chairman of the bank.
- (B) at (iv) above, but has Fixed Deposits of at least Rs. 4 lakhs with the bank, the case is to be referred to the General Manager of the bank.

In each question below, detailed information of one farmer is given.

You have to carefully study the information provided in each case and take one of the following courses of actions based on the information and conditions given above. You are not to assume anything other than the information provided in each question. All these cases are given to you as on 1.12.2024. You have to indicate your decision by marking answers to each question as follows:

- A if the advance is not to be granted
- B. if the case is to be referred to the General Manager of the bank
- C: if the case is to be referred to the Chairman of the bank
- D: if the advance is to be granted
- E: if the data is insufficient to decide

Vilas Deshmukh was born on 3rd February, 1975. He has six acres of cultivable land. He has submitted a recommendation letter issued by Panchayat Pradhan. He can pledge collateral of more than Rs 8

lakhs. He doesn't have any unpaid loan from the bank

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 72 Mahipal Rana was born 8th March, 1975. He can produce a recommendation letter from the Panchayat Pradhan. He does not have any outstanding loan. He has fixed deposit of Rs. 5 lakhs in addition to his collateral of Rs. 8 lakhs. He has four acres of cultivable land with only one crop.

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 73 Rishi Thakur was born on 5th June, 1976. He has obtained a recommendation letter from the Panchayat Pradhan. He has eight acres of cultivable land and pledge collateral of Rs. 8 lakhs in addition to his fixed deposit of Rs. 6 lakhs. He has an outstanding loan of Rs. 4 lakhs.

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 74 A statement/ group of statements is given followed by some conclusions. Without resolving anything yourself, choose the conclusion which logically follows from the given statement.

Statement: Many business offices are located in buildings having two to eight floors. If a building has more than three floors, it has a lift.

Conclusions:

- (a) All floors may be reached by lifts
- (b) Only floors above the third floor have lifts
- (c) Seventh floors have lifts.
- (d) Second floors do not have lifts

- 1) (a)
- 2) (b)
- 3) (c)

- 4) (a) & (d)
- 5) (c) & (d)

Q 75 For given question, a statement is followed by two conclusions. Point out the correct conclusion:

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If both the conclusions are true
- (d) If neither of the conclusions is true
- (e) If either conclusion I or conclusion II is true

Statement: Douglas is my cousin. A cousin may be a sister's son, uncle's son or brother's son.

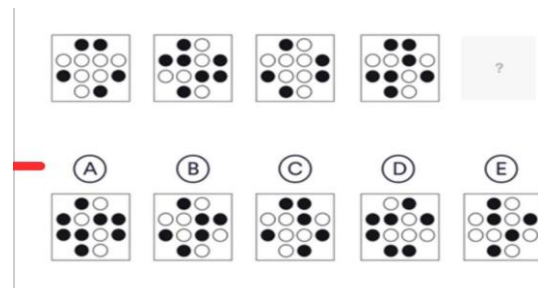

Conclusions:

- I. Douglas is my sister's son.
- II. Douglas is my uncle's son.

- 1) (a)
- 2) (b)
- 3) (c)
- 4) (d)
- 5) (e)

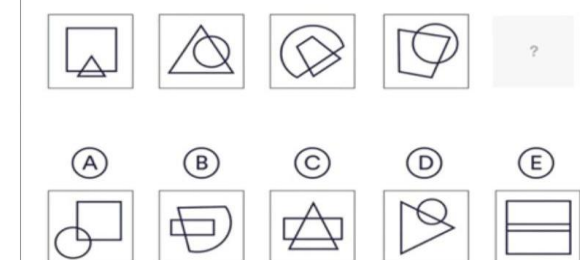

Section 2 Abstract reasoning

Q 76 Which shape comes next in the sequence?

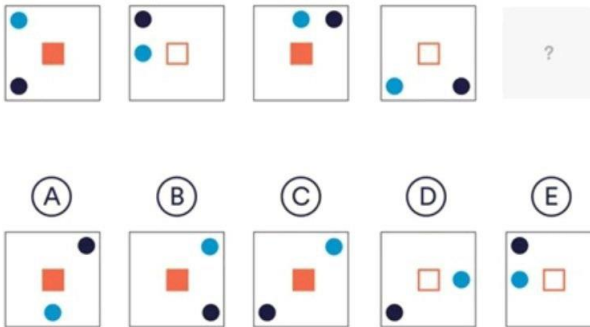

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 77 Complete the sequence

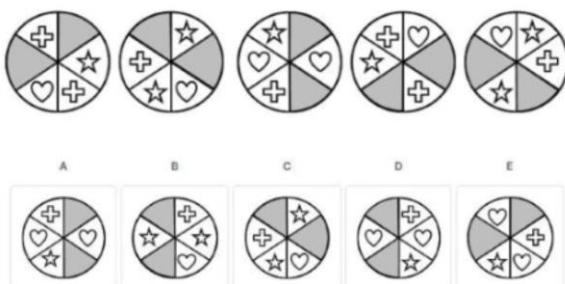

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 78 Complete the sequence

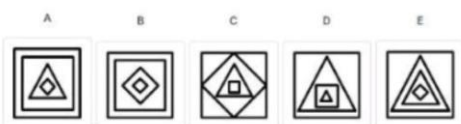

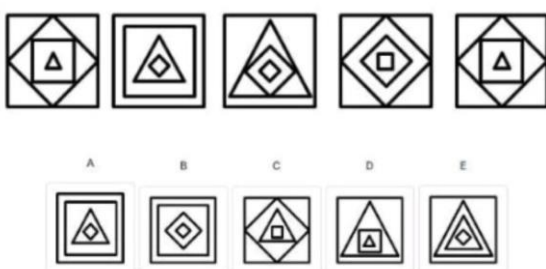

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 79 Complete the sequence

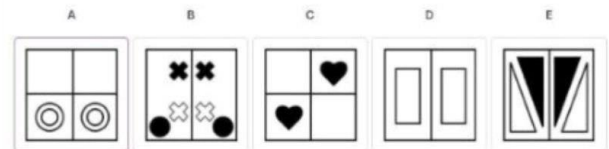

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 80 Choose the image that completes the pattern (From left to right):

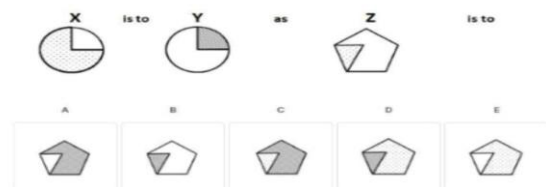

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 81 Choose the odd one out:

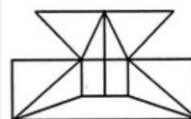

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 82 Which option completes the sequence best?

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 83 Find the minimum number of straight lines required to make the given figure.

- 1) 16
- 2) 17
- 3) 18
- 4) 19
- 5) 20

Q 84 Which figure is the odd one out?

A

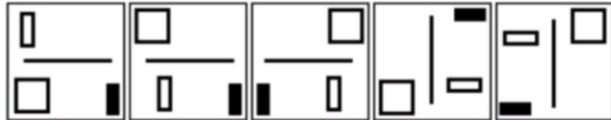

B

C

D

E

Q 85 Which figure is the odd one out?

A

B

C

D

Q 93 Find the number of triangles in the given figure.

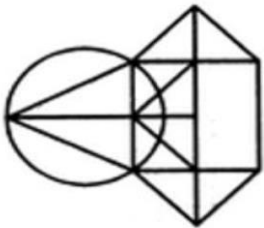

- 1) 10
- 2) 12
- 3) 14
- 4) 16
- 5) 18

Q 94 Find the minimum number of straight lines required to make the given figure.

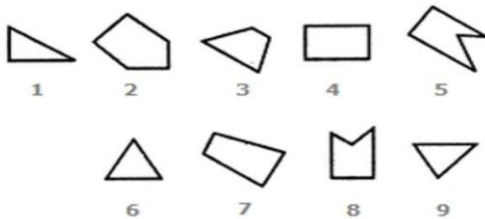

- 1) 9
- 2) 11
- 3) 14
- 4) 12
- 5) 8

Q 95 Find the number of triangles in the given figure

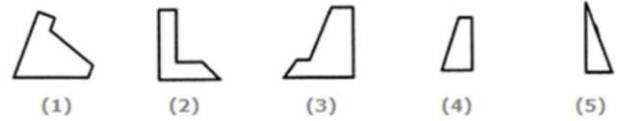

- 1) 10
- 2) 11
- 3) 12
- 4) 14
- 5) 16

Q 96 Group the given figures into three classes using each figure only once.

- 1) 7,8,9 ; 2,4,3 ; 1,5,6
- 2) 1,3,2 ; 4,5,7; 6,8,9
- 3) 1,6,8 ; 3,4,7; 2,5,9
- 4) 1,6,9; 3,4,7; 2,5,8
- 5) 1,6,9; 3,4,8; 2,5,7

Q 97 Select the alternative which represents the figure which, when fitted into each other, would form a complete square.

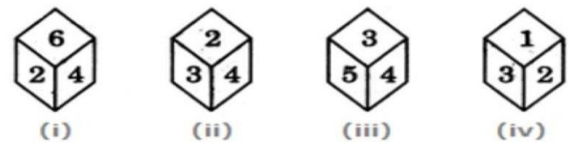

- 1) 123
- 2) 124
- 3) 135
- 4) 145
- 5) 142

Q 98 Select the alternative which represents three out of the five alternative figures which when fitted into each other would form a complete square.

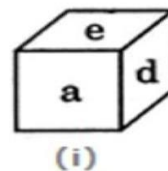

- 1) 135
- 2) 123
- 3) 145
- 4) 235
- 5) 435

Q 99 A dice is thrown four times and its four different positions are shown below. Find the number on the face opposite the face showing 2

- 1) 1
- 2) 3
- 3) 4
- 4) 5
- 5) 6

Q 100 In a dice a, b, c and d are written on the adjacent faces, in a clockwise order and e and f at the top and bottom. When c is at the top, what will be at the bottom?

- 1) a
- 2) b
- 3) d
- 4) e
- 5) f

Section 3 Quants

Q 101 Which of the following is a prime number?

- 1) 517
- 2) 559
- 3) 571
- 4) 533
- 5) 539

Q 102 Find the sum of first 90 even natural numbers.

- 1) 8180
- 2) 8190
- 3) 9180
- 4) 8100
- 5) 8150

Q 103 How many distinct prime factors are there in 9900?

- 1) 7
- 2) 4
- 3) 11
- 4) 5
- 5) 15

Q 104 Find the HCF of 405, 585, 765 and 900.

- 1) 35
- 2) 45
- 3) 55
- 4) 65
- 5) 25

Q 105 Two numbers are in the ratio 4:5. Their LCM is 240. Find the sum of numbers.

- 1) 108
- 2) 180
- 3) 120
- 4) 105
- 5) 125

Q 106 Raju got married 8 years ago. His present age is $\frac{6}{5}$ times his age at the time of his marriage. Raju's

sister was 10 years younger than him of his marriage. The present age of Raju's sister is?

- 1) 30 years
- 2) 35 years
- 3) 38 years
- 4) 36 years
- 5) 40 years

Q 107 An employer engaged a servant with free boarding and lodging for one year with the condition that the servant will be given Rs.15000 and a cycle at the end of the year. The servant agreed but served the employer only for 9 months and thus received Rs. 11000 and a cycle. The price of the cycle is:

- 1) Rs.1100
- 2) Rs.1000
- 3) Rs.1200
- 4) Rs.1500
- 5) Rs.1300

Q 108 If the length of a certain rectangle is decreased by 4 cm and the width is increased by 3 cm, a square with the same area as the original rectangle would result. Find the perimeter of the original rectangle.

- 1) 45 cm
- 2) 50 cm
- 3) 55 cm
- 4) 53 cm
- 5) 48 cm

Q 109 Which of the following is a factor of $x^3 - 19x + 30$?

- 1) $x + 2$
- 2) $x + 1$
- 3) $x - 2$
- 4) $x - 1$
- 5) $x - 7$

Q 110 If $x+1$ is a factor of $2x^3 + ax^2 + 2bx + 1$: then find the values of a and b given that $2a - 3b = 4$

- 1) 5, 3
- 2) 5, 2
- 3) 3, 4
- 4) 2, 7
- 5) 3, 6

Q 111 In measuring the side of a square, an error of 5% in excess is made. The error % in the calculated area is,

- 1) 10.75%
- 2) 10.25%
- 3) 10.50%
- 4) 10.00%
- 5) 11.25%

Q 112 In a factory producing parts of an automobile, the parts manufactured on the shop floor are required to go through three quality checks, each conducted after a specific part of the processing on the raw material is completed. Only parts that are not rejected at one stage are put through the subsequent stages of production and testing. If average rejection rates at these three testing machines during a month are 10%, 5% and 2% respectively, then what is the effective rejection rate for the whole plant?

- 1) 17%
- 2) 15.25%
- 3) 16.21%
- 4) 16.76%
- 5) 17.2%

Q 113 A shopkeeper bought 150 calculators at the rate of Rs 250 per calculator. He spent Rs 2500 on transportation and packing. If the marked price of a calculator is Rs. 320 per calculator and the shopkeeper gives a discount of 5% on the marked price, then what will be the percentage profit gained by the shopkeeper?

- 1) 12%
- 2) 13%
- 3) 14%
- 4) 15%
- 5) 16%

Q 114 An uneducated retailer marks all his goods at 50% above the cost price and thinking that he will still make 25% profit, offers a discount of 25% on the marked price. What is his actual profit on the sales?

- 1) 12%
- 2) 12.5%
- 3) 15%
- 4) 10%
- 5) 11%

Q 115 On selling a pen at 5% loss and a book at 5% gain Karim gains Rs. 7. If he sells the pen at 5% gain and the book at 10% gain then he gains Rs. 13. The actual price of the book (in Rs.) is :

- 1) 100
- 2) 60
- 3) 80
- 4) 75
- 5) 95

Q 116 Aman divides his property so that his son's share to his wife's and the wife's share to his daughter are both in the ratio 3:1. If the daughter gets 10,000 less than the son, find the total worth of the property.

- 1) 20,000
- 2) 16,000
- 3) 15,750
- 4) 16,250
- 5) 20,500

Q 117 A hostel has provisions for 250 students for 35 days. After 5 days, a fresh batch of 25 students was admitted to the hostel. Again after 10 days, a batch of 25 students left the hostel. How long will the remaining provisions survive?

- 1) 17 days
- 2) 19 days
- 3) 21 days
- 4) 15 days
- 5) 25 days

Q 118 In a camp, there is a meal for 120 men or 200 children. If 150 children have taken the meal, how many men will be catered to with the remaining meal?

- 1) 20
- 2) 30
- 3) 40
- 4) 50
- 5) 60

Q 119 A man and a boy working together can complete a work in 24 days. If for the last 6 days, the man alone does the work, then it is completed in 26 days. How long will the boy take to complete the work alone?

- 1) 72 days

- 2) 64 days
- 3) 84 days
- 4) 24 days
- 5) 32 days

Q 120 Two friends P and Q started a business investing in the ratio of 5 :6. R joined them after six months investing an amount equal to that of Q's. At the end of the year, 20% profit was earned which was equal to Rs. 98,000. What was the amount invested by R ?

- 1) Rs 1,05,000
- 2) Rs 1,55,000
- 3) Rs. 2,05,000
- 4) Rs. 2,10,000
- 5) Rs 1,95,000

Q 121 A and B rent a pasture for 10 months by contributing equal rent; A puts in 80 cows for 7 months and leaves. How many cows can B put in for the remaining 3 months, if he pays half as much rent again as A?

- 1) 250
- 2) 280
- 3) 275
- 4) 200
- 5) 120

Q 122 An empty fuel tank of a car was filled with A type petrol. When the tank was half-empty, it was filled with B type petrol. Again when the tank was half empty, it was filled with A type petrol. When the tank was half-empty again, it was filled with B type petrol. What is the percentage of A type petrol present in the tank?

- 1) 35%
- 2) 37%
- 3) 40%
- 4) 37.5%
- 5) 32.5%

Q 123 Alcohol costs Rs.3.50 per litre and kerosene oil costs Rs. 2.50 per litre. In what proportion should these be mixed so that the resulting mixture may be Rs. 2.75 per litre?

- 1) 1:2
- 2) 1:4
- 3) 1:5
- 4) 1:3

- 5) 1:1

Q 124 Three containers have their volumes in the ratio 3:4:5 They are full of mixtures of milk and water. The mixtures contain milk and water in the ratio of (4:1),(3:1) and (5:2) respectively The contents of all these three containers are poured into a fourth container. The ratio of milk and water in the fourth container is

- 1) 89:71
- 2) 191:72
- 3) 157:71
- 4) 157:53
- 5) 151:48

Q 125 Aman pays 40 times the annual rent to purchase a building. The rate % per annum he derives from his investment is

- 1) 25%
- 2) 2.5%
- 3) 50%
- 4) 5%
- 5) 7.5%

Q 126 Mr. Dua invested money in two schemes, A and B offering compound interest @ 8 p.c.p.a. and 12 p.c.p.a. respectively. If the total amount of interest accrued through two schemes together in two years was Rs 4538.00 and the total amount invested was Rs 20,000, what was the amount invested in Scheme A?

- 1) Rs 6000
- 2) Rs. 6250
- 3) Rs. 6500
- 4) Rs. 16000
- 5) Rs. 16500

Q 127 A sum of money is borrowed and paid back in two annual installments of Rs 882 each, allowing 5% compound interest. The sum borrowed was

- 1) Rs. 1600
- 2) Rs. 1620
- 3) Rs. 1640
- 4) Rs. 1680
- 5) Rs. 1650

Q 128 A can do a piece of work in 10 days, B in 15 days. They work together for 5 days, the rest of the work is finished by C in two more days. If they get Rs

3000 as wages for the whole work, what are the daily wages A, B and C respectively (in rs ?) :

- 1) 300,200,250
- 2) 200,300,250
- 3) 300,200,400
- 4) 300,250,500
- 5) 300,400,250

Q 129 A is thrice as efficient as B. Working together, they complete the work in 3 days. If working alone, B takes 8 days more than A to finish the whole work. What is the number of days taken by A to finish the whole work alone?

- 1) 6
- 2) 4
- 3) 8
- 4) 12
- 5) 10

Q130 A, B and C are three taps connected to a tank. A and B together can fill the tank in 6 h, B and C together can fill it in 10 h and A and C together can fill it in $7\frac{1}{2}$ h. In how much time would all three take to fill the tank?

- 1) 6 h
- 2) 5 h
- 3) 10 h
- 4) 12 h
- 5) 8 h

Q 131 A pump can be operated both for filling a tank and for emptying it. The capacity of the tank is 2400 m^3 . The emptying capacity of the pump is 10 m^3 per minute higher than its filling capacity. Consequently, the pump needs 8 minutes less to empty the tank than to fill it. Find the filling capacity of the pump.

- 1) $50 \text{ m}^3/\text{min}$
- 2) $56 \text{ m}^3/\text{min}$
- 3) $55 \text{ m}^3/\text{min}$
- 4) $52 \text{ m}^3/\text{min}$
- 5) $54 \text{ m}^3/\text{min}$

Q 132 A road from A to B is 11.5 km long: first goes uphill, then crosses a plain, and then goes downhill. A person walking from A to B covered this road in 2 h 54 min, and the return journey took him 3 h 6 min. His speed uphill is 3 km/h, on the plain 4 km/h and downhill is 5 km/h. What is the length of the plain part of the journey?

- 1) 4.5 km
- 2) 5 km
- 3) 5.5 km
- 4) 6 km
- 5) 4 km

Q 133 In a 100 m race, A beats B by 10m and C by 13m. In a race of 180 m, B will beat C by

- 1) 5.4 m
- 2) 5 m
- 3) 6 m
- 4) 4 m
- 5) 4.4 m

Q 134 Two trains 130 m and 110m long are going in the same direction. The faster train takes one minute to pass the other completely. If they are moving in opposite directions, they pass each other completely in 3 seconds. Find the speed of each train?

- 1) 42 m/s, 38 m/s
- 2) 36 m/s, 42 m/s
- 3) 38 m/s, 36 m/s
- 4) 40 m/s, 36 m/s
- 5) 42 m/s, 36 m/s

Q 135 Aman rows to a place 48 km distant and come back in 14 hours. He finds that he can row 4 km with the stream in the same time as 3 km against the stream. The rate of the stream is:

- 1) 1 km/hr
- 2) 1.5 km/hr
- 3) 2 km/hr
- 4) 3 km/hr
- 5) 1.75 km/hr

Q 136 A ship 156 km from the shore springs a leak which admits $2\frac{1}{3}$ metric tons of water in $6\frac{1}{2}$ minutes. A quantity of 68 metric tons would suffice to sink it, but the pumps can throw out 15 metric tons in an hour. The average rate of sailing so that it just reaches the shore as it begins to sink should be

- 1) 16 km/hr
- 2) 18 km/hr
- 3) 15 km/hr
- 4) 14 km/hr
- 5) 17 km/hr

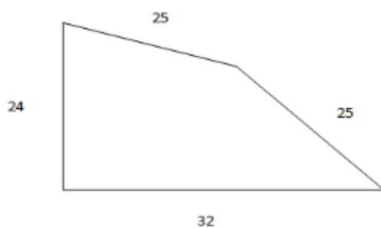

Q 137 Instead of walking along two adjacent sides of a rectangular fields a boy took a short cut along the diagonal and saved the distance equal to half of the longer side. Then the ratio of the shorter side to the longer side is

- 1) $\frac{2}{3}$
- 2) $\frac{3}{4}$
- 3) $\frac{1}{5}$
- 4) $\frac{1}{4}$
- 5) $\frac{2}{5}$

Q 138 The interior angle of a regular polygon exceeds the exterior angle by 132° . Then the number of sides in the polygon is

- 1) 15
- 2) 18
- 3) 20
- 4) 12
- 5) 25

Q 139 Two sides of a plot measure 32m and 24m and the angle between them a perfect right angle. The other two sides measure 25m each and the other three angles are not right angles. What is the area of the plot? (in m^2)

- 1) 534
- 2) 634
- 3) 684
- 4) 456
- 5) 658

Q140 The length of a room is double its breadth. The cost of coloring the ceiling at Rs 25 per sq. meter is Rs 5000 and the cost of painting the four walls at Rs. 240 per sq metre is Rs. 64800. Find the height of the room:

- 1) 4 m
- 2) 4.5 m
- 3) 5 m
- 4) 3.5 m
- 5) 3 m

Q 141 The trunk of a tree is a right cylinder 1.5m in radius and 10m high. What is the volume of the timber which remains when the trunk is trimmed just enough to reduce it to a rectangular parallelogram on a square base?

- 1) $40 m^3$
- 2) $45 m^3$
- 3) $35 m^3$
- 4) $25 m^3$
- 5) $50 m^3$

Q 142 A garden is 24 m long and 14 m wide. There is a path 1 m wide outside the garden along its sides If the path is to be constructed with square marble tiles 20 cm*20 cm, find the number of tiles required to cover the path?

- 1) 1500
- 2) 2000
- 3) 1800
- 4) 2200
- 5) 2400

Q 143 Find the day of the week on 26 January 1950

- 1) Monday
- 2) Tuesday
- 3) Wednesday
- 4) Thursday
- 5) Friday

Q 144 An accurate clock shows 8 o'clock in the morning. Through how may degrees will the hour hand rotate when the clock shows 2 o'clock in the afternoon?

- 1) 144 degrees
- 2) 160 degrees
- 3) 180 degrees
- 4) 90 degrees
- 5) 125 degrees

Q 145 On January 12, 1980, it was a Saturday. The day of the week on January 12, 1979 was

- 1) Monday
- 2) Tuesday
- 3) Wednesday
- 4) Thursday
- 5) Friday

Q 146 Three Englishmen and three Frenchmen work for the same company. Each of them knows a secret not known to others. They need to exchange these secrets over person-to-person phone calls so that eventually each person knows all six secrets. None of the Frenchmen knows English, and only one Englishman knows French. What is the minimum number of phone calls needed for the above purpose?

- 1) 10
- 2) 9
- 3) 8
- 4) 7
- 5) 6

Q 147 In a chess competition involving some boys and girls of a school: every student had to play exactly one game with every other student. It was found that in 45 games both the players were girls, and in 190 games both were boys. The number of games in which one player was a boy and the other was a girl is

- 1) 215
- 2) 230
- 3) 200
- 4) 180
- 5) 250

Q 148 It has been found that if A and B play a game 12 times, A wins 6 times, B wins 4 times and they draw twice. A and B take part in a series of 3 games. The probability that they will win alternately is:

- 1) $\frac{5}{72}$
- 2) $\frac{5}{36}$
- 3) $\frac{7}{72}$
- 4) $\frac{7}{36}$
- 5) $\frac{1}{36}$

Q 149 Aman riding a bicycle completes one lap of a circular field along its circumference at the speed of 14.4 km/hr in 1 minute 28 seconds. What is the area of the field?

- 1) 7958 sq mt
- 2) 9856 sq mt
- 3) 8842 sq mt
- 4) 8958 sq mt
- 5) 7856 sq mt

Q 150 A farmer travelled a distance _____ hours. He travelled partly on foot at the rate 4 kmph and partly on bicycle at the rate 9 kmph. The distance travelled on foot is

- 1) 16 km
- 2) 14 km
- 3) 15 km
- 4) 13 km
- 5) 18 km

Section 4 Verbal

Q 151-153 Read the passage carefully and answer the questions that follow:

Today, every major anthology of nineteenth century poetry includes examples of the work which Christina Rossetti produced during her long literary career. Born in 1830, she began composing verse at the age of eleven and continued to write for the remaining fifty-three years of her life. Her brother, Dante Gabriel Rossetti, himself a poet and painter, soon recognized her genius and urged her to publish her poems. By the time of her death in 1894, Rossetti had written more than eleven hundred poems and had published over nine hundred of them. Although this work has earned her recognition as the greatest woman poet of the Victorian Age, there is still no authoritative edition of her poetry.

The word "anthology" (line 1) means:

- 1) writer
- 2) poem
- 3) collection
- 4) poet
- 5) history

Q 152 Christina Rossetti began writing poetry:

- 1) only after her brother urged her to do so.
- 2) when she was fifty three years old.
- 3) when she was very young.
- 4) when her genius was recognized.
- 5) when she started reading the works of other poets.

Q 153 By 1894, Rossetti had

- 1) published only a few of the many poems she had written.
- 2) published all the poems she had written.
- 3) published more than eleven hundred poems.
- 4) published over nine hundred poems.
- 5) not published any of her poems.

Q 154-156 Read the following passage carefully and answer the questions that follow:

If life exists on Mars, it is most likely to be in the form of bacteria buried deep in the planet's permafrost or lichens growing within rocks, say scientists from NASA. There might even be fossilized Martian algae locked up in ancient lake beds, waiting to be found. Christopher McKay of NASA's Ames Research Centre in California told the AAAS that exobiologists, who look for life on other planets, should look for clues among the life forms of the Earth's ultra-cold regions, where conditions are similar to those on Mars.

Lichens, for example, are found within some Antarctic rocks, just beneath the surface where sunlight can still reach them. The rock protects the lichen from cold and absorbs water providing enough for the lichen's needs, said McKay.

Bacteria have also been found in 3-million-year-old permafrost dug up from Siberia. If there are any bacteria alive on Mars today, they would have had to have survived from the time before the planet cooled more than 3 billion years ago. Nevertheless, McKay is optimistic: "It may be possible that bacteria frozen into the permafrost at the Martian South Pole may be viable".

McKay said algae is found in Antarctic lakes with permanently frozen surfaces. Although no lakes are thought to exist on Mars today, they might have existed long ago. If so, the dried-out Martian lake beds may contain the fossilised remains of algae. On Earth, masses of microscopic algae form large, layered structures known as Stromatolites, which survive as fissile on lake beds, and the putative Martian algae might have done the same thing, said the Jack farmer, one of McKay's colleagues.

The researchers are compiling a list of promising Martian lake beds to be photographed from spacecraft, said Farmer. Those photographed could help to select sites for landers that would search for signs of life, past or present. "If we find algae on Mars, I would say the universe is lousy with algae," McKay said "Intelligence would be another question".

The passage is primarily concerned with:

- 1) the possibility of life on Mars
- 2) selecting sites for Landers on Mars
- 3) research on Mars
- 4) findings of Christopher McKay on Mars
- 5) Algae found on Mars

Q 155 The most primitive forms of life likely to exist on Mars are all the following except

- 1) Villus and space
- 2) Bacteria
- 3) Lichen
- 4) Algae
- 5) Microbes

Q 156 Which of the following statements is not true?

- 1) If any bacteria are alive today on Mars, they must have survived from the time before the planet cooled
- 2) Space photographs of Martian craters should reveal to the explorers signs of life there
- 3) Bacteria frozen into permafrost at the Martian South Pole may be viable
- 4) On digging up: more than 3 million years old Siberian permafrost has revealed bacteria
- 5) Algae could have existed on Mars

Q 157-160 Read the following passage carefully and answer the questions that follow

Know Your Product. Believe in Your Product and sell with Enthusiasm.

These are the fundamental selling truths. If you don't know your product, people will resent your efforts to sell it, if you don't believe in it, no amount of personality and technique will cover that fact; if you can't sell with enthusiasm the lack of it will be infectious.

Nothing turns off a potential customer quicker than a salesman's lack of familiarity with his products. Have you ever walked into a department store, asked a clerk how a particular gadget or appliance worked, then stood by while he fiddled with the knobs and wondered out loud why they don't make things simple anymore? Even if he finally gets it to work, by that time your interest has diminished and you are not likely to make the purchase.

Knowing your product also means understanding the idea behind its projection, how it is perceived - the

relationship between it and what someone wants to buy. How will it help the customer? What problem is it solving? What is its promise?

An understanding of these intangible features is at least as important as knowing a product's mechanical features. Yet precisely because they are intangible, and may even vary from customer to customer, they are more prone to being misinterpreted and misunderstood

Knowing your product also means understanding the image it is projecting. I believe all products project an image of some sort. It may be a positive one, which you want to promote, or a negative one, which you need to overcome.

The home computer industry, for instance, really didn't take off until it solved its image problem. Here was the device that saved time and simplified all sorts of tasks, yet it looked complicated and difficult to use. Until it was made to seem "friendlier", less forbidding, sales lagged.

What, according to the author, would selling without enthusiasm result in?

- 1) No sale at all
- 2) Absence of enthusiasm in the buyers as well
- 3) Lack of confidence of the salesman in the product
- 4) Lack of knowledge on part of salesman
- 5) Complaints from buyers

Q 158 What does the author say about the image your product should project?

- 1) It is always in harmony with the customers' needs
- 2) Its knowledge is necessary for the product to sell
- 3) The better the image is, the higher your product will sell
- 4) It serves to lift up the staggings sales
- 5) It should meet the customer expectations

Q 159 How does the author relate the intangible features of a product to its mechanical ones?

- 1) The intangible features are more powerful than the mechanical ones
- 2) The mechanical features cause the sale of product
- 3) Not understanding mechanical features can stagnate the sales
- 4) The product can be thoroughly known only by knowledge of both.
- 5) The mechanical features should outsmart the intangible ones.

Q 160 What according to the author caused the initial de-back in the computer industry?

- 1) The misplacement of brand in the market.
- 2) The lack of faith in the product capacity.
- 3) Computers were highly complicated.
- 4) Cost was very high
- 5) Quality was not up to the mark.

Q 161-165 **Read the following passage carefully and answer the questions that follow**

If translated into English, most of the ways economists talk among themselves would sound plausible enough to poets, journalists, business people, and other thoughtful though non-economical folk. Like serious talk anywhere— among boat designers and baseball fans, say — the talk is hard to follow when one has not made a habit of listening to it for a while. The culture of conversation makes the words arcane. But the people in the unfamiliar conversation are not Martians. Underneath it all (the economist's favourite phrase), conversational habits are similar. Economics uses mathematical models and statistical tests and market arguments, all of which look alien to the literary eye. But looked at closely, they are not so alien. They may be seen as figures of speech— metaphors, analogies, and appeals to authority.

Figures of speech are not mere frills. They think for us. Someone who thinks of a market as an invisible hand and the organization of work as a production function' and its coefficients as being significant, as an economist does, gives the language a lot of responsibility. It seems a good idea to look hard at his language.

If economic conversation were found to depend a lot on its verbal forms, this would not mean that economics would be not a science, or just a matter of opinion, or some sort of confidence game. Good poets, though not scientists, are serious thinkers about symbols; good historians, though not scientists, are serious thinkers about data. Good scientists also use language. What is more (though it remains to be shown) they use the cunning of language, without particularly meaning to. The language used is a social object, and using language in a social act. It requires cunning (or, if you prefer consideration) attention to the other and present when one speaks.

The paying of attention to one's audience is called 'rhetoric', a word that I later exercise hard. One uses rhetoric, of course, to warn of a fire in a theatre or to arouse the xenophobia of the electorate. This sort of yelling is the vulgar meaning of the word, like the president's heated rhetoric' in a press conference or the 'mere rhetoric to which our enemies stoop. Since the Greek flame was lit, though, the word has been used also in a broader and more amiable sense, to mean the study of all the ways of accomplishing things with language: inciting a mob to lynch the accused, to be sure, but also persuading readers of a novel that its characters breathe, or bringing scholars to accept the better argument and reject the worse. The question is whether the scholar- who usually fancies himself an announcer of 'results' or a starter of 'conclusions free of rhetoric speaks rhetorically. Does he try to persuade? It would seem so. Language, I just said, is not a solitary accomplishment. The scholar doesn't speak into the void, or to himself. He speaks to a community of voices. He desires to be heeded, praised, published, imitated, honoured, en-Nobeled. These are the desires. The devices of language are the means. Rhetoric is the proportioning of means to desires in speech.

Rhetoric is an economics of language, the study of how scarce means are allocated to the insatiable desires of people to be heard. It seems on the face of it a reasonable hypothesis that economists are like other people in being talkers, who desire listeners when they go to the library or the laboratory as much as when they go to the office or the polls. The purpose here is to see if this is true, and to see if it is useful: to study the rhetoric of economic scholarship. The subject is scholarship. It is not the economy, or the adequacy of economic theory as a description of the economy, or even mainly the economist's role in the economy.

The subject is the conversation economists have among themselves, for purposes of persuading each other that the interest elasticity of demand for investment is zero or that the money supply is controlled by the Federal Reserve.

Unfortunately, though, the conclusions are of more than academic interest. The conversations of classicists or of astronomers rarely affect the lives of other people. Those of economists do so on a large scale. A well known joke describes a May Day parade through Red Square with the usual mass of soldiers,

guided missiles, rocket launchers. A nk upon rank of people in gray business suits. A bystander asks, "Who are those?" "Aha!" comes the reply, "Those are economists: you have no idea what damage they can do!" Their conversations do it.

According to the passage, which of the following is the best set of reasons for which one needs to 'look hard' at an economist's language?

- A. Economists accomplish a great deal through their language.
- B. Economics is an opinion-based subject.
- C. Economics has a great impact on others' lives.
- D. Economics is damaging.

- 1) A & D
- 2) B & D
- 3) A & C
- 4) B & C
- 5) A & B

Q 162 In the light of the definition of rhetoric given in the passage, which of the following will have the least element of rhetoric?

- 1) An election speech
- 2) An advertisement jingle
- 3) Dialogues in a play
- 4) Commands given by army officers
- 5) Songs in concerts

Q 163 As used in the passage, which of the following is the closest meaning to the statement 'The culture of the conversation makes the words arcane'?

- 1) Economists belong to a different culture.
- 2) Only mathematicians can understand economists.
- 3) Economists tend to use terms unfamiliar to the lay person, but depend on familiar linguistic forms.
- 4) Economists use similes and adjectives in their analysis.
- 5) Economists are difficult to converse with.

Q 164 As used in the passage, which of the following is the closest alternative to the word 'arcane'?

- 1) Mysterious
- 2) Secret
- 3) Covert
- 4) Perfidious
- 5) Clumsy

Q 165 Based on your understanding of the passage, which of the following conclusions would you agree with?

- 1) The geocentric and the heliocentric views of the solar system are equally tenable.
- 2) The heliocentric view is superior because of better rhetoric.
- 3) Both views use rhetoric to persuade.
- 4) Scientists should not use rhetoric
- 5) Economics is not as interesting as poetry.

Q 166-170 Read the following passage and answer the questions given below:

TO EACH WHAT SHE DESERVES

The second plan we now have to examine is that of giving each person what she deserves. Many people, especially those who are comfortably off, think that this is what happens at present: that the industrious and sober and thrifty are never in want, and that poverty is due to idleness, extravagance, drink, betting, dishonesty, and bad character generally.

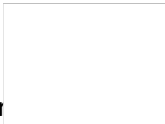

They can point to the fact that a laborer whose character is bad finds it more difficult to get employment than one whose character is good; that a farmer or country gentleman who gambles and bets heavily, and mortgages his land to live wastefully and extravagantly, is soon reduced to poverty; and that a man of business who is lazy and does not attend to it becomes bankrupt.

But this proves nothing but that you cannot eat your cake and have it too: it does not prove that your share of the cake was a fair one

It shows that certain vices and weaknesses make us poor, but it forgets that certain other vices make us rich. People who are hard, grasping, selfish, cruel, and always ready to take advantage of their neighbours, become very rich if they are clever enough not to overreach themselves.

On the other hand, people who are generous, public-spirited, friendly, and not always thinking of the main chance, stay poor when they are born poor unless they have extraordinary talents.

Also, as things are today, some are born poor and others are born with silver spoons in their mouths

that is to say, they are divided into r 
before they are old enough to have any character at all.

The notion that our present system distributes wealth according to merit, even roughly, may be dismissed at once as ridiculous. Everyone can see that it generally has the contrary effect, it makes a few idle people very rich, and a great many hardworking people very poor.

Choose the correct statement: The passage says that

- 1) the hard-working, sober and thrifty people never want something for themselves
- 2) bad people always lose their money, and stay poor ever after
- 3) especially those who are comfortably off think that what one gets is what one deserves
- 4) the poor never want to be rich anyway; they prefer to be idle rather than work
- 5) we must make a plan to give each person what she deserves.

Q 167 In the passage, which kind of people are not mentioned as likely to get rich quickly?

- 1) Selfish
- 2) Cruel
- 3) Grasping
- 4) Hard
- 5) Ambitious

Q 168 What; according to the author, do generous and public-spirited people need to become rich?

- 1) A criminal mind
- 2) To be born with silver spoon
- 3) Extraordinary talent
- 4) Strength of character
- 5) Gruel nature

Q 169 Which of the following about the author's thinking may be inferred from the passage?

- 1) The poor should work harder to become rich
- 2) The present system of distribution of wealth is biased in favour of rich
- 3) The honest men should resort to trickery if they want to become rich
- 4) The present system of government should give way to more progressive one
- 5) There is nothing good or bad in making money

Q 170 Which of the following is not a vice attributed to the poor by the rich?

- 1) Idleness
- 2) Drug Addiction
- 3) Gambling
- 4) Alcoholism
- 5) Bad character

Q 171 In the following passage, there are blanks, each of which has been numbered. These numbers are given below the passage as questions and against each, five words are suggested as alternative options, one of which fits the blank appropriately. Find out the appropriate words in each case.

Do women ...(1)... leadership differently than men do? And if so, will feminine leadership ...(2)... where ...(3)... leadership does not? A recent study suggests somewhat paradoxically that female managers ...(4)... their male ...(5)... even when the personal characteristics of both are very ...(6)... Of the two schools of thought, the structuralist theory argues that men and women do not receive the same treatment in the workplace and that stamping out ...(7)... bias would stamp out the observed ...(8)... In contrast, the socialization theory contends that men and women experience work differently because men see work as more ...(9)... to their lives. These ...(10)... explanations apart, today, business appears to be undergoing feminization of leadership

Select the most appropriate option to fill in blank no. 1

- 1) exercise
- 2) undertake
- 3) empower
- 4) authorise
- 5) tolerate

Q 172 Select the most appropriate option to fill in blank no. 2.

- 1) affect
- 2) succeed
- 3) compete
- 4) profess
- 5) dominate

Q 173 Select the most appropriate option to fill in blank no. 3.

- 1) traditional
- 2) charismatic
- 3) masculine
- 4) benevolent
- 5) authoritarian

Q 174 Select the most appropriate option to fill in blank no. 4.

- 1) outlive
- 2) outcast
- 3) outwork
- 4) outstand
- 5) outdo

Q 175 Select the most appropriate option to fill in blank no. 5.

- 1) employees
- 2) subordinates
- 3) managers
- 4) counterparts
- 5) superiors

Q 176 Select the most appropriate option to fill in blank no. 6.

- 1) minimal
- 2) distinct
- 3) unique
- 4) similar
- 5) constant

Q 177 Select the most appropriate option to fill in blank no. 7.

- 1) employment
- 2) culture
- 3) gender
- 4) class
- 5) category

Q 178 Select the most appropriate option to fill in blank no. 8.

- 1) variations
- 2) discriminations
- 3) resemblances
- 4) distortions
- 5) central

Q 179 Select the most appropriate option to fill in blank no. 9.

- 1) needy
- 2) desperate
- 3) preliminary
- 4) trivial
- 5) central

Q 180 Select the most appropriate option to fill in blank no 10.

- 1) contradictory
- 2) corresponding
- 3) discrimination
- 4) analogical
- 5) identical

Q 181 Pick out the nearest correct meaning or synonym of the words given below:

MENDACIOUS

- 1) truthful
- 2) misleading
- 3) harmful
- 4) false
- 5) sober

Q 182 Pick out the nearest correct meaning or synonym of the words given below:

PERNICIOUS

- 1) scientific
- 2) baneful
- 3) negative
- 4) radical
- 5) sturdy

Q 183 Pick out the nearest correct meaning or synonym of the words given below:

RIGMAROLE

- 1) cordon
- 2) hokum
- 3) apposite
- 4) weary
- 5) erudite

Q 184 Pick out the nearest correct meaning or synonym of the words given below:

OSTRACIZED

- 1) Initiate
- 2) Summarized
- 3) Dispelled
- 4) Command
- 5) Exclude

Q 185 Pick out the nearest correct meaning or synonym of the words given below:

BUOYANT

- 1) optimistic
- 2) tired
- 3) empire
- 4) anxious
- 5) sturdy

Q 186 Pick out the antonym for the words given below

RETRIBUTION

- 1) Forgiveness
- 2) grudge
- 3) contempt
- 4) pretend
- 5) compensation

Q 187 Pick out the antonym for the words given below

ABOMINATE

- 1) Love
- 2) respect
- 3) control
- 4) let go
- 5) despise

Q 188 Pick out the antonym for the words given below

SANGUINE

- 1) bloody
- 2) thin
- 3) optimistic
- 4) gloomy
- 5) dangerous

Q 189 Pick out the antonym for the words given below

CHIMERICAL

- 1) exact
- 2) real
- 3) obvious
- 4) particular
- 5) talkative

Q 190 Pick out the antonym for the words given below

VERBOSE

- 1) laconic
- 2) talkative
- 3) vent
- 4) suspense
- 5) obvious

Q 191 Read each sentence to find out whether there is any grammatical error in it. The error, if any will be in one part of the sentence.

Solve as per the direction given above

- 1) We discussed about the problem so thoroughly
- 2) on the eve of the examination
- 3) that I found it
- 4) very easy to work it out
- 5) No error

Q 192 Read each sentence to find out whether there is any grammatical error in it. The error, if any will be in one part of the sentence.

solve as per the direction given above

- 1) An Indian ship
- 2) laden with merchandise
- 3) got drowned
- 4) in the Pacific Ocean.
- 5) No error

Q 193 Read each sentence to find out whether there is any grammatical error in it. The error, if any will be in one part of the sentence.

Solve as per the direction given above

- 1) I could not
- 2) put up in a hotel
- 3) because the boarding and lodging charges

- 4) were exorbitant.
- 5) No error

Q 194 Read each sentence to find out whether there is any grammatical error in it. The error, if any will be in one part of the sentence.

Solve as per the direction given above

- 1) He deserted the path of honour
- 2) in order to
- 3) satisfy his ambition
- 4) and then went down his doom very quickly.
- 5) No error

Q 195 Read each sentence to find out whether there is any grammatical error in it. The error, if any will be in one part of the sentence.

Solve as per the direction given above

- 1) This is one of
- 2) the most interesting book
- 3) I have
- 4) ever read.
- 5) No error

Q 196 In each of the following questions, a sentence is given in which a word has been highlighted in bold. This word is used as different parts of speech in English. Identify the correct part of speech based on usage in the sentence.

Our **last** encounter was chaotic.

- 1) adverb
- 2) noun
- 3) adjective
- 4) pronoun
- 5) verb

Q 197 In each of the following questions, a sentence is given in which a word has been highlighted in bold. This word is used as different parts of speech in English. Identify the correct part of speech based on usage in the sentence.

The thief ran away **lest** he should be caught:

- 1) adjective
- 2) noun
- 3) pronoun
- 4) conjunction
- 5) verb

Q 198 In each of the following questions, a sentence is given in which a word has been highlighted in bold. This word is used as different parts of speech in English. Identify the correct part of speech based on usage in the sentence.

Such was his ambition **that** could never be curbed.

- 1) noun
- 2) pronoun
- 3) verb
- 4) adjective
- 5) preposition

Q 199 In each of the following questions, a sentence is given in which a word has been highlighted in bold. This word is used as different parts of speech in English. Identify the correct part of speech based on usage in the sentence.

This is the book I was telling you **about**.

- 1) noun
- 2) pronoun
- 3) preposition
- 4) adverb
- 5) adjective

Q 200 In each of the following questions, a sentence is given in which a word has been highlighted in bold. This word is used as different parts of speech in English. Identify the correct part of speech based on usage in the sentence.

It has rained **continuously** for three days.

- 1) adjective
- 2) adverb
- 3) conjunction
- 4) preposition
- 5) interjection

Answer

1) The correct answer is **Option 1: Pyorrhoea**.

In the given analogy, "**Eye : Myopia**", the relationship is that *Myopia* is a disorder associated with the *eye*. *Pyorrhoea* is a dental disease that affects the gums and the supporting structures of the teeth. The other options—*Cataract* and *Trachoma*—are related to the eyes, while *Eczema* and *Psoriasis* are skin conditions. Therefore, just as *Myopia* is a condition affecting the eyes, *Pyorrhoea* is a condition affecting the teeth, making it the correct choice.

2) The correct answer is **Option 2: Golf**.

In the given analogy, "**Wimbledon Trophy: Tennis**", the relationship is that the *Wimbledon Trophy* is awarded in the sport of *Tennis*. The *Walker's Cup* is a prestigious trophy awarded in the sport of *Golf*, specifically in amateur golf team competitions between the United States and Great Britain/Ireland.

3) The correct answer is **Option 1: Insects**.

In the analogy "**Virology : Virus**", the relationship is that *Virology* is the **study of viruses**. *Entomology* is the branch of science that deals with the **study of insects**.

4) The correct answer is **Option 3: Speed**. In the given analogy, "**Scale : Length**", a scale is an instrument used to measure length. An odometer is a device used in vehicles to measure the distance traveled. While none of the options directly mention "distance," which would be the most accurate answer, "speed" is the closest related concept among the given choices. Odometers are often used alongside speedometers in vehicles, and both are associated with monitoring travel metrics. Therefore, based on the context and available options, "Speed" is the most appropriate answer.

5) The correct answer is **Option 2: Earthquake**.

In the analogy "**Annihilation : Fire**", the relationship is that *fire* is a cause that can lead to *annihilation*, meaning total destruction. Among the options, an **earthquake** is a natural and powerful event that can cause a **cataclysm**. Other options like steam, radiation, or emergency do not directly represent a typical cause of a cataclysm in the way that an earthquake does.

6) The correct answer is **Option 4: Mercury**. All the options except **Mercury** are **flammable substances** commonly used as **fuels** or **solvents**. **Mercury**, on the other hand, is a **liquid metal** at room temperature, **non-flammable**, and **not used as a fuel**.

7) The correct answer is **Option 1: 728**. Among the given numbers, 512, 343, 216, and 125 are all perfect cubes. These numbers represent the cubes of consecutive natural numbers. However, 728 does not fit this pattern, as it is not a perfect cube. The cube of 9 is 729, which is close to 728, but not equal to it. Hence, 728 is the odd one out.

8) The correct answer is **Option 3: History**. **Prophecy, Omen, Forecast, and Prediction** all relate to **foretelling or anticipating future events**. **History**, on the other hand, deals with **past events**.

9) The correct answer is **Option 4: 40, 41, 43, 47**. In Options 1, 2, 3, and 5, **all numbers are prime numbers**. In Option 4, **40 is not a prime number**.

10) The correct answer is **Option 3: Speed**. **Time, Distance, Mass, and Energy** are all **fundamental physical quantities** (base quantities or fundamental forms of energy). **Speed** is a **derived quantity**, calculated as distance divided by time.

11) The correct answer is **Option 5: TWFS LJ**. pattern used to convert **MANGO** to **RFS LJ** is all letter is shifted forward by 5 in the alphabet.

12) The correct answer is **Option 1: FIRE**. the pattern from **WATER** → **YCVGT** is Each letter is shifted forward by 2 positions in the alphabet.

13) The correct answer is **Option 1: MPSFR**. the pattern for **MUSIC** → **LVRJB** is
1st letter: -1
2nd letter: +1
3rd letter: -1 and so on
So, **NOTES** → **MPSFR**

14) Correct answer: **Option 1: N4O6P8Q0**.
A1B3C5D7E9 → B2C4D6E8F0
Letters: A → B, B → C, C → D, D → E, E → F ⇒ Each letter is **shifted forward by 1**
Numbers: 1 → 2, 3 → 4, 5 → 6, 7 → 8, 9 → 0 ⇒ Each number is **increased by 1**, and **9 becomes 0**

Now apply the same pattern to: **M3N5O7P9**

Letters: $M \rightarrow N, N \rightarrow O, O \rightarrow P, P \rightarrow Q$

Numbers: $3 \rightarrow 4, 5 \rightarrow 6, 7 \rightarrow 8, 9 \rightarrow 0$

So the coded version is: **N4O6P8Q0**

15) Correct answer: **Option 4: 3607.**

1294 $\rightarrow$ 3516

Original: 1 2 9 4

Coded: 3 5 1 6

Add 2, add 3, add 2, add 2

So, **1385 $\rightarrow$ 3607**

16) The correct answer is **Option 4: Cousin.**

To understand the relationship, let's break down the statement: "*A woman introduces a man as the son of the brother of her mother.*" Here, the **brother of her mother** refers to the woman's **maternal uncle**. The **son** of her maternal uncle would be the **woman's cousin**. Therefore, the man being introduced is the cousin of the woman. Hence, based on the given description, the man is related to the woman as her **cousin**.

17) The correct answer is **Option 1: Brother-in-law.**

A is the mother of B $\rightarrow$ So A is B's mother.

B is the son of C $\rightarrow$ So C is B's father.

Therefore, **A and C are husband and wife** (since they are the parents of B).

D is the brother of C $\rightarrow$ So D is the **brother of A's husband**.

That makes **D the brother-in-law of A**.

18) The correct answer is **Option 4: Vinod.**

Vinod is the brother of Bhaskar.

Manohar is the sister of Vinod, so Manohar is also Bhaskar's sister.

Preetam is the daughter of Bhaskar.

Biswal is the brother of Preetam, so Biswal is also Bhaskar's child.

This means **Bhaskar is the father of both Preetam and Biswal**, and **Vinod is Bhaskar's brother**, which makes **Vinod the uncle** of Bhaskar's children — Preetam and Biswal.

19) Correct answer: **Option 1: Brother**

$V \$ J \rightarrow V$ is **father** of J

$S \# V \rightarrow S$ is **brother** of V

$O \& S \rightarrow O$ is **sister** of S

$G @ O \rightarrow G$ is **mother** of O

(So, G is the mother of O, and therefore also of S and V — all siblings)

From $V \$ J$, we know V is the **father**

From $S \# V$, we know S is the **brother** of V.

So, **S is the brother of J's father**.

20) correct answer: 2) $K \times B \div N \times Q \times D$

Here K is brother of B. N is father of B. Q is brother of N. Hence 'Q is the paternal uncle of K

21) Correct answer: **3) East**

At 1:30, the hour hand is **halfway between 1 and 2**.

So, the **hour hand is 45° clockwise** from 12 o'clock.

If **12 o'clock = Northeast**, the clock is rotated **45° clockwise** from the normal orientation. Since the **hour hand is 45° clockwise from 12**, and **12 = Northeast**,

$\rightarrow$ Add another 45° clockwise

$\rightarrow$ **Northeast + 45° = East**

22) Correct Answer: **2) South-West**

+45° clockwise

+180° clockwise

-270° counterclockwise

Total net rotation = **+225° - 270° = -45°**

So, from **West**, a **45° counterclockwise turn = South-West**

23) option 4 The square immediately north east of the rice

Key points: . The wheat and barley should be continuous.

Two of the fields should be planted with soybeans.

The northwestern most field should be planted with peanuts

The southern third of the field is suitable only for vegetables

There will be two cases wherein if heat is north of rice than barley is north eastern and vice versa.

Peanut	Wheat/ barley	Wheat/ Barley
Soyabeans	Rice	Soyabeans
Vegetables	Vegetables	Vegetables

24) option 5 The square immediately north west of the rice as you can see in above table.

25) Final answer: 4) Neither I nor II follow

☑ **Male athletes can play**

$\rightarrow$ There is **no information** about male athletes at all.

So, **we cannot conclude this**.

❓ **Some athletes can play**

→ The only athletes we know about are **women teachers**, and they **cannot play**. No other athletes are mentioned. So, **we also cannot conclude this**.

26) Correct Answer: **2) 35th and 31st**

Rank from bottom = Total students + 1 – Rank from top

For Mohan: Rank from bottom = $41 + 1 - 7 = 35\text{th}$

For Ramesh: Rank from bottom = $41 + 1 - 11 = 31\text{st}$

27) Key points. $D > E > C > A$

F is between A and B. so $A > F > B$ or $B > F > A$

Also A is not shortest and E and F have two boys between them.

- 1 B
- 2 F
- 3 A
- 4 C
- 5 E
- 6 D

Therefore, **E is Between D and C**

28) D is the tallest

29) C is fourth

30) B is the shortest

31) Correct Answer: 3) 39

4, 7, 12, 19, 28

LOOK AT DIFFERENCE +3, +5, +7, +9,

SO NEXT WILL BE +11, $28 + 11 = 39$

32) Correct answer: Option 1: OPKL

The logic is 1st letter – 2

2nd letter – 2

3rd letter + 2

4th letter + 2

33) **3 meaningful words** → LAME, MALE, MEAL

34) **1 meaningful word** – CURT

35) Correct answer: 4) IMPACT

36) If we carefully look at the logic, in final output all the all the numbers are arranged in the ascending order of their digital sum. In each step the number with least digital sum comes in front and replace the number.

Input: 544, 653, 325, 688, 461, 231,

Step 1: 231, 653, 325, 688, 461, 544, 857

Step 2: 231, 325, 653, 688, 461, 544, 857

Step 3: 231, 325, 461, 688, 653, 544, 857

Step 4: 231, 325, 461, 544, 653, 688, 857

Step 5: 231, 325, 461, 544, 653, 857, 688

Hence, there will be **5** steps.

37) If we carefully look at the logic, in final output all the letters are arranged in as in the dictionary order and number are arranged in descending order alternatively starting with words. In each step first the word is arranged at left and then number and so on...

Input: 98 11 64 22 but will an it

Step I: an 98 11 64 22 but will it

Step II: an 98 but 11 64 22 will it

Sep iii : : an 98 but 64 11 22 will it

Step IV: an 98 but 64 it 11 22 will

Step V: an 98 but 64 it 22 11 will

Step vi: an 98 but 64 it 22 will 11

Step VI clearly matches with **option 3**

38) Input: 32 now 20 gift 53 box 62 at

Step I: at 32 now 20 gift 53 box 62

Step II: at 62 32 now 20 gift 53 box

Step III: at 62 53 32 now 20 gift box

Step IV : at 62 53 box 32 now 20 gift

Step IV clearly matches with option 1

39) Input: pay by 18 36 nose ear 72 54

Step I: by pay 18 36 nose ear 72 54

Step II: by pay 18 36 nose ear 54 72

Step III: by ear pay 18 36 nose 54 72

Step IV: by ear pay 18 36 nose 54 72

Step V: by ear nose pay 18 36 54 72

Step VI: by ear nose pay 18 36 54 72

Step 6 is the last step. Hence option 4

40) Final Answer: **2) 43**

Let x = number who play **all three sports**

Total = $F + T + C - (F \cap T + T \cap C + F \cap C) + (F \cap T \cap C)$

$256 = 144 + 123 + 132 - (58 + 25 + 63) + x$

$256 = 399 - 146 + x$

$256 = 253 + x \Rightarrow x = 3$

Only Tennis = $T - (F \cap T + C \cap T - F \cap T \cap C)$

$$\begin{aligned}
 &= 123 - (58 + 25 - 3) \\
 &= 123 - (80) \\
 &= 43
 \end{aligned}$$

41)) Correct answer: 3) 25
Look at intersection of circle and square. $\Rightarrow 22+3=25$

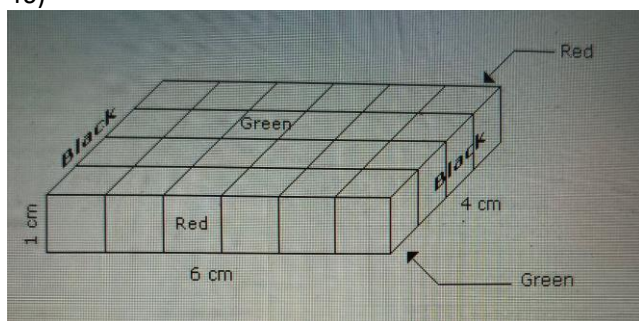

42) Correct answer: 3) 25
graduates or teachers, but not politicians means smaller triangle and circle excluding bigger triangle. Therefore A and E

43) Correct answer: **option 1 B, C**
Graduate politicians = B, G, F, C
They should not be members of parliament. So remove letters inside rectangle i.e. G and C. Hence **option 1 B, C**

44) Correct answer: 3) **L and H**
Politicians But neither graduate nor teachers means all the letters inside triangle leaving the letters inside smaller triangle and circle. So **only L and H**

45) Correct answer: 3) **F**
Members of parliament who are graduate as well as teachers means letters coinciding rectangle, circle and smaller triangle. So only letter **F**

46)

Such cubes are related to the corners of the cuboid.
Since the number of corners of the cuboid is 4.
Hence, the number of such small cubes is 4.

47) Number of small cubes = $l \times b \times h = 6 \times 4 \times 1 = 24$

48) Only 4 cubes situated at the corners of the cuboid will have 4 coloured and 2 non-coloured sides.

49) There are 16 small cubes attached to the outer walls of the cuboid.

Therefore remaining inner small cut cubes having two sides green coloured.
So the required number = $24 - 16 = 8$

50) Number of small cubes which are Black and Green is 8 in all.
Hence, the number of remaining cubes are = $24 - 8 = 16$

51) Final Answer: **1) Both (A) and (R) are true and (R) is the correct explanation of (A).**

Assertion (A): **True** — Tides are indeed the regular rise and fall of sea level caused by gravitational forces.

Reason (R): **True** — The primary cause of tides is the **gravitational pull of the Moon**, and to a lesser extent, the **Sun**.

Yes, the gravitational pull **causes** the periodic rise and fall in sea level. So, **(R) is the correct explanation of (A).**

52) Final Answer: 3) (A) is true but (R) is false.
Assertion (A): **True** — This is based on **Archimedes' Principle**, which says that a body submerged in a fluid experiences an **upthrust (buoyant force)** equal to the weight of the liquid displaced. As a result, it **appears to weigh less** — this is called **apparent weight loss**.

Reason (R): **False** The decrease in apparent weight is due to the **buoyant force**, which **depends on the volume** of liquid displaced **and the density of the liquid**. It is **not simply because the displaced liquid is of higher density**.

53) Final Answer: 1) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A): **True** — When the lift is **at rest** or **moving at a constant (uniform) speed**, it has **zero acceleration**. In such cases, the **net force on the body remains the same**, so the person feels **normal weight**.

Reason (R): **True** — When the lift is **not accelerating**, the **normal reaction force** (which we interpret as apparent weight) is **equal to the gravitational force (mg)** — the person's actual weight.

The **unchanged reaction force** from the lift floor is the **reason** the person feels no difference in weight when the lift is at rest or in uniform motion.

54) Final Answer: **2) Only Assumption B is implicit.**

Assumption A: The statement talks about **uncertainty in time**, not **impossibility**. It suggests

control may happen, but **when** is unknown — it does **not imply that it's impossible**.

Assumption B: Yes, since the statement refers to **how long it will take**, it **assumes that efforts are ongoing** to contain terrorism.

55) Final Answer: 1) Only Assumption A is implicit
Why has the suspension of flights been made for a limited period of four days? It must have been assumed by the authorities of X-Airlines that the crisis may be over after this limited period.
Hence, assumption I is implicit. It may or may not be an assumption.

Hence, II is not implicit.

56) Analysing the given information:

Chetan----- Wicket-Keeper ----- Bangalore
[Sumeet is not the wicket-keeper.]

Sumeet → Captain → Pune
[Neither Philips nor Wasim is the captain.]

Bishan → pace bowler → Surat.
[Bishan cannot be the batsman.]

So, Wasim → batsman → Chandigarh
[Wasim does not belong to Warangal.]

By elimination, we get
Philips → Spinner → Warangal
[Philips is not the pace-bowler.]

Phillips is spinner (option 1)

57) The spinner's hometown is **Warangal**

58) Chandigarh is the hometown of **Wasim**

59) **Bishan** is the pace-bowler

60) Chetan's hometown is **Bangalore**

61) Answer: 2) 11

Each time we order 1, 2 or 3, one fruit is added to the basket but whenever we order 4, two fruits are removed from it. Required number = Number of 1's + Number of 2's + Number of 3's - 2 × (Number of 4's) = 6 + 6 + 7 - (2 × 4) = 19 - 8 = 11.

62) Correct answer: 2) 2

Number of guavas left in the basket at the end = 1 + 1 - 1 + 1 - 1 + 1 - 1 + 1 - 1 = 2

63) Answer: 2) 2

Each time we order 1, one apple is added to the basket but each time when 4 is ordered, one apple is removed from it. Required number of apples = number of 1's - number of 4's = 6 - 4 = 2

64) Correct answer 3) 13

Position of Reena = 6th (From left)
Position of Beena = 7th (From left)
Position of Meena = 4th (From right)
Position of Neena = 5th (From right)

5 Reena Beena 6 (persons) Neena,, Meena 3
persons 6th 7th 14th 15th per

Position of Beena after exchanging the position with Meena = 15th (From left) = That is the position of Meena originally from left

5 Reena Meena.. 6 (persons)....Neena...Beena 3
(person) 6th 7th 14th 15th per

Therefore, the position of Reena from the right = 13th

65) Originally, Neena's position from the left is **14th**

66) Neena's position from the left will be **6th**

67) Meena's position from right will be 12th

68) Correct answer : 2) 32

Pattern is $(5 \times 6 \times 4) / 10$

$(6 \times 7 \times 5) / 10$

So $(4 \times 8 \times 10) / 10 = 32$

69) The 3rd letter is the sum of 1st and 2nd letter.

F(6) + I(9) = O(15)

A(1) + J(10) = K(11)

E(5) + M(13) = **R(18)**

70) Correct answer : 2) 8C

Number in the second row is the cube of row 1. Also Letter A, B and C are present in each row.

71) Born on **3rd February 1975** → Age on 01.12.2024 = **49 years 9 months** ✓

Owns **6 acres** of cultivable land ✓

Can **pledge collateral** worth **more than Rs. 8 lakhs**

✓

No unpaid loan from the bank ✓

Recommendation letter submitted ✓

All criteria are satisfied.

4) D – The advance is to be granted ✓

72) Born on 8th March 1975 → Age on 01.12.2024 = 49 years 8 months ✓

Only 4 acres of cultivable land ✗

Only one crop → Does not qualify for the exception (A)

Has collateral of Rs. 8 lakhs ✓

Has no unpaid loan ✓

Has a recommendation letter ✓

Has fixed deposit of Rs. 5 lakhs (but this is only relevant for condition iv, which he already satisfies)

He fails condition (i) and does not qualify for the exception (A), because he cultivates only one crop, not more than one crop.

1) A – The advance is not to be granted

73) ☒ Has 8 acres

☒ Has Rs. 8 lakhs collateral

Born on 5th June, 1976 → Age on 1.12.2024 = 48 years 6 months ✓

✗ Has Rs. 4 lakhs outstanding loan

☒ recommendation letter from Panchayat Pradhan

– ☒ Yes

He fails condition (iv): Outstanding loan of Rs. 4

lakhs ✗

Exception (B): If the farmer fails condition (iv) but has Fixed Deposits of at least Rs. 4 lakhs, refer the case to the General Manager ✓

Rishi has FD of Rs. 6 lakhs ✓

So, his case qualifies for Exception (B).

Correct Option: 2) B – The case is to be referred to the General Manager of the bank

74) Answer: 3) (c)

(a) Wrong. Floors 2 and 3 are in buildings that may not have lifts. So not all floors may be reachable by lift.

(b) wrong A lift is available for all the floors

(c) Correct. 7th floor is in a building with more than 3 floors ⇒ The building must have a lift.

(d) Wrong. We can't be sure — the building may have only 2 or 3 floors, and may not have a lift, but it's not certain.

75) Correct answer is: (d) If neither of the conclusions is true

Conclusion I: Not definitely true — it's just one of the possible relationships.

Conclusion II not definitely true — possibility, but not certain.

76) option 5) E

There are 5 black balls in A then 7 then 5 and pattern continues. Finally it will have 5 black balls

77) Correct answer : 2

The smaller figure gets enlarged in the next figure. In the next figure circle will be enlarged. Hence option 2

78) Correct answer : 3

The black circle moves from one corner to another in clockwise direction. So It will be at bottom left corner in next figure. Blue colour circle moves 1 step anticlockwise than 2 steps clockwise then 3 steps anticlockwise and so on. Finally, it will move 4 steps clockwise and be on top right corner. Square gets coloured in every alternate figure.

79) Correct answer : 4

All the elements move one step in clockwise direction. Moreover, one element gets doubled in the sequence starting with plus sign then star and heart. Hence in final figure there will be heart two times arranged horizontally. Plus sign will be in top right corner.

80) Correct answer : 1

The figure which is inside comes in middle, middle figure comes outside and the outer figure goes inside. Hence Square will be outside followed by triangle inside and a tiled square inside it.

81) Correct answer : 3

All the figures have their right portion as mirrored from the left one. Except option 3.

82) Correct answer : 1

It's an analogy wherein the unshaded part is shaded and the shaded part becomes colourless.

83) Correct answer : 1

A minimum of 17 lines are required.

84) Correct answer: 2

In all the figures there are three geometrical figures formed in white part except in figure two where there are only two formed

85) Correct answer: 1

In each figure the two small rectangles are on the one side of line and the square on the other side. However, in figure 1 there is square and a small rectangle and square on side.

86) Correct answer :

The question given wrong by cet cell.

87) Correct answer : 5

All the figures can be obtained by rotating the figure except figure E

88) correct answer: 2

Figure B is the only figure where the diagonals within the square are not same.

89) Correct answer : 3

In all the options a total of 9 parts are shaded whereas in option C there are 11.

90) correct answer: 2

Triangle moving 1 step in clockwise direction. Circle moving from top right to bottom left alternatively. In some figures figures are hidden. In final figure triangle at top right and circle at bottom left. Only option 2 satisfies here they are hidden.

91) Correct answer: 1

The box moves from corner to corner in anticlockwise direction and hence will come at bottom left corner. The circle is behind the square and comes out after to figures. Hence it will be in the middle.

92) Correct answer: D

The semicircle moves 90° in clockwise direction in each step. Moreover a star gets added in every alternate figure.

93) Correct answer: 3 There are 14 triangles in all.

94) Correct answer: 2 A total of 11 lines is required.

95) Correct answer: 4 There are 14 triangles.

96) Correct answer: 4

1,6,9 are all three sided, 3,4,7 are four sided figures and 2,5,8 are 5 sided figures.

97) Correct answer: 4

Figures 1, 4 and 5 when properly fitted will give you a square.

98) Correct answer: 1 Figures 1, 2 and 4 properly fitted will give you a square.

99) In the given dice, 2 is opposite 5 ; 3 is opposite 6 and 1 is opposite 4.

5 is opposite to 2. Hence option 4.

100) As a, b, c and d are in clockwise direction, a is opposite c and b opposite d. Hence option A a will be at bottom

101) Final Answer: **3) 571** is a **prime number**.

Option 3: **571** Try dividing by primes $\leq \sqrt{571} \approx 23.8$:

Not divisible by 2, 3, 5, 7, 11, 13, 17, 19, or 23 ✓

Prime number

102) Final Answer: **2) 8190**

Sum = $n(n+1)$ for even numbers

Sum = $90 \times (90+1) = 90 \times 91 = 8190$

103) Final Answer: **2) 4**

$9900 = 99 \times 100$

$9900 = 2^2 \times 3^2 \times 5^2 \times 11$

The distinct prime factors are: 2, 3, 5, 11

104) Final Answer: **2) 45**

$405 = 5 \times 81 = 5 \times 3^4 \rightarrow 3^4 \times 5$

$585 = 5 \times 117 \rightarrow 3^2 \times 5 \times 13$

$765 = 5 \times 153 \rightarrow 3^2 \times 5 \times 17$

$900 = 9 \times 100 \rightarrow 2^2 \times 3^2 \times 5^2$

$HCF = 3^2 \times 5 = 9 \times 5 = 45$

105) Correct answer 1) 108

Let the numbers be $4x$ and $5x$

$LCM(4x, 5x) = LCM \text{ of } 4 \text{ and } 5 \times x = 20x$

$20x = 240 \Rightarrow x = \frac{240}{20} = 12$

First number = $4x = 4 \times 12 = 48$

Second number = $5x = 5 \times 12 = 60$

Sum = $48 + 60 = 108$

106) Final Answer: **38 years**

Let Raju's age at the time of marriage = x

present age = $x + 8$

But also given: $x + 8 = \frac{6}{5}x$

$5x + 40 = 6x \Rightarrow 40 = 6x - 5x = x$

So, **Raju's age at marriage = 40**

Then his **present age = 40 + 8 = 48**

Sister's age then = $40 - 10 = 30$

Present age = $30 + 8 = 38$

107) Final Answer: **2) Rs. 1000**

Let the price of the cycle = ₹x

If he had worked the full year, he would receive:

Total = ₹15,000 + ₹x

He worked only **9 months** = $\frac{3}{4}$ of a year, so he should receive: $\frac{3}{4} \times (15,000 + x)$

He actually received:

₹11,000 + cycle = ₹11,000 + x

$\frac{3}{4} (15,000 + x) = 11,000 + x$

$3 (15,000 + x) = 4(11,000 + x)$

$45,000 + 3x = 44,000 + 4x$

$45,000 - 44,000 = 4x - 3x \Rightarrow 1,000 = x$

108) 50 cm

Let the original length = L, and width = W

Original area = $L \times W$

New shape is a **square** with:

Side = $L - 4 = W + 3$

$(L - 4)^2 = L \times W$

Substitute $L = W + 7$

$(W + 7 - 4)^2 = (W + 7) \times W \Rightarrow (W + 3)^2 = (W + 7)W$

$W^2 + 6W + 9 = W^2 + 7W \Rightarrow 6W + 9 = 7W \Rightarrow 9 = W$

Length $L = W + 7 = 16$

Perimeter = $2(L + W) = 2(16 + 9) = 2 \times 25 = 50$ cm

109) $3) x - 2$

Option 1: $x + 2 \Rightarrow x = -2$

$(-2)^3 - 19(-2) + 30 = -8 + 38 + 30 = 60 \neq 0 \Rightarrow$ Not a factor

Option 2: $x + 1 \Rightarrow x = -1$

$(-1)^3 - 19(-1) + 30 = -1 + 19 + 30 = 48 \neq 0 \Rightarrow$ Not a factor

Option 3: $x - 2 \Rightarrow x = 2$

$(2)^3 - 19(2) + 30 = 8 - 38 + 30 = 0 \checkmark$

110) Final Answer: **2) a = 5, b = 2**

$f(x) = 2x^3 + ax^2 + 2bx + 1$

Also $2a - 3b = 4$ (eq. 1)

Given: $x + 1$ is a factor $\Rightarrow$ So, $f(-1) = 0$

$f(-1) = 2(-1)^3 + a(-1)^2 + 2b(-1) + 1 = -2 + a - 2b + 1$

$= a - 2b - 1$

$0 = a - 2b - 1 \Rightarrow a = 2b + 1$ (Equation 2)

Substitute **Equation 2** into Equation 1:

$2(2b + 1) - 3b = 4 \Rightarrow 4b + 2 - 3b = 4 \Rightarrow b + 2 = 4 \Rightarrow b = 2$

$a = 2b + 1 = 2(2) + 1 = 5$

111) Final Answer: **2) 10.25%**

Area of a square = s^2

If side is increased by **5%**, the new side = $s \times 1.05$

$(\text{New side})^2 = (1.05s)^2 = 1.1025s^2$

112) Effective rejection rate = 16.21%

Start with 100 parts

After **Stage 1**: 90% pass $\rightarrow$ 90 parts remain

After **Stage 2**: 95% of 90 = $0.95 \times 90 = 85.50$

After **Stage 3**: 98% of 85.5 = $0.98 \times 85.5 = 83.79$

So, from 100 parts, only **83.79** parts pass **all 3 checks**.

Rejection = $100 - 83.79 = 16.21$

113) Final Answer: **3) 14%**

Cost of calculators = $150 \times 250 = 37,500$

Add transport/packing = 2,500

$\Rightarrow$ Total Cost Price = $37,500 + 2,500 = ₹40,000$

Discount = 5% of ₹320 = $0.05 \times 320 = 16$

Selling price per calculator = ₹320 - ₹16 = ₹304

Total Selling Price = $150 \times 304 = ₹45,600$

Profit = $45,600 - 40,000 = ₹5,600$

Profit % = $\frac{5600}{40000} = 14\%$

114) Let the Cost Price = ₹100

Marked Price = 50% above C.P. = ₹100 + ₹50 = ₹150

Discount = 25% of ₹150 = ₹37.50

Selling Price (S.P.) = ₹150 - ₹37.50 = ₹112.50

Profit = $112.50 - 100 = ₹12.50$

Profit % = $\frac{12.5}{100} = 12.5\%$

115) Final Answer: **3) ₹80**

Cost price of the pen = ₹P

Cost price of the book = ₹B

Loss on pen = 5% of P = $-0.05P$

Gain on book = 15% of B = $+0.15B$

Total profit = Rs. 7

$-0.05P + 0.15B = 7$ (Equation 1)

Gain on pen = 5% of P = $+0.05P$

Gain on book = 10% of B = $+0.10B$

Total profit = Rs. 13

$0.05P + 0.10B = 13$ (Equation 2)

$(-0.05P + 0.15B) + (0.05P + 0.10B) = 7 + 13$

$0.25B = 20 \Rightarrow B = \frac{20}{0.25} = 80$

116) 4) ₹16,250

Son : Wife = 3 : 1 $\rightarrow$ Let wife's share = 1 unit, then son's = 3 units

Wife : Daughter = 3 : 1 $\rightarrow$ If wife's = 3 units, then daughter's = 1 unit

Let's make wife's share = **3 units**.

Son's share = $3 \times 3 = 9$ units

Wife's share = 3 units

Daughter's share = 1 unit

Son gets **9 units**, daughter gets **1 unit**

Difference = $9 - 1 = 8$

So, **1 unit = ₹10,000 ÷ 8 = ₹1,250**

Total units = 9(son) + 3(wife) + 1(daughter) = 13 units

Total property = $13 \times ₹1,250 = ₹16,250$

117) 19 days

Provisions for 250 students $\times$ 35 days = **8750 student days**

First 5 days: 250 students $\times$ 5 days = **1250 student days**

Next 10 days (from day 6 to 15): 275 students $\times$ 10 days = 2750 student-days

Total used in 15 days = $1250 + 2750 = 4000$ student – days

$8750 - 4000 = 4750$ student-days remain

number of days provisions will last: $\frac{4750}{250} = 19$ days

118) option 2) 30

Let the **total meal = 1 unit**

Then: 1 man = $\frac{1}{120}$

1 child = $\frac{1}{200}$

Meal consumed = $150 \times \frac{1}{200} = \frac{3}{4}$ units

Remaining meal = $1 - \frac{3}{4} = \frac{1}{4}$ units

Number of men = $\frac{1/4}{1/120} = \frac{1}{4} \times 120 = 30$

119) Final Answer: **1) 72 days**

Man's 1-day work = **M**

Boy's 1-day work = **B**

Total work = $24M + 24B$

Moreover, Total work = $20(M+B) + 6M = 26M + 20B$

$24M + 24B = 26M + 20B$

$2M = 4B$

$M:B = 2:1$

Substitute in total work and the time taken by one

boy = $\frac{24 \times 3 + 24 \times 1}{1} = 72$ days

120) 1.05.000

Total Profit = ₹98,000

This is **20%**, so total investment = $\frac{98000}{0.2} = 4,90,000$

P = ₹5x for 12 months $\rightarrow$ Capital-time = $5x \times 12 = 60x$

Q = ₹6x for 12 months $\rightarrow$ Capital-time = $6x \times 12 = 72x$

R = ₹6x for **6 months** $\rightarrow$ Capital-time = $6x \times 6 = 36x$

Total capital-time = $60x + 72x + 36x$

R's share of profit = $\frac{36x}{168x} \times 98,000 = ₹21,000$

Now this ₹21,000 is **20% profit**, so R's investment = $\frac{21000}{0.2} = 1.05.000$

121) Correct option: 2) 280

Let A's share of the rent be 1 unit.

Then B pays 1.5 units.

Total rent = A's share + B's share = $1 + 1.5 = 2.5$ units

A has 80 cows for 7 months

$\Rightarrow$ A's cow-months = $80 \times 7 = 560$

Then B's cow-months = $3x$

$\frac{A's \text{ cow-months}}{B's \text{ cow-months}} = \frac{1}{1.5} = \frac{2}{3}$

$\frac{560}{3x} = \frac{2}{3}$

$560 \times 3 = 2 \times 3x \Rightarrow 1680 = 6x \Rightarrow x = \frac{1680}{6} = 280$

122) Correct option: **4) 37.5%**

Assume the **tank capacity is 1 unit**

Step 1: Fill tank with A Tank = 1 unit A = 1., B = 0

Step 2: Half tank used $\rightarrow$ 0.5 unit A remains filled with **B** (0.5unit) Now: A = 0.5, B = 0.5

Half tank used $\rightarrow$ 0.25 A, 0.25 B remain

Then filled with A (0.5 unit) Now:

A = 0.25 + 0.5 = 0.75, B = 0.25

Half tank used $\rightarrow$ 0.375 A, 0.125 B remain

Then filled with B (0.5 unit) Now:

A = 0.375, B = 0.125 + 0.5 = 0.625

Percentage of A = $\frac{0.375}{1} \times 100 = 37.5\%$

123) Correct Option: **4) 1:3** (Kerosene : Alcohol)

Allegation Rule Formula:

Ratio of components = $\frac{\text{Higher price} - \text{Mean price}}{\text{Mean price} - \text{Lower price}}$
 $= \frac{3.50 - 2.75}{2.75 - 2.5} = \frac{0.75}{0.25} = 3 : 1$ or **1:3** (Kerosene : Alcohol)

124) Final Answer: **4) 157:53**

The volume ratio of three containers = 3:4:5

Ratio of milk to water in first container = 4:1

.....(1) $(4 + 1 = 5) \times 21$

Ratio of milk to water in second container = 3 : 1

.....(2) $(3 + 1 = 4) \times 35$

Ratio of milk to water in second container = 5:2

.....(3) $(5 + 2 = 7) \times 25$

Ratio of milk to water in fourth container = $(84 + 105 + 125) : (21 + 35 + 50) = 314 : 106 = 157 : 53$

125) Final Answer: **2) 2.5%**

Let's assume: **Annual rent = Rs. 1**

Purchase price = $40 \times 1 = \text{Rs. } 40$

So, every year, he earns **Rs. 1** on an investment of **Rs. 40**.

$$\text{Rate of return} = \frac{\text{Annual income}}{\text{Investment}} \times 100 = \frac{1}{40} \times 100 = 2.5\%$$

126) Final Answer: **2) Rs. 6250**

Scheme A (8% CI for 2 years) :

$$\text{CI (A)} = x \left(1 + \frac{8}{100}\right)^2 - x = x [(1.08)^2 - 1] = x[1.1664 - 1] = 0.1664x$$

Scheme B (12% CI for 2 years) :

$$\begin{aligned}\text{CI (B)} &= (20000 - x) \left(1 + \frac{12}{100}\right)^2 - (20000 - x) \\ &= (20000 - x) [(1.2544) - 1] = (20000 - x)(0.2544)\end{aligned}$$

Total CI = Rs. 4538

$$0.1664x + 0.2544(20000 - x) = 4538$$

$$0.1664x + 5088 - 0.2544x = 4538$$

$$(0.1664 - 0.2544)x = 4538 - 5088$$

$$0.088x = -550 \Rightarrow x = \frac{550}{0.088} = 6250$$

127) Final Answer: **3) Rs. 1640**

$$\text{present value } P = \frac{882}{(1.05)} + \frac{882}{(1.05)(1.05)}$$

$$P = 840 + 800 = \text{Rs. } 1640$$

128) Final Answer: **1) 300, 200, 250**

A's 5 days work = 50%

B's 5 days work = 33.33%

C's 2 days work = 16.66% $[100 - (50 + 33.33)]$

Ratio of contribution of work of A, B and C

$$= 50 : 33\frac{1}{3} : 16\frac{2}{3} = 3 : 2 : 1$$

A's total share = Rs. 1500

B's total share = Rs. 1000

C's total share = Rs. 500

A's one day's earning = Rs. 300

B's one day's earning = Rs. 200

C's one day's earning = Rs. 250

129) 2) 4 days

Ratio of efficiency A : B = 3 : 1

Ratio of time A : B = 1 : 3 (reverse of efficiency)

Difference is 8 days (2 units)

So 1 unit = 4 days

130) 5 hours

Let total work = 1 tank

$$A + B = \frac{1}{6}; B + C = \frac{1}{10}; A + C = \frac{2}{15}$$

$$(A+B) + (B+C) + (A+C) = \frac{1}{6} + \frac{1}{10} + \frac{2}{15}$$

$$2A + 2B + 2C = A + B + C \times 2$$

$$2(A+B+C) = \frac{1}{6} + \frac{1}{10} + \frac{2}{15}$$

$$= \frac{5}{30} + \frac{3}{30} + \frac{4}{30} = \frac{12}{30} = \frac{2}{5}$$

$$2(A+B+C) = \frac{2}{5} \Rightarrow A+B+C = \frac{1}{5}$$

$$\text{Time to fill the tank} = \text{reciprocal of rate} = \frac{1}{\frac{1}{5}} = 5 \text{ hrs}$$

131) Final Answer: **1) 50 m³/min**

Let the filling capacity or efficiency of pump be $y \text{ m}^3$ per minute.

As per the question;

$$2400/y - 2400/(y + 10) = 8 \text{ minutes}$$

$$1/y - 1/(y + 10) = 8/2400$$

$$10/y(y + 10) = 1/300$$

$$y(y + 10) = 3000$$

$$y^2 + 10y - 3000 = 0$$

$$y(y + 60) - 50(y + 60) = 0$$

$$(y - 50)(y + 60) = 0$$

$$y \neq 60 \quad y = 50$$

132) 4 KM

Let x be the distance uphill from A to B (and downhill from B to A).

Let y be the distance on the plain.

Let z be the distance downhill from A to B (and uphill from B to A).

$$x + y + z = 11.5$$

$$\text{From A to B: } \frac{x}{3} + \frac{y}{4} + \frac{z}{5} = 2.9$$

$$\text{From B to A: } \frac{z}{3} + \frac{y}{4} + \frac{x}{5} = 3.1$$

$$\text{Multiply the first time equation by 60} = 20x + 15y + 12z = 174$$

$$\text{Multiply the second time equation by 60} = 20z + 15y + 12x = 186$$

$$\text{Adding the two equations: } 32x + 30y + 32z = 360$$

$$\text{Subtracting the two equations: } 8x - 8z = -12$$

$$\text{Multiply the total distance equation by 16 : } 16x + 16y + 16z = 184$$

subtract the modified total distance equation from the sum of time equations.

$$(16x+15y+16z) - (16x+16y+16z)=180-184$$

$$Y = 4$$

133) 6 m

A beats B by 10 m → When A finishes 100 m, B finishes **90 m**

A beats C by 13 m → When A finishes 100 m, C finishes **87 m**

When **B runs 90 m, C runs 87 m**

So the ratio of their speeds: $\frac{C}{B} = \frac{87}{90} = \frac{29}{30}$

Since speed ratio of B:C is **30:29**, the distance covered is also in the same ratio.

When **B runs 180 m, C will run:** $\frac{29}{30} \times 180 = 174$ m

So, **B beats C by:** $180-174=6$ m

134) Final Answer: **1) 42 m/s, 38 m/s**

Case 1: Same Direction

Relative speed = $F-S$ m/s

Distance to be covered = sum of lengths = $130+110=240$

$$\frac{240}{F-S} = 60 \Rightarrow F-S = \frac{240}{60} = 4$$

Case 2: Opposite Direction

Relative speed = $F+S$ m/s

Distance to be covered = 240 m

Time = 3 sec

$$\frac{240}{F+S} = 3 \Rightarrow F+S = \frac{240}{3} = 80$$

$$F-S=4 \text{ \& } F+S=80$$

$$\text{Add both: } 2F = 84 \Rightarrow F = 42 \text{ m/s}$$

$$42 + S = 80 \Rightarrow S = 38 \text{ m/s}$$

135) 1 km/hr

Let: Speed in still water = x km/hr

Speed of stream = y km/hr

$$\frac{4}{x+y} = \frac{3}{x-y}$$

$$4(x-y) = 3(x+y) \Rightarrow 4x-4y = 3x+3y \Rightarrow x = 7y$$

Total time = 14 hours:

$$\frac{48}{x+y} + \frac{48}{x-y} = 14$$

substitute $x=7y$

$$\frac{48}{7y+y} + \frac{48}{7y-y} = 14 \Rightarrow \frac{6}{y} + \frac{8}{y} = 14 \Rightarrow y = 1$$

136) Final Answer: 3) 15 km/hr

Convert rate to **tons per hour:**

$$\text{Rate of water entering} = \frac{7}{3} \text{ tons in } \frac{13}{2} \text{ minutes} = \frac{7}{3} \div \frac{13}{2}$$

$$= \frac{14}{39} \text{ tons per minute}$$

$$\text{Convert to tons/hour: } = \frac{14}{39} \times 60 \approx 21.54 \text{ tons/hour}$$

Water entering: 21.54; Pumping out: **15 tons/hour**

Net water accumulating: $21.54 - 15 \approx 6.54$ tons/hour

It can hold **68 tons**, so time to sink:

$$T = \frac{68}{6.54} \approx 10.4 \text{ hours}$$

$$\text{Speed} = \frac{156}{10.4} \approx 15 \text{ km/hr}$$

137) Correct answer: **(2) 3/4.**

The boy was supposed to walk along two adjacent sides: $a + b$

Instead, he walked along the diagonal: $\sqrt{a^2 + b^2}$

He saved **half of the longer side**, i.e. $\frac{b}{2}$

$$\text{So, } a + b - \sqrt{a^2 + b^2} = \frac{b}{2}$$

$$\sqrt{a^2 + b^2} = a + b - \frac{b}{2} = a + \frac{b}{2}$$

$$a^2 + b^2 = \left(a + \frac{b}{2}\right)^2$$

$$a^2 + b^2 = a^2 + 2a \cdot \frac{b}{2} + \left(\frac{b}{2}\right)^2$$

$$b^2 = ab + \frac{b^2}{4}$$

$$\frac{3b^2}{4} = ab \Rightarrow \frac{3b}{4} = a \Rightarrow \frac{a}{b} = \frac{3}{4}$$

138) Correct answer: **(1) 15.**

For any polygon: Interior angle + Exterior angle = 180°

Let the **exterior angle** be x

Then, the **interior angle** is $180^\circ - x$

$$\text{Given: } (180-x)-x = 132 \Rightarrow 180 - 2x = 132$$

$$2x = 180-132 = 48 \Rightarrow x = 24^\circ$$

$$\text{Exterior angle} = \frac{360}{n} = 24 \Rightarrow \frac{360}{24} = 15$$

139) Correct answer: 3) 684

Length of the diagonal of the right triangle is 40.

(Pythagorean triplet 24, 32, 40)

The height of the isosceles triangle formed, with 40 as its base is 15.

$$\text{So, area} = \left(\frac{1}{2} \times 32 \times 24\right) + \left(\frac{1}{2} \times 40 \times 15\right) = 384 + 300 = 684 \text{ m}^2$$

140) Final Answer: **(2) 4.5 m**

$$\text{Ceiling area} = \frac{5000}{25} = 200 \text{ m}^2$$

Let the **breadth** = x , so **length** = $2x$.

$$\text{Then, Ceiling area} = x \cdot 2x = 2x^2 = 200 \Rightarrow x^2 = 100 \Rightarrow x = 10 \text{ m} \Rightarrow \text{breadth} = 10 \text{ m}$$

Total area of four walls:

$$\text{Area} = 2 \cdot (\text{length} + \text{breadth}) \cdot \text{height} = 2(20+10)h = 60h$$

$$\text{Wall painting cost} = ₹64800 \text{ at } ₹240/\text{m}^2 \Rightarrow \frac{64800}{240} = 270 \text{ m}^2$$

So, $60h=270 \Rightarrow h = \frac{270}{60} = 4.5$

141) Final Answer: **(2) 45 m³.**

The largest square that can fit inside a circle will have its **diagonal equal to the diameter** of the circle.

Diameter of the base of the cylinder = $2r=3m$

Let the side of the square be s .

Then: Diagonal of square = $s\sqrt{2} = 3 \Rightarrow s = \frac{3}{\sqrt{2}} = \frac{3\sqrt{2}}{2}$

Volume = $\left(\frac{3\sqrt{2}}{2}\right)^2 \times 10 = \frac{9 \times 2}{4} \times 10 = 45m^3$

142) Final Answer: **(2) 2000.**

Since the path is **outside** the garden and is **1 m wide** on all sides:

New **length** = $24+2=26$

New **width** = $14+2=16$

Total area with path = $26 \times 16 = 416 m^2$

Area of the garden = $24 \times 14 = 336 m^2$

Area of the path = $416 - 336 = 80m^2$

Each tile = $0.2 \times 0.2 = 0.04 m^2$

Number of tiles required $\frac{80}{0.04} = 2000$ tiles

143) option 4 Thursday

26th Jan, 1950 means (1949 yr and 26 days)

1600 yr have 0 odd day, 300 yr have 1 odd day 49 yr have (12 leap year and 37 ordinary years)

$\rightarrow (12 \times 366 + 37 \times 365)$

$\rightarrow \text{days} - (4392 + 13505) \text{ days}$

$\rightarrow (17897) \text{ days} = 2556 \text{ weeks} + 5 \text{ days}$

So, 49 yr have 5 odd days and 26 days have 5 odd days.

Total number of odd days = $0 + 1 + 5 + 5 = 11 \text{ days}$

Hence, the day on 26th Jan, 1950 was Thursday.

144) **180 degrees.**

From **8:00 AM to 2:00 PM** is: $2-8=6\text{hours}$

A clock has 360° in 12 hours $\Rightarrow$ Each hour = 30°

Total angle rotated in 6 hours $\Rightarrow 6 \times 30^\circ = 180^\circ$

145) Friday

1979 is **not** a leap year (not divisible by 4)

So, from **Jan 12, 1979 to Jan 12, 1980**, there are **365 days**

$\rightarrow 365 \text{ days} = 52 \text{ weeks} + 1 \text{ day}$

This means the day of the week moves **1 day**

backward. Saturday $\rightarrow$ Friday

146) Let Englishmen be E1, E2 and E3 and

Frenchmen be F1, F2 and F3. Presuming E3 knows

French, so 5 calls are required so that everybody's secret and everybody knows E3's secret. One call would from E1 to E2. Besides this, 3 calls i.e. F1 to F2, F2 to F3 and F1 to F3.

Hence total number of calls = $5 + 1 + 3 = 9$.

147) 200

Number of games in which both the players are girls = GC = 45

$G(G-1)/2 = 45$

$G(G-1) = 90$

$G(G-1) = 10 \times 9$

$G=10$

Similarly, number of games in which both the players are boys = BC2

$BC2 = 190$

$B(B-1)/2 = 190$

$B(B-1) = 380$

$B(B-1) = 20 \times 19$

$B=20$

So, number of games in which one player is a boy and the other player is a girl is $20 \times 10 = 200$

148) option 2 5/36

Probability that A wins = $6/12 = 1/2$ and

Probability that B wins = $4/12 = 1/3$

Now, to win in the series of 3 games, one needs to win two times

If A win, probability = WAX WBX WA = $1/2 \times 1/3 \times 1/2 = 1/12$ and

If B win, probability = WBX WAX WB = $1/3 \times 1/2 \times 1/3 = 1/18$

So, required probability = $1/12 + 1/18 = 5/36$

149) correct answer 2) 9856 sq mt

Distance travelled in 1min 28 sec = Speed * time

Speed = $14.4 \text{ km/hr} = 14.4 \times 5/18 \text{ m/s} = 4 \text{ m/s}$

Distance = $4 \times 88 = 352$

$2 \pi r = 352$

$r = 56$

Area = $\pi r^2 = 22 \times 56 \times 56/7 = 9856$

150) correct answer 1) 16 km

Let the distance travelled on foot be x km. Then, distance travelled on bicycle = $(61 - x)$ km.

So, $\frac{x}{4} + \frac{(61-x)}{9} = 9$

$\Rightarrow 9x + 4(61 - x) = 9 \times 36$

$\Rightarrow 5x = 80$

⇒ $x = 16$ km.

151) The correct answer is: **3) collection**

An "**anthology**" is a **collection** of selected literary pieces, such as poems or short stories, often by various authors but sometimes by a single author, compiled into one volume.

152) The correct answer is: **3) when she was very young.**

The passage states: "*Born in 1830, she began composing verse at the age of eleven...*", which clearly shows she started writing poetry at a young age.

153) The correct answer is: **4) published over nine hundred poems.**

The passage states: "*By the time of her death in 1894, Rossetti had written more than eleven hundred poems and had published over nine hundred of them.*"

154) The correct answer is: **1) the possibility of life on Mars**

The passage mainly discusses the **potential existence of life forms on Mars**, such as bacteria, lichens, and algae, based on comparisons with similar conditions and organisms found on Earth. It presents insights from NASA scientists about where and how life might exist or have existed on Mars.

155) The correct answer is: **1) Villus and space** All the other options — **bacteria, lichen, algae, and microbes** — are mentioned in the passage as **primitive or possible life forms** on Mars. However, "**Villus and space**" is not mentioned at all and does not relate to known primitive life forms.

156) The correct answer is: **2)**

This statement is **not true** according to the passage. The scientists are interested in **photographing Martian lake beds**, not craters, to search for signs of life. The passage specifically mentions that researchers are compiling a list of **Martian lake beds** to photograph for evidence of algae or other life, not craters.

157) The correct answer is: **2) Absence of enthusiasm in the buyers as well** According to the passage, "**if you can't sell with enthusiasm the lack**

of it will be infectious." This means **salesperson's lack of enthusiasm will spread to the customer**, turning them off and reducing the likelihood of a sale.

158) The correct answer is: **3) The better the image is, the higher your product will sell**

This is a valid answer based on the passage. While option 2 is also important, **option 3 aligns more directly with the main point in that paragraph** — the **impact of product image on sales**.

159) The correct answer is: **4) The product can be thoroughly known only by knowledge of both.**

This clearly means that **both the intangible (e.g., benefits, image, perception)** and the **mechanical (e.g., how it works)** features are essential for thoroughly understanding the product and selling it effectively.

160) **Answer: 2) The lack of faith in the product capacity.** The author explains that the home computer industry initially struggled because of an **image problem**. Although computers **saved time and simplified tasks**, they **appeared complicated and difficult to use**. This made potential buyers **doubt their ease of use and usefulness**—in other words, they **lacked faith in the product's capacity** to be helpful and user-friendly.

161) The correct answer is: **3) A & C**

A (Economists accomplish a great deal through their language): The passage says, "*Figures of speech are not mere frills. They think for us.*" and highlights the power and responsibility carried by the language economists use. Also, rhetoric is described as the means by which economists persuade others. So, economists accomplish a lot through their language. **C (Economics has a great impact on others' lives):** The passage explains that economists' conversations are not just academic; they affect many people's lives on a large scale, illustrated by the joke about economists causing damage.

162) The correct answer is: **4) Commands given by army officers.** Rhetoric means using language to persuade or influence people. Election speeches, ads, plays, and songs try to convince, entertain, or

move an audience, so they use rhetoric. But army officers' commands are direct orders meant to be followed, not to persuade. So, commands have the least rhetoric.

163) The correct answer is: **3) Economists tend to use terms unfamiliar to the lay person, but depend on familiar linguistic forms.**

The phrase "*The culture of the conversation makes the words arcane*" means that the way economists talk (their specialized culture and language) makes their words seem mysterious or hard to understand (arcane) to outsiders. However, underneath, their language uses familiar forms like metaphors and analogies.

Option 3 captures this idea best — economists use terms unfamiliar to non-economists but still rely on familiar types of language.

164) The correct answer is: **1) Mysterious**

The word **arcane** means something **known or understood by very few; mysterious or obscure**. This fits best with option 1, **Mysterious**.

165) The correct answer is: **3) Both views use rhetoric to persuade.**

The passage discusses how economists—and by extension, scholars and scientists—use rhetoric, the art of persuasion, in their communication. It doesn't claim one view is superior because of rhetoric, nor does it say scientists should avoid rhetoric. Instead, it emphasizes that rhetoric is a natural and essential part of scholarly conversation, used to persuade others regardless of the idea.

166) The correct answer is: **3) especially those who are comfortably off think that what one gets is what one deserves**

The passage states that many people, especially those who are comfortably off, believe that people get what they deserve — that hardworking people don't face want and poverty is due to bad character or laziness. This matches option 3.

167) The correct answer is: **5) Ambitious**

The passage lists people who become rich quickly as **hard, grasping, selfish, cruel**, and clever enough not to overreach themselves. It does not mention **ambitious** people specifically.

168) The correct answer is: **3) Extraordinary talent**
The passage says that generous and public-spirited people tend to stay poor unless they have **extraordinary talents**. So, to become rich, they need extraordinary talent.

169) The correct answer is: **2) The present system of distribution of wealth is biased in favour of rich.** The author argues that the current system **does not distribute wealth according to merit** and instead makes a few idle people very rich while many hardworking people remain poor, indicating bias in favor of the rich.

170) The correct answer is: **2) Drug Addiction** The passage lists **idleness, extravagance, drink (alcoholism), betting (gambling), and bad character** as vices attributed to the poor by the rich. It does not mention **drug addiction**.

171) The most appropriate option to fill in blank no.

1 is: **2) undertake** The sentence is asking: "Do women ___ leadership differently than men do?" The verb needs to express **taking on or performing leadership**.

Undertake means to take on or begin something, which fits well here.

172) The most appropriate option to fill in blank no.

2 is: **2) succeed**. Here, the meaning is about feminine leadership **being successful** where other leadership styles are not. **Succeed** fits perfectly in this context.

173) The most appropriate option to fill in blank no.

3 is: **3) masculine**. The contrast is between **feminine** and **masculine** leadership styles, so **masculine** fits perfectly here.

174) The most appropriate option to fill in blank no.

4 is: **5) outdo**. The phrase means female managers **perform better than** their male counterparts. **Outdo** means to perform better than someone else, which fits perfectly here.

175) 4) counterparts

Counterparts refers to people holding the same position or function, which fits perfectly here when comparing male and female managers.

176) The most appropriate option to fill in blank no. 6 is: **4) similar**. This implies that despite having similar traits or qualities, female managers perform better—making "**similar**" the most logical and grammatically appropriate choice.

177) The most appropriate option to fill in blank no. 7 is: **3) gender**. **Gender bias** is a well-known term that refers to unfair differences in treatment based on gender, especially in the workplace.

178) 1) variations

Variations logically refers to the differences in outcomes or behavior observed between men and women in leadership roles.

179) The most appropriate option to fill in blank no. 9 is: **5) central**
Central means "of primary importance," which fits perfectly here.

180) The most appropriate option to fill in blank no. 10 is: **1) contradictory**
The passage presents **two opposing theories** — structuralist and socialization. Since they **conflict** in explanation, calling them "**contradictory explanations**" is accurate.

181) The correct synonym for **MENDACIOUS** is: **4) false**.
Mendacious means **lying, untruthful, or habitually dishonest**. It describes someone who is **not telling the truth**.

182) The correct synonym for **PERNICIOUS** is: **2) baneful**

Pernicious means **highly harmful, destructive, or deadly**, especially in a gradual or subtle way.
Baneful also means **causing harm, destructive, or deadly**—making it the closest synonym.

183) The correct synonym for **RIGMAROLE** is: **2) hokum**.
Rigmarole refers to a **long, rambling, and confusing or meaningless talk or procedure**.

Hokum means **nonsense or meaningless** **ceremonial speech**—making it the closest synonym.

184) The correct synonym for **OSTRACIZED** is: **5) Exclude**. **Ostracized** means **to exclude someone from a society, group, or community**, often as a form of punishment or social rejection. **Exclude** is the closest in meaning — **to shut out or keep out**.

185) The correct synonym for **BUOYANT** is: **1) optimistic**. **Buoyant** means cheerful, lively, or able to stay afloat — figuratively, it means **optimistic** or positive in attitude. **Optimistic** fits as the nearest meaning.

186) The correct antonym for **RETRIBUTION** is: **1) Forgiveness**.
Retribution means punishment or payback for a wrongdoing. The opposite would be **forgiveness**, meaning pardon or letting go of punishment.

187) The correct antonym for **ABOMINATE** is: **1) Love**
Abominate means to hate or detest something strongly. Its opposite would be **love**, meaning to feel deep affection or strong liking.

188) The correct antonym for **SANGUINE** is: **4) gloomy**. **Sanguine** means optimistic or hopeful. The opposite is **gloomy**, meaning pessimistic or sad.

189) The correct antonym for **CHIMERICAL** is: **2) real**.
Chimerical means wildly fanciful or imaginary. The opposite is **real**, meaning actual or existing in reality.

190) The correct antonym for **VERBOSE** is: **1) laconic**.
Verbose means using more words than needed; wordy. **Laconic** means using very few words; concise.

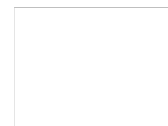

191) the error is in part 1.

the verb "**discuss**" does **not** take the preposition "**about**". We say "discuss the problem," **not** "discuss about the problem."

Correct sentence:

"We discussed the problem so thoroughly..."

192) the error is in **part 3**.
the phrase "**got drowned**" is incorrect. Ships **do not drown**; they **sink**. "Drown" is used for living beings who suffocate underwater.

193) Error is in part 2.

the phrase "**put up in a hotel**" is incomplete or incorrect. Correct phrase is "**put up at a hotel**" or "**stay in a hotel.**"

194) Error is in part 4.

the phrase "**went down his doom**" is incorrect or awkward. The correct phrase should be "**went down to his doom**" or simply "**met his doom.**"

195) Error is in part 2.

"**the most interesting book**" should be plural because it is part of the phrase "**one of the most interesting books**" (plural).

196) Answer: 3) adjective

Here, "**last**" describes **which encounter** — it's specifying the final one. So, "**last**" is used as an **adjective** (it modifies the noun "encounter").

197) Answer: 4) conjunction

"**Lest**" functions as a **conjunction** here (it connects the main clause with the subordinate clause explaining the reason or fear).

198) Answer: **Answer: 2) pronoun**

Here, "**that**" introduces a relative clause "**that could never be curbed.**" It refers back to "ambition." So, "**that**" is used as a **pronoun** (a relative pronoun).

199) Answer: 3) preposition

Here, "**about**" is used to show relation — it links "telling" to "you" indirectly. It functions as a **preposition**.

200) Answer: 2) adverb

Here, "**continuously**" describes how it has rained — it modifies the verb "rained," so it is an **adverb**.
