

Section 1 Logic

Q1. Puja is the mother-in-law of Sunita who is the wife of Rohit. Rohit whose father is Gajanan, is the father of Rupali. Dhanashree is the daughter of Puja.

Find how Puja is related to Rupali?

- 1) Grandson
- 2) Grandmother
- 3) Granddaughter
- 4) Aunt
- 5) Mother-in-law

Q2. In a class, Samiksha ranks 12th from the top. Divya is 12 ranks ahead of Medha and 5 ranks behind Samiksha. Reshma who is 7th from the bottom is 29 ranks behind Medha.

How many students are there in class?

- 1) 61
- 2) 57
- 3) 66
- 4) 63
- 5) 64

Q3. There are 80 students admitted to a music school. Some students can play only violin, and some can play only harmonium. 20 children can play both violin and harmonium. If the number of students who can play violin is 30, then how many students can play harmonium? Also, how many students can play only harmonium and how many can play only violin?

- 1) 70, 50 and 10 respectively
- 2) 60, 45 and 12 respectively
- 3) 65, 50 and 15 respectively
- 4) 68, 48 and 10 respectively
- 5) 72, 45 and 11 respectively

Q4 Given below are two statements, one is labeled as assertion (A) and, other one labeled as Reason (R).

Assertion (A): Sound travel slower in gases than in solids.

Reason (R): Gases have a lower density than solid.

In the light of above statements, choose the correct option from given below.

- 1) Both (A) and (R) are true and (R) is correct explanation of (A)

2) Both (A) and (R) are true but (R) is not the correct explanation of (A)

3) (A) is true but (R) is false

4) (A) is false but (R) is true

5) Both (A) and (R) are false

Q 5 Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statements.

Statement: The travel organization has abandoned the hill trip.

Assumption I: trip wasn't profitable for the travel organizer

Assumption II: unsatisfactory climate led to the abandonment of the trip.

Choose the correct option below.

- 1) Only assumption I is follows
- 2) Only assumption II is follows
- 3) Neither assumption I nor Assumption II follows
- 4) Either assumption I or II is follows
- 5) Both assumption I and II is follow

Q6 If all the letters of the word 'ALLITERATION' are arranged in the alphabetical order, then the position of how many letters will remain unchanged?

- 1) None
- 2) One
- 3) Three
- 4) Two
- 5) More than three

Q7 In a certain coding system, 'rbm std bro pus' means 'the puppy is beautiful', 'tnh pus dim std' means 'the sparrow is red', 'pus dim bro pus cus' means 'the sparrow has the puppy'. What is the code for 'has'?

- 1) Dim
- 2) Pus
- 3) Bro
- 4) Std
- 5) cus

Q 8 If INSTITUTE is coded as 9510292325, then the GOVERNMENT is coded as

- 1) 5672985143
- 2) 5532432892
- 3) 5432876852

- 4) 7645954552
5) 75387127590

Q9 Rajesh is two years older than Riyansh, who is twice as old as Kailash. If the total of ages of Rajesh, Riyansh and Kailash are 37, then how old is Riyansh?

- 1) 12
- 2) 11
- 3) 14
- 4) 20
- 5) 16

Q10 In the following series, find which of the given numbers is wrong and does not follow the pattern:

21 105 525 2615 13125 65625

- 1) 13125
- 2) 525
- 3) 65625
- 4) 2615
- 5) 105

Q11 In a certain code language, INSTITUTE is written as EOTUJUVUI. How will MEDICOVER be written that code language?

- 1) RFFDJJO FM
- 2) RFOJDFIFM
- 3) MFFJDJODR
- 4) ROJDJFFSM
- 5) RFEJDPWFM

Q12 In the following question, a set of words has been given out of which four are similar and one different. Choose out the odd one

- 1) Phi
- 2) Gamma
- 3) Delta
- 4) Peso
- 5) Beta

Q13 N is to the east of E, G is to the South of E and L is to the West of G. N is in which direction with respect to L?

- 1) South West
- 2) North West
- 3) South East
- 4) North East
- 5) South

Q14-18 These questions are based on the following information, read the comprehension carefully and answer the questions.

In a classroom there are two rows of chairs there are six seats in each row of five people. In row -1 Ramesh, Sunil Rajesh, Rohit and Sandeep are facing South. In row 2 Suresh, Amman, yash, omkar and Raj are facing north but not necessarily in the same order

Ramesh is sitting second to the right of Rajesh while Sunil is sitting at corner. One of the two vacant seats is in one of the corners. Rohit is sitting immediately right to Sandeep. Ramesh and omkar are related in the same manner as Aman and Rohit are related. Sunil is sitting in front of Raj. Suresh is not sitting with Aman. The person who is sitting in front of Aman, is immediately left to the Sunil. Sandeep is sitting diagonally opposite to Raj.

Who is sitting next to suresh?

- 1) Aman
- 2) Yash
- 3) Both yash and aman
- 4) Raj
- 5) Sunil

Q15 Who among the following is sitting immediately next to one of the vacant seat?

- 1) Ramesh
- 2) Omkar
- 3) Rajesh
- 4) All Ramesh, Omkar and Rajesh
- 5) Sandip

Q16 select the pair which sits in front of vacant seats

- 1) Yash- Rajesh
- 2) Suresh- sandeep
- 3) Sandip – yash
- 4) Raj – sandeep
- 5) Yash – rohit

Q17 Who sits immediately next to Rajesh?

- 1) Yash
- 2) Ramesh
- 3) Rohit
- 4) Sandip
- 5) Suresh

Q18 which of the following pair sit opposite to each other

- 1) Ramesh- Aman
- 2) Sunil – yash
- 3) Sunil – yash, sandip- Raj

- 4) Sandip- Raj 5)
5) Rohit- suresh, sunil- omkar

Q19 If '+' means '÷', '÷' means '-', '-' means '×' and '×' means '+', then $10+5\div3-2\times9$ is equal to

- 1) 6
2) 8
3) 7
4) 10
5) 5

Q20 Look carefully for the pattern and then choose which number comes next

20, 110, 210, 320,

- 1) 454
2) 452
3) 440
4) 461
5) 425

Q21 When a word and number arrangement machine is given an input line 10 words and numbers, it arranges them following a particular rule. The following is an illustration of input and the rearrangement

INPUT-3846 9231 7283 4731 8152 3285

STEP 1-3468 1239 2378 1347 1258 2358

STEP II- 1239 1258 1347 2358 2378 3468

STEP III-23 25 34 35 37 46

STEP IV-5 7 7 8 10 10

Step IV is the last step of the rearrangement. As per the rules followed in the above steps, find out in each of the following questions the appropriate steps for the given input.

Input: 7925 4758 2538 5628 8561 7426 3625 6245

What will addition of the numbers which is second, forth, sixth and eight from the left end in step IV

- 1) 32
2) 23
3) 38
4) 40
5) 28

Q22 Ram walks 5 km towards South and then turns to the right. After walking 6 km he turns to the left and walks 4 km. Now in which direction is he from the starting place?

- 1) West
2) South
3) North East
4) South West
5) North

Q 23 Look carefully for the pattern, and choose which pairs of numbers comes next.

12 16 78 22 26 78 32

- 1) 36 78
2) 38 75
3) 35 77
4) 36 75
5) 37 79

Q24 Sushil is taller than Aniket and Rahil is taller than Chaitanya but shorter than Vishal. Sushil is shorter than Chaitanya so who is the tallest among them?

- 1) Chaitanya
2) Sushil
3) Vishal
4) Aniket
5) Rahil

Q25 If Neetu says, "Priya's father Omkar is the only son of my father in law Chandrakant", then how is Ruchi, who is sister of priya, related to Chandrakant?

- 1) Niece
2) Daughter
3) Wife
4) Daughter in law
5) Granddaughter

Q 26 Boldly study the following information carefully and answer the questions given below.

Eight cars viz. H1 H2, H3, H4, H5, H6, H7 and H8 are parked in two parallel rows namely Yellow line and Blue line facing towards north such that the car standing in the Blue line faces the back side of the car standing in front of it in Yellow line. Equal number of cars stand in both the rows.

H3, stands second to the left of H4, which does not stand at any extreme end. H1 and H4 stand in different rows,. H5 is third to the right of H2. H8 does not stand at any of the extreme ends. H7, which stands in Blue line is opposite to H1.

Four of the following five are alike in a certain way and thus form a group. Which of the following does not belong to the group?

- 1) H2
2) H3
3) H6
4) H8
5) H5

Q27 Which of the following cars is parked opposite to H4

- 1) H3

- 2) H8
- 3) H5
- 4) H1
- 5) H2

Q28) Which of the following car is not parked in yellow line

- 1) H6
- 2) H2
- 3) H1
- 4) H5
- 5) H8

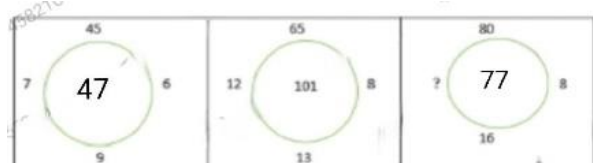

Q29 What is the position of H4 with respect to H3

- 1) Immediate left
- 2) Second to the left
- 3) Second to the right
- 4) Immediate right
- 5) Both are in different rows

Q30 Which of the following car stands opposite to H6

- 1) H1
- 2) H5
- 3) H7
- 4) H4
- 5) H2

Q31 find the alternative which will replace question mark

- 1) 12
- 2) 14
- 3) 5
- 4) 9
- 5) 3

Q32 if North is replaced by South East then east will be replaced by which of the following direction?

- 1) North East
- 2) South East
- 3) South West
- 4) North West
- 5) South

Q33 Find the odd one from the given data

APS, EBT, IRP, OTQ, PST

- 1) APS
- 2) EBT
- 3) IRP

- 4) OTQ
- 5) PST

Q34 Find the odd one out

Kohima, imphal, indoor, Ranchi, Jaipur

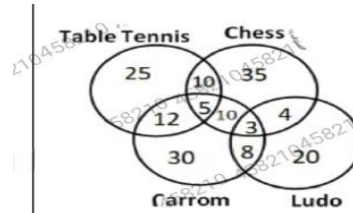

- 1) Indore
- 2) Jaipur
- 3) Kohima
- 4) Ranchi
- 5) Imphal

Q35 Ally: foe:: Admit:

- 1) Repudiate
- 2) Plaint
- 3) Humorous
- 4) Indiscreet
- 5) Tedious

Q36 The following diagram shows the number of people who play table tennis, Chess, Carrom and Ludo.

If the total number of people is 600 Then what is the number of people who play Chess and Ludo but not carom.

- 1) 3
- 2) 4
- 3) 10
- 4) 8
- 5) 5

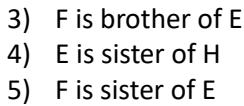

Q37 How many odd digits are there in the following series of digits, each of which is immediately preceded by an even digit, but not immediately followed by an odd digit?

728913457589691824926

- 1) 1
- 2) 2
- 3) 4
- 4) 3
- 5) 5

Q38 If 'P+Q' means P is brother of Q 'P*Q' means P is sister of Q, P-Q means P is mother of Q and 'P@Q' means P is father of Q then which of the following is correct about E+F@G*H?

- 1) G is the mother of H
- 2) G is the daughter of F

- 3) F is brother of E
- 4) E is sister of H
- 5) F is sister of E

- 1) GLRCPCQR
- 2) BWKXUAA
- 3) GYQQGML
- 4) SSHXXHLH
- 5) GWPPNCV

- 1) 103
- 2) 129
- 3) 156
- 4) 98
- 5) 132

Seven boxes are placed one above other, but not necessarily in the same order. Each of them is containing different food items. Box F does not contain biscuits. Box L is not placed above box G. The box which contains chocolate is placed immediately below box F. There are two boxes placed between box G and the box which contains chocolates. Box G is not placed above the box which contains chocolate. The box which contains burger is placed below box G. Three boxes are placed between box M and the box which contain burgers. The box which contains laddus is placed immediately below box M. The box which contains samosas is placed immediately below box H. only one box is placed between box L and box P. Neither box L nor box F contains momos. Box P does not contain samosa. Box H contains neither momos nor dry fruits. The box which contains biscuits is not placed at the top. Box I does not contain biscuit .

- 1) P
- 2) H
- 3) G
- 4) L

- 1) 2
- 2) 3
- 3) 4
- 4) 1
- 5) 5

- 1) H
- 2) G
- 3) L
- 4) P
- 5) I

- 1) The box which contains burger
- 2) M
- 3) The box which contains biscuits
- 4) G
- 5) I

- 1) M
- 2) I
- 3) G
- 4) H
- 5) F

- 1) 1
- 2) 2
- 3) 3
- 4) 4
- 5) 5

- 1) 6
- 2) 12
- 3) 9

-
- 4) 10
 - 5) 11

Q48 If in the number 546839271, 1 is added to 1st 3rd 5th 7th and 9th digit and 1 is subtracted from the 2nd 4th 6th and 8th digits then all digits are arranged in descending order from left to right which of the following digit is 4th from the right end?

- 1) 7
- 2) 6
- 3) 3
- 4) 4
- 5) 5

Q 49 Choose the word that best complete the comparison.

Particular: fussy :: _____ : subservient

- 1) Meek
- 2) Above
- 3) Cranky
- 4) Uptight
- 5) Clever

Q 50 If laptop is called fan, basket is called laptop, lift is called basket, fan is called book, and the book is called lift, which of the following is used to go on the upper floor of the building.?

- 1) Laptop
- 2) Basket
- 3) Book
- 4) Fan
- 5) Lift

Q 51 Look carefully for the pattern and then choose which pair of numbers comes next

4 7 26 10 13 20 16

- 1) 14 4
- 2) 14 17
- 3) 18 14
- 4) 19 13
- 5) 19 14

Q52 which word does **not** belong with the others.

- 1) Ignore
- 2) Shrugg off
- 3) Spurn
- 4) Disregard
- 5) Bloom

Q53 Find the word that names a necessary part of the underlined word

VIBRATION

- 1) Motion

- 2) Electricity
- 3) Science
- 4) Sound
- 5) Electron

Q 54 find out which of the answer choices completes the same relationship

Yard is to inch as quart is to

- 1) Gallon
- 2) Ounce
- 3) Milk
- 4) Liquid
- 5) Solid

Q55 find the word that completes the bottom row of words

Rule command dictate

Doze sleep _____

- 1) Snore
- 2) Govern
- 3) Awaken
- 4) Hibernate
- 5) Stringent

Q 56 Here are some words translated from an artificial language.

Tam ceno means sky blue

Cenorax means blue cheese

Aplmitl means star bright.

Which word could mean " bright sky".

- 1) Cenotam
- 2) Mitltam
- 3) Raxmitl
- 4) Aplceno
- 5) Paexr

Q 57 Erratic Behavior occurs when an individual acts in a manner that lacks consistency, regularity, and uniformity. Which situation below is the best example of Erratic Behavior?

- 1) Fatima cannot contain her anger whenever the subject of local politics is discussed.
- 2) Viraj has just been told that he is being laid off. Before leaving his supervisor's office, he punches a hole in the door.
- 3) Rugved has visited the dealership several times, but she still cannot decide which car to buy.
- 4) In the past month, Sagar, who has been a model employee for three years, has repeatedly called in sick, forgotten important meetings, and been verbally abusive to colleagues.

5) Shreya cannot control her emotions whenever students discuss about Indian army.

Q 58 There are 23 steps to reach a temple. On descending from the temple, Ram takes two steps in the same time Shyam ascends one step. If they start to work simultaneously, at which step will they meet each other from the bottom?

- 1) 8th
- 2) 10th
- 3) 9th
- 4) 11th
- 5) 15th

Q59 The film director Raturaj wants an actress for the lead role of Rosy who perfectly fits the description that appears in the original screenplay. He is not willing to consider actresses who do not reassemble the character as she is described in the screenplay, no matter how talented they are. The screenplay describes Rosy as an average sized 40 something redhead, with deep brown eyes, very fair skin and a brilliant smile. The casting agent has four actresses in mind.

- 1) Veena is a stunning red-haired beauty who is 5'9" and in her mid twenties. Her eyes are brown and she has an olive complexion.
- 2) -Rajani has red hair, big brown eyes, and a fair complexion. She is in her mid-forties and is 5'5".
- 3) Puja is 5'4" and of medium build. She has red hair, brown eyes, and is in her early forties.
- 4) Sulbha is a blue-eyed redhead in her early thirties. She's of very slight build and stands at 5'.

Which two actresses should the casting agent send to meet the director?

- 1) Veena, Rajni
- 2) Rajani, Puja
- 3) Veena, Sulbha
- 4) Rajni, Sulbha
- 5) Puja, Sulbha

Q 60 Statement I. Arun has four vehicles.

Statement II: Two of the vehicles are red.

Statement III: One of the vehicles is a minivan. If the first three statements are facts which of the following statements must also be a fact.

- 1) Arun has a red minivan
- 2) Arun has 3 cars
- 3) Arun's favourite colour is red

- 1) Only I
- 2) Only II

3) II and III

4) III ONLY

5) None of the statements is known.

Q 61 4 defensive football players are chasing the opposing wide receiver who has the ball. Amol is directly behind the ball carrier. Jeet and Neeraj are side by side behind a ball. Nikhil is behind Jeet and Niraj. Amol tries for the tackle but misses and falls. Neeraj trips. Which defensive player tackles the receiver.

- 1) Niraj
- 2) Nikhil
- 3) Jeet
- 4) Amol
- 5) Rohit

Q62 At the football game Hemant was sitting in seat 253. Manoj was sitting to the right of Hemant in seat 254. In the seat to the left of Hemant was Gopal. Iqbal was sitting to the left of Gopal. Which seat is equal sitting in?

- 1) 251
- 2) 257
- 3) 256
- 4) 255
- 5) 252

Q 63 - 64 A weekly television show routinely stars six actors. Jeevan, Karan, Lalit, Manish, Nishant, and Omkar. Since the show has been on the air for a long time, some of the actors are good friends and some do not get along at all. In an effort to keep peace, the director sees to it that friends work together and enemies do not. Also, as the actors have become more popular, some of them need time off to do other projects. To keep the schedule working, the director has a few things she must be aware of

- 1) Neevan will only work on episodes on which Manish is working
- 2) Nishant will not work with Karan under any circumstances
- 3) Manish can only work every other week in order to be free to film a movie.
- 4) at least three of the actors must appear in every weekly episode.

In a show about Lalit getting a job at the same company Jeevan already works for and Karan used to work for, all three actors will appear. Which of the following is true about the other actors who may appear.

-
- 1) manish nishant and omkar must all appear
 - 2) manish may appear and nishant must appear
 - 3) manish must appear and omkar may appear
 - 4) omkar may appear and nishant may appear
 - 5) only omkar may appear

Q64 Next week the show involves nishanth's new car and omkar's new refrigerator which of the following is true about the other actors who may appear?

- 1) Manish jeevan lalit and Karan all may appear
- 2) Jeevan lalit and karan must appear
- 3) Only karan may appear
- 4) Only lalit may appear
- 5) Lalit and karan must appear.

Q65 - 67

At a small company, parking spaces are reserved for the top executives: CEO, president, vice president, secretary, and treasurer-with the spaces lined up in that order. The parking lot guard can tell at a glance if the cars are parked correctly by

Looking at the colour of the cars. The cars are yellow, green, purple red. and blue, and the executives' names are Ajay, Bipin, Chetan, Damodar, and Erik

- the car in the first space is red
- a blue car is parked between the red car and the green car
- The car in the last space is purple
- the secretary drives a yellow car
- ajay's car is parked next to damodar's
- Erik drives a green car
- Bipin's car is parked between chetan's and erik's
- damodar's car is parked in the last space

Which color is vice president's car?

- 1) Green
- 2) Yellow
- 3) Blue
- 4) Purple
- 5) Red

Q66 who is the CEO

- 1) Ajay
- 2) Bipin
- 3) Chetan
- 4) Damodar
- 5) Erik

Q67 who is secretary?

- 1) Erik
- 2) Damodar
- 3) Chetan
- 4) Bipin

5) Ajay

Q68-72 5 roommates ranjita, sanjana, Teena, ujjwala, and vajita each do one of housekeeping task.—Mopping sweeping laundry, vacuuming or dusting. One day a week Monday to Friday.

- Vijita does not vacuum and does not do her task on Tuesday
- sanjana does the dusting and does not do it on monday or Friday
- The mopping is done on Thursday
- Tina does her work which is not vacuuming on Wednesday.
- The laundry is done on Friday and not by ujjwala
- Ranjeeta does her task on Monday

When does Sanjana do dusting?

- 1) Friday
- 2) Monday
- 3) Tuesday
- 4) Wednesday
- 5) Thursday

Q69 what task does tina do on Wednesday?

- 1) Vacuuming
- 2) Dusting
- 3) Mopping
- 4) Sweeping
- 5) Laundry

Q 70 What day is vacuuming done?

- 1) Friday
- 2) Monday
- 3) Tuesday
- 4) Wednesday
- 5) Thursday

Q 71 what task does vajita do?

- 1) Vacuuming
- 2) Dusting
- 3) Mopping
- 4) Sweeping
- 5) Laundry

Q72 what day does ujjwala do her task?

- 1) Monday
- 2) Tuesday
- 3) Wednesday
- 4) Thursday
- 5) Friday

Q 73 How many meaningful words can be formed using the 3rd 4th 6th and 7th alphabet of the word "PUBLICATIONS".

- 1) One
- 2) Two
- 3) None
- 4) More than three
- 5) Three

Q 74 Given below are two statements, one is labelled as Assertion (A) and the other labelled as reason (R)
Assertion (A): Steel is used in the construction off buildings and bridges.

Reason (R): Steel is more elastic and its elastic limit is high.

Choose the correct option

- 1) Both A and R are true and R is the correct explainaination of A
- 2) Both A and R are true but R is not the correct explainaination of A
- 3) A is correct but R is false
- 4) A is incorrect but R is correct
- 5) Bot A and R are not correct

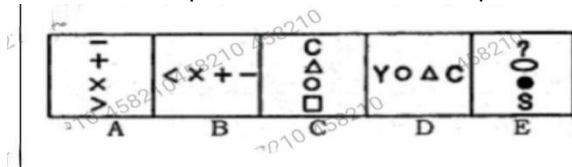

Q 75 Forest fires feed on decades-long accumulations of debris and leap from the tops of young trees into the branches of mature trees. Fires that jump from treetop to treetop can be devastating. In old-growth forests however, the shade of mature trees keeps thickets of small trees from sprouting, and the lower branches of mature trees are too high to catch the flames.

The paragraph best support the statement.

- 1) Forest fire damage is reduced in old growth forests
- 2) small trees should be cut down to prevent forest fire
- 3) Mature trees should be thinned out to prevent forest fires
- 4) Forest fires do the most damage in old growth forests
- 5) old growth forests have a larger accumulation of forest debris

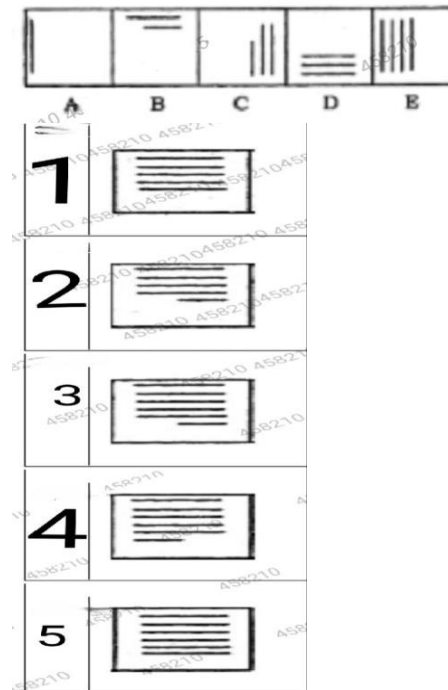

Section 2 Abstract reasoning

Q 76 which shapes come next in the sequence.

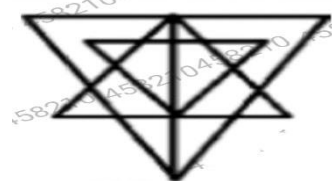

- 1)
- 2)
- 3)
- 4)
- 5)

Q77 which shape comes next in the series

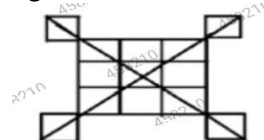

Q78 Find the number of triangles in the following figure

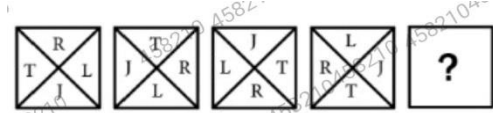

- 1) 27
- 2) 25
- 3) 23
- 4) 21
- 5) 29

Q79 Find the number of triangles in the following figure

- 1) 20
- 2) 24
- 3) 28
- 4) 29
- 5) 32

Q 80 select which figure ill come in the next following series

- 1
- 2
- 3
- 4
- 5 Can not be determined

Q 81 Find the number of triangles in the given figure

- 1) 12
- 2) 18
- 3) 22
- 4) 26
- 5) 28

Q82 SELECT the correct mirror image of the given figure hen the mirror is placed to the right of figure

6 4 E K P C 9 2

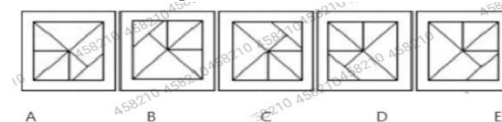

1	2 9 C P K E 4 6
2	2 9 C P K E 4 6
3	2 9 C P K E 4 6

5	Can not be determined

Q 83 from the following, choose the alternative that correctly represents the water image of the word

NUCLEAR

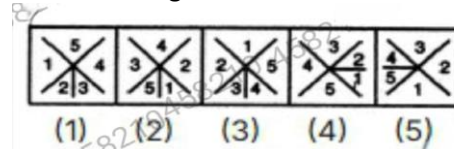

1	RAELGCUH
2	NUCLEAR
3	NUCLGAV
4	NUCLGAV
5	No one from the above

Q 84 which figure is the odd one out

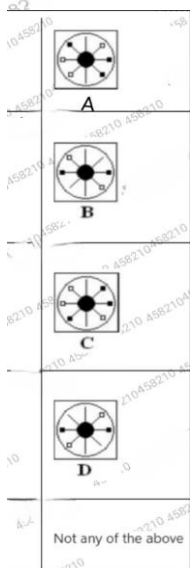

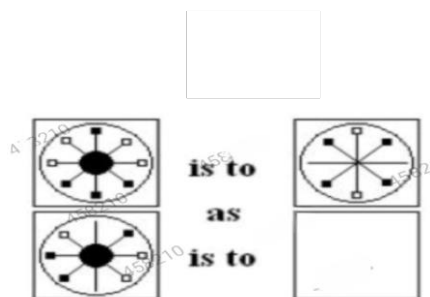

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

Q 85 which figure is the odd one out

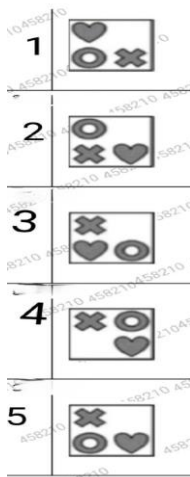

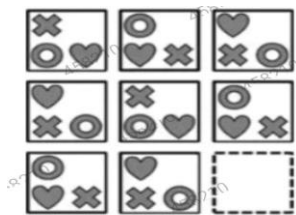

- 1) 1
- 2) 2
- 3) 3
- 4) 4
- 5) 5

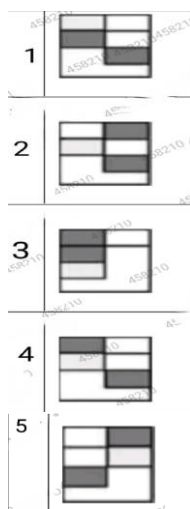

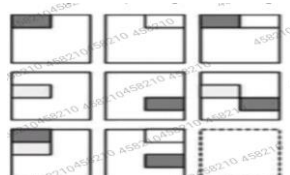

Q 86 Which figure completes the statement?

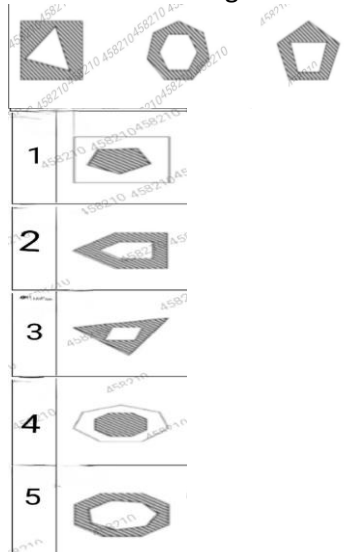

Q 87 choose from the figure which figure completes the series below?

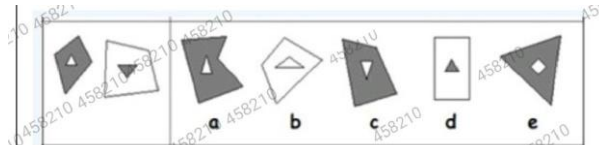

Q 88 choose from the option which figure completes the series below

Q 89 choose the figure that follows the pattern

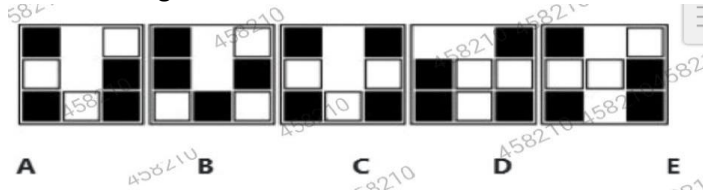

Q 90 which shape or pattern on the right belong to the two on the left

- 1) A
- 2) B
- 3) C
- 4) D
- 5) E

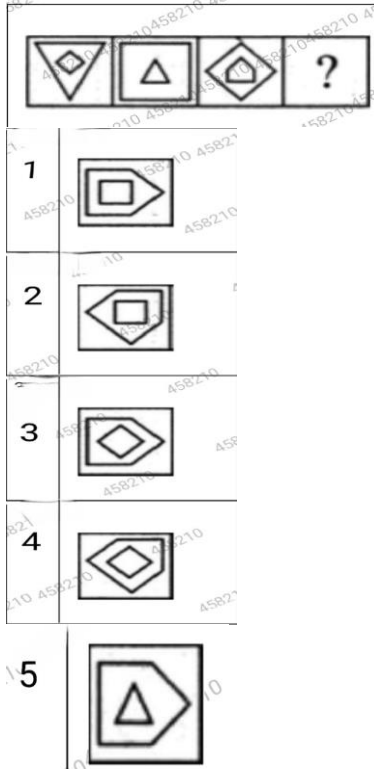

Q91 which figure is odd one out

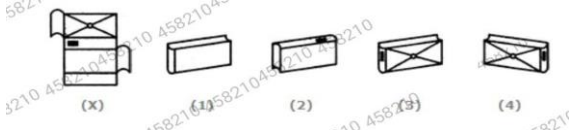

- 1) E
- 2) A

- 3) B
4) D
5) C

Q 92 complete the series

Q 93 which of the following finished patterns can be obtained from a piece of cardboard shown below?

- 1) 1
2) 2
3) 3
4) 4
5) None of the above

Q94 which of the following three out of five alternative figures hen fitted into each other could form a complete square

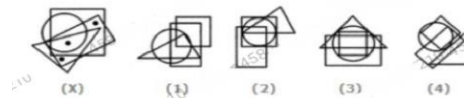

- 1) 1,2,4
2) 3,4,5
3) 1,2,3
4) 1,3,5
5) 5,2,4

Q 95 which of the following three out of five alternative figures hen fitted into each other could form an equilateral triangle.

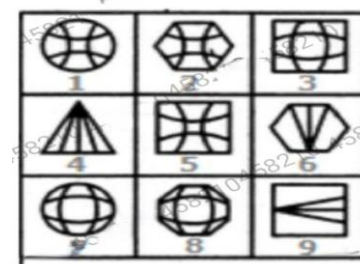

- 1) 4, 3, 2
2) 2, 4, 5
3) 1, 3, 4
4) 3, 4, 5
5) 2, 4, 5

Q 96 select the figure which satisfies the same condition of placement of the dot as in figure X

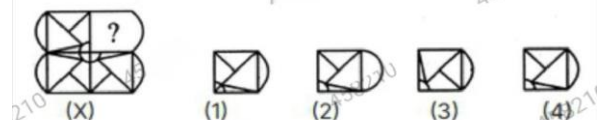

- 1) 1
2) 2
3) 3
4) 4
5) None of the above

Q97 group the given figure into three lasses using each figure only once.

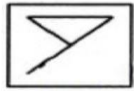

- 1) 1,2,5 ; 3,7,8 ; 4,6,9
2) 1,7,2 ; 3,9,6 ; 4,5,8
3) 2,3,8 ; 4,6,9 ; 1,5,7
4) 5,6,9 ; 3,4,1 ; 2,7,8
5) 4,5,8 ; 2,3,1 ; 9,7,8

Q 98 identify the figure that complete the series

- 1) 1
2) 2
3) 3
4) 4
5) All correct

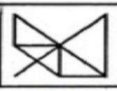

Q99 find out the alternative figure that contains figure (x) as it parts

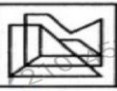

(X)

(1)

(2)

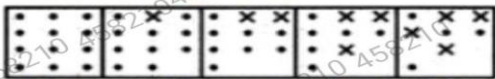

(3)

(4)

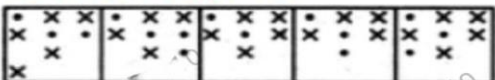

- 1) 1
- 2) 2
- 3) 3
- 4) 4
- 5) None of the above

Q 100 select a figure which from amongst the answer figures which will continue the same series as established by the five problem series

(A) (B) (C) (D) (E)

Answer Figures:

(1) (2) (3) (4) (5)

Section 3 Quants

Q 101 Two trains P and Q start simultaneously in the opposite direction from two points A and B and arrive at their destinations 25 and 16 hours respectively after their meeting each other. At what speed does the second train Q travel if the first train travels at 100 km/h?

- 1) 100
- 2) 125
- 3) 120
- 4) 140
- 5) 115

Q102 The sum of present ages of Anish, Ajay and Anvit is 75 years. If 5 years ago the ratio of their ages was 3:4:5. What is the present age of Ajay?

- 1) 65
- 2) 28
- 3) 32
- 4) 44
- 5) 25

Q 103 Amit cycled from his house to the garden at speed of 12 km/hr and came back to his house at the speed of 6 km/hr. if the total time taken by Amit to complete the journey was 6 hours, then find the distance between Amit's House and garden?

- 1) 32
- 2) 28

- 3) 24
- 4) 36
- 5) 40

Q 104 What is the probability of getting a red numbered card greater than 6 from a well shuffled deck of 52 cards?

- 1) $\frac{4}{13}$
- 2) $\frac{2}{13}$
- 3) $\frac{5}{13}$
- 4) $\frac{3}{13}$
- 5) $\frac{6}{13}$

Q 105 A bag contains 10 black balls 5 red balls and 5 white balls and a ball is drawn randomly from it. what is the probability of getting either a red or a white ball.

- 1) $\frac{1}{4}$
- 2) $\frac{1}{2}$
- 3) $\frac{3}{4}$
- 4) 1
- 5) $\frac{4}{5}$

Q 106 In how many ways can the word "ESPECIALLY " be arranged such that all the vowels always come together?

- 1) 42600
- 2) 25200
- 3) 10080
- 4) 30240
- 5) 29242

Q107 The market value of a share is 35% of the face value and 30% less than the selling price. find the profit or loss percentage

- 1) 50% loss
- 2) 50% profit
- 3) 49% profit
- 4) 48% loss
- 5) 45% profit

Q 108 it was sunday on 12 february. 1882 what was the day on 12 february 1885?

- 1) Wednesday
- 2) Thursday
- 3) Friday
- 4) Saturday
- 5) Sunday

Q 109 The outer rolling surface of eight similar small rollers having a radius of 9 cm and length as 12 cm are to be painted at a rate of Rs 15 /cm.what will be the total cost of painting (in Rs) ?

-
- 1) 80788.7
 - 2) 80488.7
 - 3) 81280.5
 - 4) 81388.8
 - 5) 82487.2

Q 110 A courtyard is 30 meters long and 20 meters broad and is to be paved with bricks of dimensions 15cm by 10 cm what will be the number of bricks required?

- 1) 25000
- 2) 30000
- 3) 40000
- 4) 35000
- 5) 42000

Q 111 A man invested X rupees for Y years at a rate of 3.25% per annum simple interest. if he received 3.25 X after Y years find the value of Y?

- 1) 68.22
- 2) 67.32
- 3) 65.33
- 4) 69.23
- 5) 71.32

Q 112 A mixture containing 43% of acid is mixed with another mixture containing 82% acid in the ratio 10:9.find the percentage of acid in the mixture formed?

- 1) 60.45%
- 2) 61.25%
- 3) 64.25%
- 4) 63.2%
- 5) 61.47%

Q 113 Two trains cross each other at a speed of 70 KMPH and 50 KMPH respectively. if the total length of both the trains is 1500 m find the time in which they cross each other the trains were moving in opposite direction?

- 1) 43 second
- 2) 41 second
- 3) 45 second
- 4) 49 second
- 5) 42 second

Q 114 The speed of the stream is 25 KMPH the speed of the boat downstream is 15 m/s. find the speed of the boat in Still water?

- 1) 8.06
- 2) 6.05
- 3) 5.23
- 4) 7.05

- 5) 8.56

Q 115 the speeds of A,B and C are 15 m/s, 67 Kmph and 1020 m/ minute. if they start running in the same direction find the maximum difference between any two of them after 8 hours 30 minutes and 39 seconds.

- 1) 111.399 km
- 2) 112.289 km
- 3) 109.243 km
- 4) 108.221 km
- 5) 110.606 km

Q 116 5 men or 7 women can do a piece of work in 28 days. find the time required by 7 men and 5 women to complete the task?

- 1) 9 days
- 2) 13 days
- 3) 11 days
- 4) 12 days
- 5) 10 days

Q 117 Two pipes can fill a tank in 10 minutes together if the efficiency of the first pipe is 8 times the efficiency of the second pipe find the time required to fill the tank using the second pipe alone.

- 1) 88 minutes
- 2) 87 minutes
- 3) 89 minutes
- 4) 90 minutes
- 5) 93 minutes

Q 118 Find the ratio of investment of Ajay to Vijay if Ajay invests after 6 months of Vijay's investment and Vijay invests after 3 months of commencement of business. It is known that their profit-sharing ratio after 1 year of commencement of business is 2:3.

- 1) 2 : 1
- 2) 1 : 3
- 3) 3 : 1
- 4) 1: 2
- 5) 4 : 1

Q 119 A mixture contains milk and water in a ratio of 7:11. When 7 liters of water is added, the ratio changes to 7:13. Find the quantity of milk in the initial mixture.

- 1) 23.5
- 2) 24.8
- 3) 22.4
- 4) 24.5
- 5) 25.3

Q 120 The cost price of an article is twice the discount. if the discount is 40% of the selling price find the profit or loss percent

- 1) 25% loss
- 2) 25% profit
- 3) 20% loss
- 4) 20 % profit
- 5) 30% profit

Q 121 There are 1450 cars in the factory. The factory produces & cars hourly. If the sales of the factory are 80 cars per day, what will be the sale percentage to the total cars held by the factory after 7 days. It is known that the factory runs 8 hours daily.

- 1) 28.6%
- 2) 27.5%
- 3) 29.5%
- 4) 24.54%
- 5) 26.74%

Q 122 There are two children named p and q . If it is known that the ages of p and q are in a ratio of 4:20. and the sum of their ages is 10 years and 6months. Find the age of q

- 1) 5 years
- 2) 8 years
- 3) 4 years
- 4) 7 years
- 5) 6 years

Q 123 The average runs scored by 3 players is 160 per match. Their runs are in a ratio 4:6:2. What will be the average it the player who scored the minimum runs hits a century in the next match and the other two play with the same runs?

- 1) 160.5
- 2) 166.66
- 3) 162.5
- 4) 168.5
- 5) 162.5

Q 124 One-third of the sum of all prime numbers greater than two but less than 20 is the square of which number?

- 1) 5
- 2) 6
- 3) 7
- 4) 8
- 5) 9

Q 125 Village P has a population of 78000 which is decreasing at the rate 1800 per year. Village Q has a population of 54000, which is increasing at the rate

of 600 per year. in how many years will the population of the two villages be equal?

- 1) 14
- 2) 15
- 3) 10
- 4) 12
- 5) 13

Q 126 What is the value of $(26 + (42(23 - 20) + 2 - (2(5 * 80 - 100)) + 16 - 4))$?

- 1) -434
- 2) 434
- 3) -443
- 4) -453
- 5) 435

Q127 Find the value of $2a^3 - [3a^3 + 4a^2 - \{2a^3 - 7a^3\} + 5a^3 - 7a^2]$

- 1) $-11a^3 + 3a^2$
- 2) $7a^2 + 3a^3$
- 3) $11a^3 - 3a^2$
- 4) $-11a^3 - 3a^2$
- 5) $11a^3 - 2a^2$

Q 128 A drum of kerosene is $\frac{3}{4}$ full. When 50 liters of kerosene is drawn from it, it remains $\frac{11}{16}$ full, What is the capacity of the drum?

- 1) 900
- 2) 750
- 3) 800
- 4) 850
- 5) 875

Q 129 Sujit and Suraj each have some money. If Sujit gives Rs. 10 to Suraj, then 4589 Suraj will have twice the money left with Sujit. But, if Suraj gives Rs. 10 to Sujit, then they both have an equal amount of money. How much money does Sujit have?

- 1) Rs 70
- 2) Rs 80
- 3) Rs 60
- 4) Rs 50
- 5) Rs 40

Q 130 Find the value of $0.0081^3 + 0.009^3 + 0.002187 * 0.09$

- 1) 0.000729
- 2) 0.00729
- 3) 0.0000729
- 4) 0.0729
- 5) 0.729

Q131 A sum of Rs 8.75 is made up of 105 coins, which are of either 10 paise or 5 paise. How many 5 paise coins are there?

- 1) 40
- 2) 38
- 3) 37
- 4) 39
- 5) 35

Q 132 Find the HCF of 405, 585, 765, 900

- 1) 45
- 2) 90
- 3) 35
- 4) 15
- 5) 50

Q 133 Akshay has completely put each of three liquids, 558 liters of petrol, 682 liters of diesel and 589 liters of kerosene in bottles of equal size without mixing with any of the above three types of liquids such that each bottle is completely filled. What is the least possible number of bottles required?

- 1) 56
- 2) 59
- 3) 63
- 4) 66
- 5) 60

Q 134 Three runners, Harshad, Aniket, and Rajesh, running around a circular track can complete one revolution in 12, 18 and 24 minutes respectively. After how many minutes will they meet at the starting point?

- 1) 70
- 2) 73
- 3) 75
- 4) 72
- 5) 76

Q 135 Three wheels can complete 25, 21 and 16 revolutions per minute respectively. There is a red spot on each wheel that touches the ground at time zero. After how much time, all these spots will simultaneously touch the ground again?

- 1) 58 second
- 2) 60 second
- 3) 62 second
- 4) 59 second
- 5) 61 second

Q 136 If X, Y & Z are three numbers such that LCM of X & Y is X and LCM of Y & Z is Y then find the HCF of X, Y and Z

- 1) X
- 2) Y
- 3) Z
- 4) XY
- 5) YZ

Q 137 how many prime numbers are less than 100?

- 1) 20
- 2) 22
- 3) 24
- 4) 25
- 5) 23

Q 138 Find the sum of first 100 even natural numbers

- 1) 10100
- 2) 11020
- 3) 10080
- 4) 10050
- 5) 10070

Q 139 In how many ways the number 3234 can be written as the product of 2 numbers which are coprime to each other?

- 1) 7
- 2) 9
- 3) 8
- 4) 10
- 5) 11

Q 140 Given that $1^2+3^2+5^2+7^2+9^2=165$, then what is the value of $3^2+9^2+15^2+21^2+27^2$?

- 1) 1485
- 2) 1385
- 3) 990
- 4) 495
- 5) 995

Q 141 Find the square root of $4a^2+9b^2+c^2+12ab-6bc-4ac$

- 1) $2a + b - 3c$
- 2) $2a - 3b - c$
- 3) $2a - 3b - c$
- 4) $2a + 3b - c$
- 5) $2a + b - 2c$

Q 142 If $X + Y + Z = 0$ then what is value of $(x+y)(y+z)(x+z)$?

- 1) $X^2 + Y^2 + Z^2$
- 2) $(X + Y + Z)^2$
- 3) $-XYZ$
- 4) XYZ
- 5) $(X + Y + Z)^3$

Q 143 How many number are there between 55 and 3815 which are multiple of 5 and divisible by 3?

- 1) 249
- 2) 250
- 3) 251
- 4) 252
- 5) 238

Q 144 The sum of the number in AP is 48. The sum of their squares is 800. Find the smallest number among following.

- 1) 10
- 2) 12
- 3) 11
- 4) 9
- 5) 13

Q 145 Find the product of 968427 and 3493

- 1) 3382715511
- 2) 3382715523
- 3) 3382756879
- 4) 3328778965
- 5) 3357729673

Q 146 on dividing 30879 by a certain number the question is 67 and the remainder is 327. find the divisor

- 1) 476
- 2) 456
- 3) 466
- 4) 444
- 5) 457

Q 147 Find remainder when $354^{176} - 346^{176}$ is divided by 700.

- 1) 5
- 2) 0
- 3) 2
- 4) 4
- 5) 3

Q 148 How many factors of 19! Are there, whose units digits is 5?

- 1) 1298
- 2) 1296
- 3) 1295
- 4) 1297
- 5) 1291

Q 149 What number will replace A if 3313A is divisible by 33?

- 1) 4
- 2) 5

- 3) 2
- 4) 6
- 5) 8

Q 150 which of the following divides $3^{45} + 3^{46} + 3^{47} + 3^{48} + 3^{49}$

- 1) 3
- 2) 5
- 3) 2
- 4) 11
- 5) 4

Section 4 Verbal

Q 151 In this question, four words are given in bold. One of these words given in bold may be wrongly spelt or inappropriate, in the context of the sentence. Find out the word that is inappropriately or wrongly spelt, if any. That word is your answer, If all the words given in bold are correctly spelt or appropriate in the context of the sentence, then mark 'All correct as your answer.

The book is **full** of **updated** and **contemporary** commentary.

- 1) Full.
- 2) Updated
- 3) Contemporary
- 4) Commentary
- 5) All correct

Q 152 In this question, four words are given in bold. One of these words given in bold may be wrongly spelt or inappropriate, in the context of the sentence. Find out the word that is inappropriately or wrongly spelt, if any. That word is your answer, If all the words given in bold are correctly spelt or appropriate in the context of the sentence, then mark 'All correct as your answer.

We are now facing **stiff competing** from foreign companies **manufacturing similar** products.

- 1) Stiff
- 2) Competing
- 3) Manufacturing
- 4) Similar
- 5) All correct

Q 153 In this question, four words are given in bold. One of these words given in bold may be wrongly spelt or inappropriate, in the context of the sentence. Find out the word that is inappropriately or wrongly spelt, if any. That word is your answer, If all the words given in bold are correctly spelt or

appropriate in the context of the sentence, then mark 'All correct as your answer.

Small **industries** in India are **facing huge pressure**.

- 1) Industries
- 2) Facing
- 3) Huge
- 4) pressure
- 5) All correct

Q 154 In this question, four words are given in bold. One of these words given in bold may be wrongly spelt or inappropriate, in the context of the sentence. Find out the word that is inappropriately or wrongly spelt, if any. That word is your answer, If all the words given in bold are correctly spelt or appropriate in the context of the sentence, then mark 'All correct as your answer.

Another **benefit** is that **technology** can be quickly **adapted** to clients **needs**.

- 1) Benefit
- 2) Technology
- 3) Adapted
- 4) Needs
- 5) All correct

Q 155 In this question, four words are given in bold. One of these words given in bold may be wrongly spelt or inappropriate, in the context of the sentence. Find out the word that is inappropriately or wrongly spelt, if any. That word is your answer, If all the words given in bold are correctly spelt or appropriate in the context of the sentence, then mark 'All correct as your answer.

Traditionally sales get a **boost** in the **festival season**.

- 1) Traditionally
- 2) Boost
- 3) Festival
- 4) Season
- 5) All correct

Q_156-159 Read the following passage carefully and answer the Questions that follow

There is now no denying that the new government takes office amid a clear economic slowdown. The first macro data set released showed an under-performing economy with GDP growth falling to 5.8% in the fourth quarter of 2018-19 and pulling down the overall growth for the fiscal to a five-year low of 6.8%, Growth in gross value added (GVA) which is GDP minus taxes and subsidies, fell to 6.6% in 2018-19, pointing to a serious slowdown. If further confirmation were needed, the growth in core sector output-a set of eight major industrial sectors – fell to

2.6% in April, compared to 4.7% in the same month last year. And finally, Unemployment data, controversially suppressed by the Union government so far, showed that joblessness was at a 45-year high of 6.1% in 2017-18. These numbers highlight the challenges ahead in drafting the Budget for 2019-20. The economy is beset by a consumption slowdown as reflected in the falling sales of everything from automobiles to consumer durables, even fast-moving consumer goods. Private investment is not taking off, while government spending, which kept the economy afloat during the last NDA government, was cut back in the last quarter of 2018-19 to meet the fiscal deficit target of 3.4%. The good news is that inflation is undershooting the target and oil prices are on the retreat again. But the rural economy remains in distress, as seen by the 2.9% growth in agriculture last fiscal; the sector needs a good monsoon this year to bounce back. Overall economic growth in the first quarter of this fiscal is likely to remain subdued, and any improvement is unlikely until the late second quarter or the early third. There are not too many options before the new Finance Minister. In the near term, she has to boost consumption, which means putting more money in the hands of People. That, in turn, means cutting taxes, which is not easy given the commitment to rein in the fiscal deficit. In the medium term, Ms. Sitharaman has to take measures to boost private investment even as she opens up public spending again. These call for major reforms, starting with land acquisition and labour, corporate taxes by reducing exemptions and dropping rates, and nursing banks back to health. On the table will be options such as further recapitalisation of the ailing banks, and consolidation. The question, though, is where the money will come from. With tax revenues likely to be subdued owing to the slowdown, the Centre will have to look at alternative sources such as disinvestment. There may be little choice but to go big on privatisation. A rate cut by the Reserve Bank of India, widely expected this week, would certainly help Boost sentiment. But it is the Budget that will really set the tone for the Economy.

Which of the following is closest to the meaning of beset?

- A) Besiege
- B) Terminate
- C) Filter
- D) Tiny
- E) Huge

Q 157 Which of the following is / are true as per the passage?

I. There is going to be a definite rate cut by the RBI in the coming week.

II. The rural economy is in better shape than the urban

III. Government spending has increased in in the last quarter of 2018-19.

- 1) Only II
- 2) Only I AND II
- 3) Only I AND III
- 4) Only II AND III
- 5) None of the above

Q 158 Which of the following, as per the passage, indicates a slowdown in the Indian economy.

I Fall in sale levels of consumer ddurable

II Negative growth in the core sector output

III Fall in inflations levels

- 1) Only I
- 2) Only III
- 3) Only II
- 4) Only I and II
- 5) All I, II, AND III

Q 159 As per the passage, which of the following would lead to putting more money in hands of people?

I. Decrease in tax rates.

II. Increase in inflation 10

III. Increase in private investment

- 1) Only I
- 2) Only III
- 3) Only I and II
- 4) Only I And III
- 5) Only II

Q 160 As per the passage, which of the following reforms has NOT been mentioned in the passage to improve the investment climate?

- 1) Land acquisition
- 2) Privatization of banks
- 3) Adjustment in the prevailing corporate tax
- 4) Recapitalization of banks
- 5) All are correct

Q 161 Which of the following sentences does not contribute to the main idea of the paragraph?

1. There is evidence that digital platforms of education are badly hurting less proficient students who need expert classroom teachers

2. In the fully digital mode, students are never in the same room with their teacher, which leaves them to depend on self-study mode more

3. A study showed that students on digital algebra courses learn much less than those who worked with a teacher in the classroom

4. Digital courses have often been seen to give students an easy passing grade without teaching them important things which affect them in the long run.

5. Digital platforms are beneficial to high achievers by providing advanced courses for knowledge enhancement

Q 162 Which of the following sentences does not contribute to the main idea of the paragraph?

1. A new survey shows that Amazon Prime has grown much more beneficial than traditional television.

2. The streaming of television shows and the freedom of users to choose Their own shows has taken off with people,

3. Amazon Prime provides a constantly improving content library which consists of many original series, films and comedy shows that keeps it in demand.

4. Amazon Prime provides a facility for people to personize their own favorites and pause live TV.

5. Despite the success of Amazon Prime, most investors are unaware of this company

Q 163 Which of the following sentences does not contribute to the main idea of the paragraph?

1. Climate change is threatening biodiversity.

2. Animals may struggle to survive as their habitats are disrupted.

3. Climate change is beneficial for species adaptation

4. Rising temperatures are affecting ecosystems and habitats.

5. Species extinction is a risk due to climate change

Q 164 Which of the following sentences does not contribute to the main idea of the paragraph?

1. Social media changes how people interact with others

2. People use social media to share experiences and ideas.

3. Social media has only positive effects on mental health.

4. Comparison on social media can lead to feelings of loneliness and Anxiety.

5. Balancing online and real-life connections is important

Q 165 Which of the following sentences does not contribute to the main idea of the paragraph?

1. Early childhood education contributes to academic and social success.
2. Quality preschool programs help develop communication and problem-solving skills.
3. Early education has little impact on a child's later success
4. Foundational skills learned early are important for future success
5. Early childhood education is vital for long-term academic achievement

Q 166 Read the following passage carefully and answer the following questions.

The world population is living working, vaccinating, increasingly conglomerating along the coasts, and standing on the front row of the greatest, most unprecedented, plastic waste tide ever faced. Washed out on our coasts in obvious and clearly visible form, the plastic pollution spectacle blatantly unveiling on our beaches is only the prelude of the greater story that unfolded further away in the world's oceans, yet mostly originating from where we stand the land. For more than 50 years, global production and consumption of plastics have continued to rise. An Estimated 299 million tons of plastics were produced in 2014 representing a 4 percent increase over 2012, and confirming an upward trend over the past years. In 2008, our global plastic consumption worldwide has been estimated at 260 million tons, and, according to a 2012 report by Global Industry Analysts, plastic consumption is to reach 297.5 million tons by the end of 2015. Plastic is versatile, lightweight, flexible, moisture resistant, strong, and relatively inexpensive. Those are the attractive qualities that lead us, around the world, to such a voracious appetite and over-consumption of plastic goods. However, durable and very slow to degrade, plastic materials that are used in the production of so many products all, ultimately, become waste with staying power. Our tremendous attraction to plastic, coupled with an undeniable behavioural propensity of increasingly over-consuming, discarding, littering and thus polluting has become a combination of lethal nature. A simple walk on any beach, anywhere, and the plastic waste spectacle is present. All over the world, the statistics are ever growing, staggeringly. Tons of plastic debris (which by definition are waste that can vary in size from large containers, fishing nets to microscopic plastic pellets or even particles) is discarded every year, everywhere, polluting lands, rivers, coasts,

beaches, and oceans. Published in the journal Science in February 2015, a study conducted by a scientific working group at UC Santa Barbara's National Center for Ecological Analysis and Synthesis (NCEAS), quantified the input of plastic waste from land into the ocean. The results: every year, 8 million metric tons of plastic end up in our oceans. It's equivalent to five grocery bags filled with plastic for every foot of coastline in the world. In 2025, the annual input is estimated to be about twice greater, or 10 bags full of plastic per foot of coastline. So the cumulative input for 2025 would be nearly 20 times the 8 million metric tons estimate-100 bags of plastic per foot of coastline in the world!

As per the passage, which of the following statement is true

- 1 Most of the plastic present in the ocean today has originated from land.
 - 2 In recent years, production of plastic has declined.
 - 3 Plastic pollution is present on almost every beach
- 1) Only 1
 - 2) Only 2
 - 3) None of 1,2 and 3
 - 4) All 1, 2, and 3
 - 5) Only 1 and 3

Q 167 Read the following passage carefully and answer the following questions.

India is considering inviting expressions of interest to sell Air India Ltd by the end of next month as the government aims to complete the transaction this year, people with knowledge of the matter said. "The government will conduct roadshows, as well as, be open to meet prospective buyers even before the expressions of interest are sought," the people said, declining to be identified as the discussions are private. "The process will likely allow the bidders to look at the accounts of the airline except for some portions that are confidential and also see the share purchase agreement," they said without providing details. "The potential bidders will have the option to make suggestions for changes in the sale terms during the process of expressing their interest in the deal," the people said. The government is looking to sell its entire stake in the carrier, they said. DS Malik, a spokesman of the Ministry of Finance, did not immediately answer two calls made to his mobile phone. Dhananjay Kumar, a spokesman

of Air India, declined to comment. The plan is being prepared after the government's attempt to partially exit the carrier failed to attract any bidders last year. In her budget presentation for the current financial year, Finance Minister Nirmala Sitharaman said that the government will revive plans to sell Air India and the divestment would be part of the government's efforts to raise Rs 1,05,000 crore (\$15.3 billion) selling stakes in state-run companies. Air India, which is surviving on a Rs 30,000 crore taxpayer-funded bailout, has failed to maintain its market dominance as a slew of carriers including InterGlobe Aviation Ltd and SpiceJet Ltd started to offer ultra-cheap, on-time flights more than a decade ago. The state-run airline has total debts of \$8.4 billion and posted losses of more than Rs 7,600 crore last year, according to provisional estimates.

Which among the following has been shown as the main reason for present situation of Air India in the passage?

- 1) Air India does not have enough money to survive in the long run though it is trying to find out.
- 2) Air India has lost all the deposit it had received from government last year.
- 3) Air India is in the process of earning deposits from the depositors and investors so that they are worried about the stake sale
- 4) Air India has got competition from other airlines and it has simply failed to live up the same.
- 5) None of the above

Q 168 Which among the following is OPPOSITE in meaning to the word Dominance as used in the passage?

- 1) Inferiority
- 2) Powerlessness
- 3) Submission
- 4) Ascendency
- 5) None of the above

Q 169 Read the following passage carefully and answer the following questions.

The second-largest colony of emperor penguins in the world appears to be collapsing, after

rough seas drowned all of its babies three winters in a row. The Halley Bay colony once accounted for 5 to 9% of the global emperor penguin population, according to the British Antarctic Survey (BAC), which reported the catastrophe. That amounted to about 15,000 to 24,000 adult breeding pairs. But in 2016, the sea-ice platform on which the colony was raising its babies collapsed during rough weather, throwing infant penguins unable to swim into the frigid water. In 2017 and 2018, the rough weather pattern repeated itself. The birds arrive at the site from their summer sea jaunts each April to breed; for the resulting chicks to survive, the site has to remain stable throughout the Southern Hemisphere's winter, which lasts until December. By 2018, a handful of adults — a "few hundred," or about 2 percent of the original population — turned up at the Halley Bay site, the researchers reported. The remaining colony appeared in disarray, with adults moving closer to the ice edge than is typical, and was difficult to count scattered among the roughened chunks of ice. The good news is that at least some of the colony appears to have moved, rather than died out. The Dawson[1]Lambton Glacier colony 34 miles (55 kilometers) to the south has significantly swelled in numbers since the devastation of Halley Bay, the BAC reported. That colony, which had hit a low of just 1,280 pairs in the 2015 season, swelled in each succeeding year. In 2016, it reached 5,315 pairs. In 2017, there were 11,117 pairs. And by 2018, a full 14,612 pairs set up camp at the site.

Which of the following is antonym of "frigid" in context of passage?

- 1) Flexible
- 2) Soft
- 3) Lukewarm
- 4) Rigid
- 5) Hot

Q 170 Which of the following is false in the context of the passage?

- I The Dawson-Lambton Glacier colony died due to collapse of rough sea.
- II The penguin birds breed during April every year.

III Halley Bay colony reached 5315 pairs in 2016

- 1) Only I
- 2) Only II
- 3) Only I AND III
- 4) Only II AND III
- 5) All I, II AND III

Q 171 Read the following passage carefully and answer the following questions.

Once upon a time, there lived a farmer who had a little land. His name was Tuan, and he was a very kind and good-natured person. He lived in a hut on his land with his wife and children and earned by selling whatever crops he could produce on his small land. Tuan loved to help others. Whenever someone fell ill or needed something badly, Tuan was there to help that person. If someone died in the village, Tuan assisted the family members of the deceased person in whichever way he could. If anyone fell ill at night, Tuan was right beside the village doctor to help him prepare the medicines and tend to the sick. There seemed to be none who hated this man. He appeared to be loved by one and all. But there was one person who hated Tuan with all his heart. He was Juan, a neighbour of Tuan, who lived in the land next to him. A lazy person by nature, Juan hardly put in as much effort to cultivate his land as Tuan did to produce crops in his own. So, when the harvest season arrived every year, Juan found that he had very few crops to sell. Tuan, on the other hand, earned a handsome profit through the selling of his produces. One year, Juan could no longer contain his jealousy. Just days before Tuan was to reap his harvest, Juan set fire to his crops at night. Tuan was asleep at this time, and it was only the alertness of one of his other neighbors that saved much of his crops from being perished in the deadly flames of the fire that Juan had lighted. When the flames were doused, Tuan saw which direction the fire had started from. Juan's animosity towards him was unknown to Tuan. But he let the matters rest and decided to take action only if he saw Juan repeating his dastardly act once again. That year, Tuan managed to sell the rest of his crops at a good price, but he could not make much profit for a good part of his produces had been burnt.

He had a heavy heart, but he did not like to tell anyone about it. Only days later, Tuan was awakened by the sound of lamentations. He went out to find a crowd beside Juan's hut. He rushed to find that Juan's son had fallen ill. He found that the village doctor was unable to provide a cure to his illness. Tuan knew what he had to do. He untied his own horse and rode it. Then he rushed to the town that was ten miles away and fetched a more experienced doctor who lived there. This doctor was able to guess the disease correctly and provided an exact cure for it. Within hours, the boy was found to sleep soundly and Tuan went with the doctor to take him back to the town. A day later, Juan went to Tuan's hut and began to weep bitterly. He confessed to his sins but was surprised when Tuan told him that he knew about it all. "You knew that I had set fire to your crops? And still you fetched the doctor for my son?" asked the astonished Juan. Tuan nodded and said, "I did what I knew was right. Could I do wrong just because you had done so?" Juan stood up and embraced Tuan. Both men were in tears and so were the others who stood by them. From that day, Juan changed himself. Within a year, he could produce much crops in his land through his hard work. When the others asked him how he had changed so much, he only replied, "It was the goodness and love of Tuan that transformed me".

Which of the following is/are true about Tuan?

- I He was a doctor along with being a farmer.
- II. He was a good-natured and kind person.
- III He was a wealthy farmer who gave away his wealth to needy.

- 1) Only I
- 2) Only II
- 3) Only I AND III
- 4) Only II AND III
- 5) All I, II, and III

Q 172 Which of the following is/are a/some ways in which Juan transformed himself?

- I He began to work hard on his crops.
 - II He became more helpful towards people
 - III He started a small charity in in Tuan's name
- 1) Only I

-
- 2) ONLY III
 - 3) Only I AND II
 - 4) Only II AND III
 - 5) All I, II and III

Q 173 What did Tuan do when he discovered Juan's son was ill?

- 1) He called the village doctor who lived a few a few houses away
- 2) He went back to his house thinking Juan deserved what he got.
- 3) He rode out to the nearest hospital along with Juan's son to get him treated.
- 4) He went back to his house to get some medicine which could help Juan's son.
- 5) He rode to the to the nearest town to get a better doctor.

Q 174 Which among the following is opposite in meaning to the word doused as used in the passage.

- 1) Saturated
- 2) Deluged
- 3) Wet
- 4) Lighted
- 5) All correct

Q 175 Which of the following gave Tuan clues that Juan had set fire to his crops ?

- 1) Juan has dropped a lighter with his initials in the field.
- 2) Tuan had seen Juan carry kerosene earlier that evening.
- 3) A neighbour saw Juan sneak out at night and set fire to the crop.
- 4) The direction from which the fire had started
- 5) Both 3 and 4

Q 176 Choose the correct preposition to complete the sentence.

What did you make.....the lecture?

- 1) In
- 2) About
- 3) On
- 4) At
- 5) Of

Q 177 Fill in the blank with the appropriate word.

I'll help him if he... .

- 1) Ask
- 2) Asked
- 3) Will ask
- 4) Asks
- 5) None of the above

Q 178 Find if there is any grammatical error in any part of the sentence below and mark that part as your answer. If there is no error. Mark 5 as your answer.

He loosened his temper/whenever he knows/things do not take place/ as per the planning.

- 1) He loosened his temper
- 2) Whenever he knows
- 3) Things do not take place
- 4) As per his planning
- 5) No error

Q 179 Find if there is any grammatical error in any part of the sentence below and mark that part as your answer. If there is no error. Mark 5 as your answer.

So longer as/you are honest/and forthright, they will/support you in this task.

- 1) So longer as
- 2) You are honest
- 3) And forthright, they will
- 4) Support you in this task
- 5) No error

Q 180 Find if there is any grammatical error in any part of the sentence below and mark that part as your answer. If there is no error. Mark 5 as your answer.

One of the party/members were dismissed/for speaking against/ the leader.

- 1) One of the party
- 2) Members were dismissed
- 3) For speaking against
- 4) The leader
- 5) No error

Q181 Find if there is any grammatical error in any part of the sentence below and mark that part as your answer. If there is no error. Mark 5 as your answer.

His father promised to/ give him anything what he/wants if he/ passes in the examination.

- 1) His father promised to
- 2) Give him anything what he
- 3) Wants if he
- 4) Passes in the examination
- 5) No error

Q 182 Find if there is any grammatical error in any part of the sentence below and mark that part as your answer. If there is no error. Mark 5 as your answer.

Mahatma Gandhi did not solve/ all the problems of the future/ but he did solve/ problems of his own age.

- 1) Mahatma Gandhi did not solve
- 2) All the problems of the future
- 3) but he did solve
- 4) problems of his own age.
- 5) No error

Q 183 Find the correctly spelt word.

- 1) Quentiscence
- 2) Quintecence
- 3) Quintissense
- 4) Quintecsence
- 5) Quintessence

Q 184 The five sentences labelled (1, 2, 3, 4, 5) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a number. Decide on the proper order for the sentences and key in this sequence of five numbers as your answer.

1. Scientists have for the first time managed to edit genes in a human embryo to repair a genetic mutation, fueling hopes that such procedures may one day be available outside laboratory conditions.
2. The cardiac disease causes sudden death in otherwise healthy young athletes and affects about one in 500 people overall.
3. Correcting the mutation in the gene would not only ensure that the child is healthy but also prevents transmission of the mutation to future generations.
4. It is caused by a mutation in a particular gene and a child will suffer from the condition even if it inherits only one copy of the mutated gene.

5. In results announced in Nature this week, scientists fixed a mutation that thickens the heart muscle, a condition called hypertrophic cardiomyopathy.

- 1) 1,4,3,2,5
- 2) 1,5,3,4,2
- 3) 1,4,5,3,2
- 4) 1,3,2,5,4
- 5) 1,5,2,4,3

Q 185 The five sentences labelled (1, 2, 3, 4, 5) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a number. Decide on the proper order for the sentences and key in this sequence of five numbers as your answer.

- 1 Like a driver changing tire in the middle of the highway, they hope an oncoming vehicle will not hit them before their work is done.
- 2 Some business executives have adapted a veil and see attitude.
- 3 Others are too busy bailing themselves out of trouble caused by the changes that have taken place around them to have any time to reflect on the future.
- 4 Like deer caught in the headlight of an oncoming truck, they risk being turn over.
- 5 Discussion with several executives in both situation shows that they recognize the danger is not applying them to understanding the shape of future

- 1) 4,5,1,3,2
- 2) 5,1,4,3,2
- 3) 2,5,1,3,4
- 4) 3,4,5,2,1
- 5) 2,4,3,1,5

Q 186 The five sentences labelled (1, 2, 3, 4, 5) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a number. Decide on the proper order for the sentences and key in this sequence of five numbers as your answer.

- 1 We have paid a terrible price for our education such as it.
- 2 Wonder is marvellous but is also cruel, cruel, cruel.
- 3 We have educated ourselves into world from which wonder has been banished.

4 Of course wonder is costly because it is antithesis of the anxiously worshiped security.

5 The magician world view in so far as it exists, has taken flight into science

- 1) 2,1,5,3,4
- 2) 1,5,4,3,2
- 3) 2,1,3,4,5
- 4) 3,1,4,5,2
- 5) 4,2,1,3,5

Q 187 The five sentences labelled (1, 2, 3, 4, 5) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a number. Decide on the proper order for the sentences and key in this sequence of five numbers as your answer.

1 People started fearing a famine.

2 The monsoon failed and water tanks became almost empty.

3 Monsoon turned out to be unusually abundant and the danger was averted.

4 So, no grain could be sown by the farmers in their fields.

5 Farmers look anxiously for the next monsoon.

- 1) 5,4,3,1,2
- 2) 3,4,5,1,2
- 3) 4,2,3,5,1
- 4) 2,3,4,5,1
- 5) 2,4,1,5,3

Q 188 Fill in the blank with the proper words given below.

Rama is not at home, he _____ just _____ for Shopping

- 1) Is/ gone
- 2) Was / going
- 3) Had / gone
- 4) Will have / be going
- 5) Has / gone

Q 189 Identify the correct indirect speech form of the following sentence

The old woman said to the boy, 'Please help me till he returns'.

- 1) The old woman told the boy, Please help me till he returns'.
- 2) The old woman said that she may please help till he returns.

3) The old women asked that a boy may help her till he returns.

4) The old woman ordered the boy to help him till he returned

5) The old woman requested to the boy to help her till he returned.

Q 190 Choose the correct alternative to replace the bold phrase in the following sentence.

I cannot force her **to playing**.

- 1) In playing
- 2) For play
- 3) Over the play
- 4) With play
- 5) To play

Q 191 Select the most appropriate meaning of the underlined idiom in the given sentence.

Srilanka's problem **boils down** to just one thing-lack of infrastructure for agriculture.

- 1) Heats up to
- 2) Adapt to something
- 3) As a result
- 4) Fulfill something
- 5) Sums up to

Q 192 Pick the correct grammatical sentence

- 1) The bouquet of flowers were beautiful.
- 2) The bouquet of flowers was beautiful.
- 3) The bouquet of flowers are beautiful.
- 4) The bouquet of flowers is beautifuller.
- 5) The bouquet of flowers am beautifuller.

Q 193 Find the most appropriate meaning of the given idiom "Work against the clock".

- 1) Work late in the night
- 2) Work in great hurry
- 3) work against all problems
- 4) work with concentration
- 5) work with dedication

Q 194 Rearrange the following six sentences (A), (B), (C), (D), (E), and (F) in a proper sequence to form a meaningful paragraph. Then answer the question that follows.

A. They had gone fishing in a creek deep inside the forest.

B. A tiger killed two fishermen in the Sunderbans last Monday.

C. But there was no trace of the missing fishermen.

D. At last the party decided to search the creeks, where they discovered their mauled half-eaten bodies.

E. The search party combed the regular fishing areas for two days.

F. When they didn't return home in the evening, a search party was formed by the villagers.

Which of the following should be the FIFTH statement after rearrangement?

- 1) A
- 2) B
- 3) C
- 4) F
- 5) E

Q 195-199 Read the following passage carefully and answer the question that follows.

For generations, companies have been selling fair skin to young Indian women, promising better marriage and employment prospects. However, over the last few years, men have become a favoured target audience. This followed the realisation that the Indian alpha male, denied a choice in male-specific grooming products, had been using women's fairness creams all along. Until the mid-2000s, deodorants and shaving creams were the only grooming products advertised for men. But India's largest consumer goods companies sensed an opportunity, and launched a slew of fairness products for male consumers.

In India, as in other parts of the world, light skin is the culturally accepted and endorsed form of beauty, and children absorb this message at a young age. According to a 2015 research report by Nielsen, urban Indian men believe that fair skin can improve professional prospects. The cultural pressure to look fair, argues Kiran Khalap, branding expert and founder at communications consultancy Chlorophyll, is something inherent in our society, not manufactured by companies. "And it is certainly not restricted to India: China and Japan have had skin-whitening products for centuries, well before they met Western 'white' people," he said. However, there is a growing awareness among consumers that companies are exploiting

their insecurities, and critics have taken some of the biggest fairness brands, and the celebrities who endorse them, to task for their casual discrimination.

Earlier this month, Bollywood actor Abhay Deol took to Facebook to trounce his fellow actors who earn millions from endorsing fairness creams. This comes a few years after actress Nandita Das launched the "Dark is Beautiful" campaign to encourage Indians to embrace a wider definition of beauty. These efforts are slowly making a difference, increasing awareness and encouraging consumers to take pride in their natural skin tones. That means Indian companies will eventually have to change their approach. "My sense is that brands will wake up to the new reality, and you'll see propositions reworked around clearer skin (and) glow, rather than pure fairness," Leo Burnett's Sinha said. Rajesh Krishnamurthy, business head for the consumer product division at The Himalaya Drug Company, believes that over time the men's grooming category will evolve to include a wider range of products, including those for normal skin, just like in the women's skin care category. "Companies are increasingly realising that you cannot continue to bullshit consumers anymore; these are educated young men who will question what you sell to them," said Shantanu Deshpande, co-founder and CEO of the male-grooming startup Bombay Shaving Company.

What is the central idea of the passage?

- 1) Though people endorsed skin fairness products, they are now realising that they are being taken for a ride by such products.
- 2) Only men ardently use whitening creams to boost their personality.
- 3) The brand marketing of fairness product companies are evolving to appease the target audience of India.
- 4) Brands are frivolous when it comes to campaigning of their beauty products.
- 5) Not any of the above

Q 196 What were the findings of the 2015 research report by Nielsen?

- 1) Indian urban men presumed that being fair enhanced their professional opportunities.

-
- 2) Indian urban men believed that being fair would give them better marriage and employment contracts.
 - 3) Indian urban men would eventually question the logic behind male-grooming product advertisements.
 - 4) Indian urban men do not endorse the concept of fairness helping them in their personal and professional life.
 - 5) Not any of the above

Q 197 With reference to the passage, why exactly was “Dark is beautiful” campaign initiated?

- 1) To motivate Indians to ditch their liking for the fair skin and accept their inherent beauty.
- 2) To throw light on the sinister intentions of fairness brands.
- 3) To make sure that Indians do not fall prey to misleading beauty product advertisements.
- 4) To encourage Indians to be sympathetic towards people with other skin tones.
- 5) Not any of the above

Q 198 Which of the following statements is not true with respect to the passage?

- 1) Since the inception of beauty products, men have been its most targeted audience.
- 2) Light skin is a culturally endorsed notion worldwide.
- 3) Skin whitening products existed for centuries in China and Japan.
- 4) Deodorants and shaving creams were the only grooming products advertised for men till the mid-2000s.
- 5) Not any of the above.

Q199 Choose a similar word in meaning to the word "trounce"

- 1) Vacillation
- 2) Temerity
- 3) Lambaste
- 4) Nefarious
- 5) None of the above

Q 200 Read the passage carefully and answer the question that Follows

Emotions often trump reason. The Cauvery water dispute is turning out to be less about water and irrigation and more about linguistic chauvinism and regional identity. Nothing else can explain the mindless violence in Karnataka and Tamil Nadu over the Supreme Court order asking the former to release water to the latter, keeping in view the distress situation in both States in a season of deficit rainfall. Many of the acts of violence have been perpetuated in the two States by chauvinistic, fringe organizations that have little to do with the farming community or its interests. It is clear that there is insufficient water in Karnataka’s reservoirs to meet the full irrigation needs of both states. The point of the Supreme Court order was to make the States share their distress and not to magically fulfil the needs of farmers on both sides. But political parties and some media houses, especially regional language television channels, have sought to portray the issue as one that pits the people of one State against that of the other. Indeed, the two major national parties, the Congress and the Bharatiya Janata Party, have taken different stands in the two States on this issue. No party or State government appears to believe it can afford to be seen as taking even so much as a conciliatory step toward defusing the crisis. On some previous occasions when Karnataka released water in a distress year the State government did so quietly so as to not give chauvinistic elements any opportunity to inflame passions. Cauvery is an inter-State dispute but this is no reason to turn the issue into a raging controversy that draws the peoples of the two States into confrontation!

What was the purpose behind the Supreme Court’s order regarding Cauvery water?

- A. To solve the irrigation needs faced by the farmers of Tamil Nadu.
- B. That the two states share their distress due to shortage of water.
- C. To fulfil the needs of the farmers in both states.
- D. To solve the irrigation needs faced by the farmers of Karnataka.
- E. Not any of the above

Answer

1. Answer Grandmother

Sunita is the wife of Rohit.

Puja is the mother-in-law of Sunita → So Puja is Rohit's mother.

Rohit is the father of Rupali → So Puja is Rupali's grandmother.

Dhanashree is the daughter of Puja → So

Dhanashree is Rohit's sister, and Rupali's aunt.

Hence, the relationship between Puja and Rupali is: Puja is Rupali's grandmother.

2. Samiksha's rank from the top: Divya is 12 ranks ahead of Medha. Divya is 5 ranks behind Samiksha. Reshma is 7th from the bottom. Reshma is 29 ranks behind Medha.

Step 1 . Find Divya's rank from the top Divya is 5 ranks behind Samiksha, who is 12th from the top. Divya's rank from the top is $12+5=17$.

Step 2 . Find Medha's rank from the top Divya is 12 ranks ahead of Medha. Medha's rank from the top is $17+12=29$.

Step 3 . Find Reshma's rank from the top Reshma is 29 ranks behind Medha. Reshma's rank from the top is $29+29=58$.

Step 4 . Calculate the total number of students Reshma is 7th from the bottom and 58th from the top. Total number of students is $58+7-1=64$.

3. In a music school with 80 students, 30 students can play the violin, including those who also play the harmonium. Among them, 20 students can play both violin and harmonium. This means that only 10 students can play just the violin. Let the total number of harmonium players be H. Since 20 play both, the number of students who play only the harmonium is $(H - 20)$. Using the total count: 10 (only violin) + $(H - 20)$ (only harmonium) + 20 (both) = 80 . Solving gives $H = 70$. Therefore, 70 students play harmonium, 50 of them exclusively.

4 The **sound** waves **travel** faster in the **solid**.

Hence the **assertion** is correct. The **solid** is denser **than** the **gases** then the **reason** is also correct. Hence option 1.

5 The correct answer is: **3) Neither assumption I nor Assumption II follows**

Assumption I: This is **not necessarily true**. The statement doesn't mention **any reason** for abandoning the trip — financial or otherwise. So, assuming profitability as the cause is speculative.

Assumption II Again, there's **no mention of the weather** in the original statement. It could be due to **any number of reasons**: political unrest, low bookings, safety issues, etc.

6 Original: ALLITERATION

Alphabetical AAEILLNORTT

Only A and I does not change. Hence option 3

7 From sentence 1,2 and 3 The is coded as "pus"

From statement 2 and 3 dog is "pus"

From statement 1 and 3 cat is "bro"

Therefore has is "cus"

8 $I = 9 \rightarrow 9$

$N = 14 \rightarrow 1+4 = 5$

$S = 19 \rightarrow 1+9 = 10$

$T = 20 \rightarrow 2+0 = 2$, and so on. Therefore for GOVERNMENT

$G = 7$, $O = 1+5 = 6$, $V = 2+2 = 4$, $E = 5$,

$R = 1+8 = 9$ and so on. HENCE option 4

9 Let Kailash's age be x .

Then Riyansh is $2x$

Rajesh is $2 + 2x$

Now, total age:

Kailash + Riyansh + Rajesh = 37

$x + 2x + (2 + 2x) = 37$

$\rightarrow x + 2x + 2 + 2x = 37$

$\rightarrow 5x + 2 = 37$

$\rightarrow 5x = 35$

$\rightarrow x = 7$

So, **Riyansh = $2x = 14$ years**

10 option 4 2615 logic in series

$21 \times 5 = 105$

$105 \times 5 = 525$

$525 \times 5 = 2625$ (instead of 2615)

11 Option 5

INSTITUTE $\rightarrow$ EOTUJUVUI

Logic: first and last letter interchange their position.

Rest all letter + 1

So MEDICOVER $\rightarrow$ RFEJDPWFWM

12 Phi, Gamma, Delta, Beta — All are Greek letters. Peso — It is a currency, not a Greek letter. Therefore peso.

13 N is to the east of E $\rightarrow N \rightarrow E$
 G is to the south of E $\rightarrow E \downarrow G$
 L is to the west of G $\rightarrow G \leftarrow L$
 Now, from L to N, we move:
 East from L to G to E
 North from E to N
 So the direction from L to N is North-East.

14
 Sunil is sitting at one of the corners however there is a person to the left of sunil. Hence sunil is placed seat 1 row 2.
 . The person who is sitting in front of Aman, is immediately left to the Sunil. This means AMAN is sitting on seat 2 row 2.
 Sunil sitting in front of Raj. Hence Raj at row 2 seat 1.
 Sandeep diagonally opposite to raj. Hence sandeep at seat 6 row 1. rohit at seat 5 as Rohit is sitting immediately right to Sandeep.
 Ramesh is sitting second to the right of Rajesh ie Ramesh on seat 2 and rajesh on seat 4. One of the two vacant seats is in one of the corners and he onl corner remaining is row 2 seat 6.
 Ramesh and omkar are diagonally opposite so will be Aman and Rohit
 Suresh is not sitting with Aman.
 The final arrangement ill look like

<u>Sunil</u>	<u>Ramesh</u>	<u>vacant</u>	<u>Rajesh</u>	<u>Rohit</u>	<u>Sandeep</u>
1	2	3	4	5	6
<u>Raj</u>	<u>Aman</u>	<u>Yash</u>	<u>Suresh</u>	<u>Omkar</u>	<u>Vacant</u>
1	2	3	4	5	6

Yash is sitting next to suresh

15 3) All Ramesh, Omkar and Rajesh

16 2) Suresh- sandeep

17 Rohit

18 Ramesh- Aman

19 In simplified form it will be $10 \div 5 - 3 \times 2 + 9$
 Apply BODMAS, $2 - 6 + 9 = 5$

20 The pattern is +90, +100, +110, and so on.
 Hen answer is $320 + 120 = 440$

21 Here the logic is

Step I In each number all digits are arranged in ascending order.

Step II All the numbers are arranged in ascending order

Step III middle to terms of each number is considered.

Step IV Digits of each number are added

Therefore for input 7925 4758 2538 5628 8561
 7426 3625 6245

Step 2579 4578 2358 2568 1568 2467 2356 2456

Step 1568 2356 2358 2456 2467 2568 2579 4578

Step III 56 35 35 45 46 56 57 57

Step IV 11 8 8 9 10 11 12 12

Final addition $8+9+11+12 = 40$

22 Lets do step by step. Ram firs walked 5km south. He turns right, means walking in west for km. then he turns left , means in south he walked for 4 km. hence he is in south west with respect to starting point.

23 Here 3 number series are going on

1st digit + 10 = 4th digit

2nd digit + 10 = 5th digit

3rd digit = 6th digit = 9th

Therefore 32 36 78

24 Sushil > aniket.

Vishal > Rahil > Chaitanya > sushil > aniket

Therefore, vushal is tallest

25 Priya's father Omkar is the only son of my father in law Chandrakant means neetu is mother of priya and chandrakant is parent of omkar. Ruche is sister of priya who is child of omkar. Hence Ruchi is Granddaughter of chandrakant

26

Yellow line is to the north of blue line.

Based on 1st 3 statements there are two scenarios psooible

Scenario 1

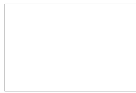

Yellow H3 _____ H4 _____

BLUE H2 _____ H5

Scemnario 2

Yellow H2 _____ H5

Blue H3 _____ H4 _____

However taking the next statement scenario 2 does not fit.

Hence final arrangement

Yellow H3 H1 H4 H6

Blue H2 H7 H8 H3

H8 does not belong to group as rest all placed at the corners

27 H8 is parked opposite to H4

28 H6

29 Second to the right

30 H5

31 correct answer = 9

$7 \times 6 + 5(\text{constant}) = 47$

$12 \times 8 + 5 = 101$

Therefore $9 \times 8 + 5 = 77$

32 If north is replaced by SE, i.e. directions rotated by 225 degree clockwise. Hence East will be replaced by south west.

33 PST option 5 because all the other has first letter as vowel except option 5

34 all the options except Indore are capital of their respective state. Hence Indore

35 This is pair of opposites

Ally (friend) x foe (enemy)

Admit X Deny.

36 Look at the numbers at the interception of chess and ludo and ignore its interception with carom. You will get 4 as answer. Hence option 2.

37 There are 2 such digits 8 9 6, 4 9 2

38 E+F= E is brother of F. f is father of G. G is sister of H. option 3 F is brother of E

39 2 letters are subtracted from each letter.

Therefore INTEREST= GLRCPCQR

40 Answer: 129

Explanation: Here, for adjacent blocks

$9 \times 2 - 1 = 17$;

$17 \times 2 - 1 = 33$;

$33 \times 2 - 1 = 65$;

Similarly, $65 \times 2 - 1 = 129$. Also $9 + 17 + 33 + 65 + 129 = 253$. Hence, the answer is 129.

41

Many connectors with F. Start with that.

Box containing chocolate is immediately below box F

So F _____

_____ chocolate

There are two boxes placed between box G and the box which contains chocolates. Box G is not placed above the box which contains chocolate.

Hence

F _____

_____ chocolate

— —

— —

G _____

Also box G is above box burger and box L.

Hence there is at least one box below G.

There will be two cases.

Case 1 F is at top (7th)

Case 2 F is at 6th

Let's take case 1 F at top

There is one box L and P and as L is below it has to be at position 2. There P at 4th position.

7th F _____

6th _____ chocolate

5th _____

4th P _____

3rd G _____

2nd L _____

1st _____

Now there three boxes between M and burger.

Laddus are placed immediately below box M.

Also Samosa are placed immediately below box H. Hence both box M and H cannot be at bottom. Hence Box I is at bottom.

Now there are two position for box H 5th and 6th. If we keep box H at 5, samosa will be at box 4 with P. However P does not have samosa.

Hence Box H at 6th position and M at 5th.

3 boxes between M and burger so burger at position 1 in box I.

Biscuits cannot be at top. So only position 2 left.

Final solution will look like...

7th	F	Dryfruit
6th	H	chocolate
5th	M	Samosa
4th	P	laddu
3rd	G	momos
2nd	L	biscuit
1st	I	burger

Therefore **Box H** is placed immediately below of box dry fruit

42 **4 boxes** placed between H AND I. hence option 3.

43 **Box P** contains laddus.

44 **The box high contains biscuits** is placed immediately below box which contains momos.

45 **Box I** contains Burgers.

46 There are two such pairs. ST and EG

47 original T, R, E, A, T, M, E, N, T
Modified: S, Q, F, B, S, L, F, M, S
Alphabetical order: B, F, F, L, M, Q, S, S, S
Letters between F and Q are 10

48 original no. = 546839271
Modified no = 6, 3, 7, 7, 4, 8, 3, 6, 2
In descending order 8, 7, 7, 6, 6, 4, 3, 3, 2
Fourth digit from right 4

49 The relationship is "Particular" is synonym of "fussy" similarly meek is the synonym of subservient. Hence option 1

50 we use lift to go to the upper floor of building, however LIFT is coded as Basket. Therefore option 2 basket

51 It's a number series where logic is
 $1^{\text{st}} \text{ digit} + 6 = 4^{\text{th}} \text{ digit}$
 $2^{\text{nd}} \text{ digit} + 6 = 5^{\text{th}} \text{ digit}$
 $3^{\text{rd}} \text{ digit} - 6 = \text{the digit and so on}$
So it will be 16 **19 14** hence option 5

52 The word that does not belong with the others is "**bloom.**" All the other words—**ignore, shrug off, spurn, and disregard**—share a similar meaning related to rejection, indifference, or paying no attention to something. In contrast,

"**bloom**" refers to the process of flowering or thriving, which is entirely unrelated to the theme of rejection or indifference. It conveys growth and vitality rather than avoidance or dismissal. Hence, "**bloom**" is the word that does not fit with the others.

53 The correct answer is **motion**. A **vibration** is defined as a rapid back-and-forth movement, and at its core, it cannot exist without **motion**. Motion is the essential physical activity that creates vibrations, whether in air, solids, or liquids. While **electricity, sound, science, and electron** may be associated with vibrations in specific contexts (such as sound waves or electrical currents), they are not fundamentally required for vibration to occur.

54 The correct answer is **ounce**. The relationship between **yard** and **inch** is that of a larger unit being composed of smaller units—specifically, a yard consists of 36 inches. Similarly, a **quart** is a unit of volume that consists of **32 ounces**. Both pairs represent a measurement system where one unit is a multiple of the other.

55 The correct answer is Hibernate.

Rule : Command : Dictate – These words represent a progression of similar actions with increasing intensity or authority. "Command" is a stronger form of "rule," and "dictate" is even more forceful, showing a deepening level of control.

"Doze" is light or brief sleep, "sleep" is deeper, and the next word should represent an even more intense or extended form of sleep.

Among the options, **hibernate** fits best, as it refers to a prolonged and very deep sleep state, typically seen in animals. It represents the next level beyond normal sleep, just as "dictate" is beyond "command."

56 From statement 1 and 2 Blue is coded as ceno. Hence sky is coded as Tam. Hence option 3, 4 and 5 eliminated. From option 1 and 2 option 1 is not possible as ceno is for blue. Hence option 2.

57 The best example of **erratic behavior** is **option 4**. This scenario clearly illustrates a sudden and inconsistent change in behavior—Sagar was previously reliable, but is now acting unpredictably and without regularity. His actions

lack consistency and show a clear departure from his usual conduct, which is the essence of erratic behaviour.

58 Ram descends two steps in the same time Shyam ascends one, so together they reduce the gap between them by three steps per unit of time. Since the temple has 23 steps, the time it takes for them to meet is $23 \div 3 = 7.67$ seconds. In that time, Shyam, who climbs one step per second, will have reached the 7.67 th step. Therefore, Ram and Shyam will meet at exactly that point on the staircase. If we round to the nearest whole number, they meet at **step 8** from the bottom.

59 Both **Rajani** and **Puja** closely match the detailed description of Rosy given in the screenplay—an average-sized woman in her 40s with red hair and brown eyes. While Puja fits the profile very well with medium build, red hair, brown eyes, and being in her early forties, Rajani also fits closely with red hair, brown eyes, fair complexion, and being in her mid-forties. Though neither's description mentions a “brilliant smile,” they are the only two who closely resemble the key traits. Therefore, they are the most suitable choices for the director to consider..

60 **Arun has a red minivan** – Not necessarily. He has two red vehicles and one minivan, but it's not stated that the minivan is red.

Arun has 3 cars – Not mentioned at all. We only know he has 4 vehicles, one of which is a minivan.

Arun's favourite colour is red – Not supported by any fact.

So, **none** of the answer choices **must** be true based on the given facts.

61 During the chase:

Amol attempts a tackle but **misses and falls**.

Neeraj trips, so he's also out.

That leaves **Jeet** and **Nikhil**.

Since **Jeet** was ahead of **Nikhil** and **Neeraj is out**, **Jeet** is now the closest defender to the ball carrier and thus the most likely to make the tackle.

62 Hemanth is sitting in **seat 253**. Manoj is to his **right**, so Manoj is in **seat 254**. Gopal is to the **left** of Hemanth, meaning Gopal is in **seat 252**.

Iqbal is sitting to the **left of Gopal**, which means Iqbal is in **seat 251**. Therefore, based on their positions, the seat number Iqbal is sitting in is **251**.

63 There is lalit, jeevan and karan working. As there is manish working Jeevan has to work. Also there is no obstacle on omkar. Hence option 3

64 As Nishan is working, Karan will not appear. Hence all options except 4 can be eliminated

65 the solution is

CEO	President	vice presedent	secretary	treasurer
Red	Blue	Green	Yellow	Red
Chetan	Bipin	Erik	Ajay	Damodar

Vice presidents car is **green** colored

66 Chetan is the CEO

67 Ajay is the secratery

68 The ssolution is

mon	Tue	wed	thr	fri
ranjita	sanjana	Tina	ujwala	vajita
vaccum	dusting	sweeping	mooping	laundry

sanjana does dusting on tuesday

69 sweeping is done by tina

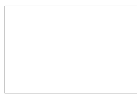

70 vaccuming is done on Monday

71 vajita does **Laundering**

72 Ujwalla does her task on thursday

73 letters are B L C A. No word can be formed using these four letters. Hence option 3

74 Assertion (A) This is **true**. Steel is widely used in construction due to its strength, durability, and ability to withstand heavy loads. Reason (R) This is also **true**. Steel has a **high elastic limit**, meaning it can withstand stress and return to its original shape without permanent deformation. This property is **crucial** in structural applications like buildings and bridges, where the material must absorb loads without breaking.

Hence, the **reason correctly explains** why steel is used in construction.

75 The correct answer is: **1) Forest fire damage is reduced in old growth forests**

The paragraph explains that in old-growth forests, the shade of mature trees prevents the growth of small trees, and the lower branches of mature trees are too high to catch fire. This reduces the risk of forest fires spreading. Therefore, fire damage is less severe in old-growth forests compared to areas with young trees, where fires can jump from treetop to treetop.

76 the logic the alignment of elements changes from vertical to horizontal from A to B, C to D and so on. Last element in vertical alignment gets replaced with a new one. Option 3 correctly represents the alignment. Hence option 3.

77 in every step 1 line and $\frac{1}{2}$ line gets added alternatively. Hence in next step $4 + \frac{1}{2}$ Line will be added. Hence 2nd option.

78 there are 27 triangles, option 1

79 there are 28 triangles option 3

80 All the elements move one step clockwise in each step. Hence option 3

81 there are 18 triangles in all

82 option 2 is correct. In option 1 P is not mirrored. In option 3 k is not mirrored. In option 4 P is inverted.

83 option 4 is correct. In option 1 N is wrongly placed. In option 2 L is wrongly inverted. In option 3 U is not inverted.

84 Options 1, 2, 3, and 4 can be obtained by rotating the figure but not option 5. Therefore, option 5.

85 5, 4, 3, 2, and 1 are aligned in clockwise direction in each option except option 2. Hence, option 2

86 when there is one square shaded and one square unshaded on same line, the resultant has shaded fig on both side of line.

when there is shaded part on both sides, it is turned into unshaded on both.

when there is unshaded on both the sides of line there is no figure in resultant.

Hence option D

87 All the elements are moving in clockwise direction. Hence option 5

88 first box and second box are merged to form third box. Hence option 4

89 (n-1) sided figure is placed in n sided figure with the outer figure shaded and inner is white. Option 5 satisfies the conditions.

90 A three sided figure is placed inside a four sided figure shade part being changed alternatively. Hence option 3.

91 Figure c is the odd one out. In all the options to black box are adjacent while to are not. However in option C none of black box is adjacent to each other.

92 Here the logic is the outer element is inverted and put inside. The inner element is rotated 5 degree clockwise direction. Hence option 4

93 option 1 is the only figure which can be formed.

94 figures 1, 3 and 5 when properly placed makes a square. Hence option 4

95 figures 3, 4 and 5 when placed properly makes an equilateral triangle. Hence option 4

96 when properly observed the three dots can be placed only in figure 1. Hence option 1.

97 similar alignments are found in figure 1, 2 and 5 ; 3, 7, and 8; and 4, 6, and 9. Hence option 1

98 option 4 can be properly fitted and the figure can be completed. Hence figure 4.

99 when observed carefully the figure X is embedded in the figure 1. Hence option 1.

100 one X is added in every figure and two dots are removed in every figure. There should be 4 X and 3 dots in upcoming figure. Hence option 3.

101 Let vP and vQ be the speeds of trains P and Q respectively.

Let tP and tQ be the times taken by trains P and Q to reach their destinations after meeting

$$\text{The formula is } \frac{vP}{vQ} = \sqrt{\frac{tQ}{tP}} ; \frac{100}{vQ} = \sqrt{\frac{16}{25}}$$

$$\frac{100}{vQ} = \frac{4}{5} \text{ The speed of train Q is 125 km/h.}$$

102 Let the ages **5 years ago** be: Anish = $3x$,

Ajay = $4x$, Anvit = $5x$

So their **present ages** are: Anish = $3x + 5$, Ajay =

$4x + 5$, Anvit = $5x + 5$

$$(3x+5)+(4x+5)+(5x+5)=75$$

$$3x+4x+5x+15=75$$

$$12x=60$$

$$x=5$$

$$\text{Ajay} = 4x + 5 = 4(5) + 5 = 20 + 5 = 25 \text{ years}$$

103 Let the one-way **distance** between Amit's house and the garden be **D km**.

$$\text{Time from house to garden} = \frac{D}{12}$$

$$\text{Time from garden to house} = \frac{D}{6}$$

$$\frac{D}{12} + \frac{D}{6} = 6 ; \quad \frac{3D}{12} = 6 ; \text{ Therefore } D = 24$$

104 Numbered cards greater than 6 are:

7, 8, 9, 10 (4 each of hearts and diamonds)

Therefore total 8 cards

$$\text{Probability} = \frac{8}{52} = \frac{2}{13}$$

105 bag contains 10 black balls 5 red balls and 5 white balls

$$\text{Probability of either red or white} = \frac{5+5}{20} = \frac{10}{20} = \frac{1}{2}$$

106 Treat the 4 vowels (**E E I A**) as **1 unit**

So now we are arranging: 1 vowel unit

6 consonants (S, P, C, L, L, Y) total 7 units

L appears twice

The 4 vowels E, E, I, A can be arranged among

$$\text{themselves in: } \frac{4!}{2!} = \frac{24}{2} = 12 \text{ ways}$$

$$\text{No of ways of arranging} = \frac{7!}{2!} \times 12 = \frac{5040}{2} \times$$

$$12 = 2520 \times 12 = 30240$$

107 Let's assume the **Face Value (FV) = ₹100**

Then, **Market Value (MV) = 35% of 100 = ₹35**

MV is 30% less than SP

$$MV = SP - 30\% \text{ of } SP = SP \times (1 - 0.30) = 0.70 \times SP$$

$$35 = 0.70 \times SP$$

$$SP = 50$$

$$\text{Loss} = FV - SP = 100 - 50 = 50$$

$$\text{Loss \%} = \frac{50}{100} \times 100 = 50\% \text{ therefore option 1}$$

108 It is Sunday on 12 February 1882. There is a gap of 4 years and 1884 is also a leap year. Hence $4 + 1 = 5$ odd days. Therefore Sunday + 4 = Thursday

109 Curved Surface Area (CSA) of a cylinder = $2\pi rh$

$$= 2 \times \frac{22}{7} \times 9 \times 12 \approx 678.86 \text{ sq cm.}$$

$$\text{Total CSA for 8 rollers: } 678.86 \times 8 \approx 5430.88 \text{ cm}^2$$

$$\text{Total cost of painting: } 5430.88 \times 15 \approx ₹81463.2$$

110 Area of courtyard = $30 \times 20 = 600 \text{ sq. m}$

Area of one brick = $1.5 \times 0.1 = 0.15 \text{ m}$ ($1.5 \text{ m} = 15 \text{ cm}$)

$$\text{Number of bricks} = \frac{600}{0.15} = 40000$$

$$111 \text{ SI} = \text{Final amount} - \text{Principal} = 3.25X - X = 2.25X$$

$$R = 3.25\%$$

$$P = X$$

$$T = Y$$

$$\text{So, } 2.25X = \frac{X \times 3.25 \times Y}{100}$$

$$2.25 = \frac{3.25 \times Y}{100} ; \quad 225 = 3.25Y$$

$$\text{Therefore } y = \frac{225}{3.25} = 69.23$$

112 first mixture has **43% acid**

Second mixture has **82% acid**

Mixed in the ratio **10:9**

Use weighted average formula

$$\text{Acid \% in final mixture} = \frac{(43 \times 10) + (82 \times 9)}{10 + 9} = \frac{430 + 738}{19}$$

$$\frac{1168}{19} = 61.47\%$$

113 Time taken to cross each other in opposite

$$\text{direction} = \frac{\text{Length of both trains}}{\text{sum of their speeds}} = \frac{1500}{(70+50) \times \frac{5}{18}}$$

$$= \frac{1500}{120 \times \frac{5}{18}} = \frac{1500 \times 18}{120 \times 5} = 45 \text{ second}$$

(note multiplied by 5/18 to convert Km/h to m/s)

114 The speed of the stream is 25 KMPH

$$\text{In m/s} = 25 \times \frac{5}{18} = 6.95 \text{ (app)}$$

boat downstream is 15 m/s

15 = speed of stream + speed of boat

15 = 6.95 + speed of boat

Speed of boat is 15 - 6.95 = 8.05

115 Step 1: Convert speeds to m/s

A: Already in m/s = 15 m/s

$$B : 67 \text{ kmph} = 67 \times \frac{5}{18} \text{ m/s} = 18.61 \text{ m/s}$$

$$C : 1020 \text{ m/min} = \frac{1020}{60} = 17 \text{ m/s}$$

8 hours 30 minutes = 8.5 hours =

8.5 × 3600 = 30600 seconds

A: 15 × 30600 = 459000 meters

B 18.61 × 30600 ≈ 569466 meters

C: 17 × 30600 = 520200 meters

Now, compare the distances:

B - A = 569466 - 459000 = **110466 m**

B - C = 569466 - 520200 = **49266 m**

C - A = 520200 - 459000 = **61200 m**

Maximum difference = 110,466 meters or **110.46 km**

116 5 men can do a job in 28 days

7 women can do a job in 28 days

Therefore 5 men = 7 women and efficiency of men : women = 7 : 5

Let mans efficiency 7x and omens be 5x

Total work = 7x × 28

$$\text{Time by 7 men and 5 women} = \frac{5 \times 7x \times 28}{(7 \times 7x) + (5 \times 5x)}$$

$$= \frac{5 \times 7x \times 28}{(49x) + (25x)} = \frac{5 \times 7x \times 28}{74} = 13.24 \text{ (app)}$$

117 Let he to pipes be A and B

the efficiency of pipe A is 8 times the efficiency of the pipe B

Efficiency of A : B = 8 : 1

Let efficiency of A be 8x and B be x

Total work = 9x × 10

$$\text{Time by B} = \frac{9x \times 10}{x} = 90 \text{ minutes}$$

118 Ajay: 3 months investment

Vijay: 9 months investment

Profit ratio (Ajay : Vijay) = 2 : 3

Let their investments be A and V.

$$A \times 3 : V \times 9 = 2 : 3$$

$$3A : 9V = 2 : 3$$

$$A : 3V = 2 : 3$$

$$A \times 3 = 2 \times 3V \Rightarrow 3A = 6V \Rightarrow A : V = 2 : 1$$

Ajay : Vijay = 2 : 1

119 Let the quantity of milk = 7x

Then quantity of **water** = 11x

So, **total initial mixture** = 7x + 11x = 18x

Now, 7 liters of **water** is added, so new water = 11x + 7

$$\text{The new ratio becomes: } \frac{7x}{11x+7} = \frac{7}{13}$$

$$7x \cdot 13 = 7 \cdot (11x + 7)$$

$$91x = 77x + 49$$

$$91x - 77x = 49 \Rightarrow 14x = 49 \Rightarrow x = \frac{49}{14} = 3.5$$

$$\text{Milk} = 7x = 7 \times 3.5 = 24.57$$

120 Let SP = ₹100

Discount = 40% of 100 = ₹40

$$CP = 100 - 40 = ₹60$$

$$\text{Profit} = 100 - 60 = ₹40$$

$$\text{Profit \%} = \frac{40}{60} \times 100 = 66.67\%$$

121 • Initial number of cars: 1450

• Production rate: 6 cars/hour

• Daily sales: 80 cars/day

• Operation hours: 8 hours/day

• Time period: 7 days

Cars produced per day:

$$6 \text{ cars/hour} \cdot 8 \text{ hours/day} = 48 \text{ cars}$$

Total cars produced in 7 days

$$48 \text{ cars/day} \cdot 7 \text{ days} = 336 \text{ cars}$$

Total cars sold in 7 days:

$$80 \text{ cars/day} \cdot 7 \text{ days} = 560 \text{ cars}$$

$$\text{Total cars: } 1450 \text{ cars} + 336 \text{ cars} - 560 \text{ cars} = 1226$$

The percentage of cars sold compared to the total number of cars after 7 days is 45.62%

122 4:20=1:5

Let: Age of P = x, Age of Q = 5x

$$x + 5x = 10.5 \Rightarrow 6x = 10.5 \Rightarrow x = \frac{10.5}{6} = 1.75$$

$$Q=5x=5 \times 1.75=8.75 \text{ years (option 2)}$$

123 **Average runs of 3 players** = 160

→ So, **total runs** = $160 \times 3 = 480$

Runs are in the ratio **4 : 6 : 2**

• Player A = $\frac{4}{12} \times 480 = 160$

• Player B = $\frac{6}{12} \times 480 = 240$

• Player C = $\frac{2}{12} \times 480 = 80$

Player C scores a **century (100 runs)**

Players A and B score the **same as before** (160 and 240 respectively)

So, total runs **after next match**:

Player A: $160 + 160 = 320$

Player B: $240 + 240 = 480$

Player C: $80 + 100 = 180$

New total runs = $320 + 480 + 180 = 980$

New average

Total matches = 2

Average per match: $\frac{980}{3 \times 2} = 163.33$

124 Prime numbers between 2 and 20 (**excluding 2**): 3, 5, 7, 11, 13, 17, 19

$3+5+7+11+13+17+19=75 \Rightarrow \frac{75}{3} = 25 \Rightarrow 5^2 = 5$

125 • **Village P**: Current population = 78,000
Decreasing by 1,800 per year

Village Q: Current population = 54,000

Increasing by 600 per year

Population of Village P after x years:

$78000 - 1800x$

Population of Village Q after x years:

$54000 + 600x$

Set them equal:

$78000 - 1800x = 54000 + 600x$

$24000 = 2400x \Rightarrow x = 10$ (option 3)

126 $26 + (42(23-20) + 2 - (2(5 \times 80 - 100))) + 16 - 4$

$26 + (42 \times 3 + 2 - 2 \times 300 + 16 - 4)$

$26 + (126 + 2 - 600 + 16 - 4)$

$26 + (-460) = -434$

127 $2a^3 - [3a^3 + 4a^2 - \{2a^3 - 7a^3\} + 5a^3 - 7a^2]$

$2a^3 - [3a^3 + 4a^2 - (-5a^3) + 5a^3 - 7a^2]$

$3a^3 + 5a^3 + 5a^3 = 13a^3$

$3a^3 + 5a^3 + 5a^3 = 13a^3$

$2a^3 - 13a^3 + 3a^2 = -11a^3 + 3a^2$

128 Let the **total capacity** of the drum be x liters.

initially, kerosene = $\frac{3}{4}x$

After removing 50 liters, remaining = $\frac{11}{16}x$

$\frac{3}{4}x - 50 = \frac{11}{16}x \Rightarrow 12x - 800 = 11x \Rightarrow x = 800$

129 Let: Sujit's money = S ; Suraj's money = R

If **Sujit gives ₹10** to Suraj, then **Suraj will have twice** the money **Sujit has left**.

So: $R + 10 = 2(S - 10)$

If **Suraj gives ₹10** to Sujit, then they both have **equal amounts**.

So: $S + 10 = R - 10$

$S + 10 = R - 10 \Rightarrow R = S + 20$

Substitute $R = S + 20$ into: $R + 10 = 2(S - 10)$

$(S + 20) + 10 = 2(S - 10) \Rightarrow S + 30 = 2S - 20$

$30 + 20 = 2S - S \Rightarrow 50 = S$ hence sujit has 50 rs

130 $0.0081^3 + 0.009^3 + 0.002187 \times 0.09$

$0.002187 \times 0.09 = 0.00019683$

$0.000000531441 + 0.000000729 = 0.000001260441$

$0.000001260441 + 0.00019683 = 0.000198090441$

131 Total value = ₹8.75 = **875 paise**

Total number of coins = **105**

Coins are either of **10 paise** or **5 paise**

Let the number of 10 paise coins = x

Then, number of 5 paise coins = $105 - x$

Value of 10 paise coins = $10x$

Value of 5 paise coins = $5(105 - x)$

$10x + 5(105 - x) = 875$

$10x + 525 - 5x = 875 \Rightarrow 5x + 525 = 875 \Rightarrow 5x = 875 - 525 = 350$

$x = 70 \Rightarrow 10 \text{ paise coins} = 70$

$5 \text{ paise coins} = 105 - 70 = 35$

132

$405 = 5 \times 81 = 5 \times 3^4$

$585 = 5 \times 117 = 5 \times 9 \times 13 = 5 \times 3^2 \times 13$

$765 = 5 \times 153 = 5 \times 9 \times 17 = 5 \times 3^2 \times 17$

$900 = 9 \times 100 = 3^2 \times 2^2 \times 5^2$

$\text{HCF} = 3^2 \times 5 = 9 \times 5 = 45$

133 Find HCF(558, 682, 589)

$558 = 2 \times 3^2 \times 31$

$682 = 2 \times 11 \times 31$

$589 = 19 \times 31$ therefore HCF = 31

total number of bottles = $\frac{558}{31} + \frac{682}{31} + \frac{589}{31} = 59$

134 for the meeting at starting point take the LCM (12, 24, 18) = 72 minutes

135 we want the **LCM** of the **time taken per revolution**, not revolutions per minute.

25 revolutions per minute $\rightarrow$ time per revolution
 $= \frac{1}{25}$ minute

21 revolutions per minute $\rightarrow$ time per revolution
 $= \frac{1}{21}$ minute

16 revolutions per minute $\rightarrow$ time per revolution
 $= \frac{1}{16}$ minute

LCM of $(\frac{1}{25}, \frac{1}{21}, \frac{1}{16}) = \frac{1}{\text{HCF}(25, 21, 16)} = 1 = 60 \text{ Sec}$

136 LCM of X and Y is X. i.e. Y is a factor of X.
LCM OF Y and Z is Y ie. Z is a factor of Y.
Hence HCF is Z

137 there are 25 numbers less than 100/

138 Sum of first n even natural numbers is
 $n(n+1)$
Sum of first 100 even natural numbers will be
 $100(100+1) = 100 \times 101 = 10100$

139 $3234 = 2 \times 3 \times 7 \times 11$
the number 3234 has **4 distinct prime factors**:
2, 3, 7, 11 $\Rightarrow k=4$
So, number of **coprime unordered pairs**:
 $2^{k-1} = 2^{4-1} = 2^3 = 8$

140 $3^2 + 9^2 + 15^2 + 21^2 + 27^2$
 $9 + 81 + 225 + 441 + 729 = 1485$

141 $4a^2 + 9b^2 + c^2 + 12ab - 6bc - 4ac$
 $(4a^2 + 12ab + 9b^2) + (c^2 - 4ac - 6bc)$
 $= (2a + 3b)^2 - 2c(2a + 3b) + c^2$
Now notice: $(2a + 3b - c)^2 = (2a + 3b)^2 - 2c(2a + 3b) + c^2$
So the **square root** is: $2a + 3b - c$

142 $x + y + z = 0 \Rightarrow z = -(x + y)$
 $y + z = y - (x + y) = -x$
 $x + z = x - (x + y) = -y$
 $x + y = x + y$
 $(x + y)(-x)(-y) = (x + y)(x)(y)$
 $(x + y)(x)(y) = xy(x + y)$
But since $x + y + z = 0 \Rightarrow x + y = -z$
 $xy(x + y) = xy(-z) = -xyz$

143 A number that is a **multiple of 5** and **divisible by 3** is a **multiple of LCM(5, 3) = 15**.
So we are looking for **multiples of 15** between **55 and 3815**.

Smallest multiple of 15 ≥ 55 $= [55 \div 15] \times 15 = 4 \times 15 = 60$

Largest multiple of 15 ≤ 3815 $= [3815 \div 15] \times 15 = 254 \times 15 = 3810$

This is an arithmetic sequence: First term $a=60$
Last term $l=3810$

Common difference $d=15$

$N = \frac{l-a}{d} + 1 = \frac{3810-60}{15} + 1 = 250 + 1 = 251$

144 do the question option by option
Numbers are in AP. Sum = 48. Therefore middle term of AP is 16 (average)
If least is 10 then series is 10 16 22
Sum of their square = $100 + 256 + 441 = 797$ X
If least is 12 series is 12 16 20
Sum of their squares $144 + 256 + 400 = 800$
Hence 12 (option 2)

145 product of 968427 and 3493
Match the units digit. Unit digit will be 1. Hence option 1

146 the number is in the form of $67k + 347$
Try to do option by option for value of K
 $456 = k$ satisfies. Hence option 2

147 Step 1: Factor $700 = 2^2 \cdot 5^2 \cdot 7 = 4 \cdot 25 \cdot 7$
Step 2: Check modulo each factor

Mod 4:

$354 \equiv 2, 346 \equiv 2 \Rightarrow 2^{176} - 2^{176} = 0 \pmod{4}$

Mod 25:

$354 \equiv 4, 346 \equiv 21 \Rightarrow 4^{16} \equiv 21, 21^{16} \equiv 21 \Rightarrow 21 - 21 = 0 \pmod{25}$

Mod 7:

$354 \equiv 4, 346 \equiv 3 \Rightarrow 4^2 = 16 \equiv 2, 3^2 = 9 \equiv 2 \Rightarrow 2 - 2 = 0 \pmod{7}$

Step 3: Apply Chinese Remainder Theorem

Since remainder is **0 mod 4, 25, and 7**, it is **0 mod 700** Therefore **0 remainder**

148 The prime factors of $19!19!19!$ are: 2, 3, 5, 7, 11, 13, 17, 19

We'll compute the **max exponent of 5** in $19!$

$[\frac{19}{5}] + [\frac{19}{25}] = 3 + 0 = 3$

5: 3 choices $\rightarrow (1, 2, 3)$

2: 1 choice $\rightarrow$ (0 only)
3: count powers of 3 in 19!

Similarly:

- 7: $[19/7] = 2 \rightarrow$ 3 choices (0 to 2)
- 11: $[19/11] = 1 \rightarrow$ 2 choices (0, 1)
- 13: $[19/13] = 1 \rightarrow$ 2 choices
- 17: $[19/17] = 1 \rightarrow$ 2 choices
- 19: $[19/19] = 1 \rightarrow$ 2 choices

Now multiply choices:

$$3 \text{ (for 5)} \times 9 \times 3 \times 2 \times 2 \times 2 \times 2 = 1296$$

149 Since $33 = 3 \times 11$, the number must be divisible by **both 3 and 11**

► *Divisibility by 3:*

Sum of digits must be divisible by 3.

Digits of **3313A**: $3 + 3 + 1 + 3 + A = 10 + A$

So, $10 + A$ must be divisible by 3.

Check each option:

$$A = 4 \rightarrow 10 + 4 = 14 \quad \times$$

$$A = 5 \rightarrow 10 + 5 = 15 \quad \checkmark$$

$$A = 2 \rightarrow 10 + 2 = 12 \quad \checkmark$$

$$A = 8 \rightarrow 10 + 8 = 18 \quad \checkmark$$

So possible values: **5, 2, 8**

► *Divisibility by 11:*

Alternating sum of digits must be divisible by 11:

$$\text{i.e., } 3 - 3 + 1 - 3 + A = (-2 + A)$$

$$\text{So, } -2 + A \equiv 0 \pmod{11} \Rightarrow A = 2$$

✓ Only **A = 2** satisfies both conditions (option 3)

150 clearly 3 divides each and every term
Hence option 1

151 The word "**contemporary**" is **misspelled**.
It should be "**contemporary**" (with an 'o' instead of 'a').

152 The word "**competing**" is **incorrect** in this context.

It should be a **noun**, not a verb form.

Replace "**competing**" with "**competition**".

153 The word "**presure**" is **misspelled**.
It should be "**pressure**" (with **double 's'**).

154 the sentence is grammatically correct.

155 **Traditionlly** is **misspelled** $\rightarrow$ should be "**Traditionally**"

156 The word "**beset**" in the passage means **to be troubled or affected by something**. The closest meaning is **A) Besiege** — to be surrounded or overwhelmed by difficulties or problems.

157 statement 1 : The passage mentions that a rate cut by the RBI is "**widely expected**", but it does not confirm that it will definitely happen.
So, **this statement is not fully true.**

statement 2 The passage says the **rural economy remains in distress** with only **2.9% growth in agriculture**, so this statement is **false**.

Statement 3 The passage mentions that **government spending was cut back** in the last quarter of 2018-19 to meet the fiscal deficit target, so this statement is **false**

Correct answer: **5) None of the above**

158 statement 1 **True** — The passage mentions a **consumption slowdown** reflected in **falling sales of automobiles, consumer durables, and FMCG products**.

Statement 2 **False** — The passage states that **growth in core sector output fell to 2.6%** (from 4.7%), but **not negative growth**, just **slower growth**.

Statement 3 **False** — While the passage mentions that **inflation is undershooting the target**, it presents this as **good news, not an indicator of slowdown**.

Correct Answer: **1) Only I**

159 statement 1 **True** — The passage clearly states that to boost consumption, the government needs to **put more money in the hands of people**, and **that means cutting taxes**.

Statement 2 **False** — The passage does **not** link inflation to putting more money in people's hands. In fact, **low inflation** is mentioned as a **positive** factor.

Statement 3 **False** — While important for economic growth, the passage does **not** link private investment **directly** to increasing individuals' disposable income.

Correct Answer: **1) Only I**

160 **Privatization of banks** — No, the passage mentions **recapitalization** and **consolidation** of ailing banks, but not privatization.

Rest all are mentioned.

Correct Answer: 2) Privatization of banks

161 statement 5 **Does NOT contribute** — Talks about **benefits to high achievers**, which is **not aligned with the main idea** focusing on the **drawbacks**.

162 statement 5 **Does NOT contribute** — Talks about **investor awareness**, which is **unrelated** to the main theme of consumer benefits or streaming popularity.

163 statement 3 **Does NOT contribute** — Says climate change is **beneficial**, which **contradicts** the overall negative tone

164 statement 3 **Does NOT contribute** — Claims **only positive effects**, which **ignores the negative impact** mentioned (like loneliness and anxiety), and contradicts the balanced/main idea.

165 statement 3 **Does NOT contribute** — **Contradicts** the main idea by saying early education has *little impact*.

166 statement 1 **True** — The passage clearly mentions that plastic waste mostly originates from land.

Statement 2 **False** — The passage mentions that global production of plastic has continued to rise, confirming an upward trend.

Statement 3 **true** — The passage talks about the plastic waste spectacle present on beaches everywhere.

Correct Answer: 5) Only 1 and 3

167 The passage highlights that **Air India has faced intense competition from other airlines** like InterGlobe Aviation Ltd and SpiceJet Ltd, which started offering **ultra-cheap, on-time flights** more than a decade ago, leading to Air India's failure in maintaining its market dominance.

So, the correct option is: 4) **Air India has got competition from other airlines and it has simply failed to live up to the same.**

168 In the passage, the word "**dominance**" refers to Air India's leading or superior position in the market. The opposite of **dominance** would refer to a state of being less powerful or in a weaker position. The correct opposite in meaning would be:

1) **Inferiority** suggests being in a weaker or lesser position, which contrasts with "dominance."

169 The antonym of "frigid" in the context of the passage is: 5) **Hot**

170 **I**: This is false because the passage states that the Dawson-Lambton Glacier colony **survived** and **swelled in numbers** after the Halley Bay colony's collapse.

II: This is true as per the passage. The birds **arrive at the site in April** to breed.

III: This is false. According to the passage, the Halley Bay colony **did not reach 5315 pairs in 2016**; the Dawson-Lambton Glacier colony reached that number in 2016.

Thus, the correct answer should be:

3) **Only I AND III**

171 **Only II**

I is incorrect because Tuan was not a doctor; he only assisted the village doctor in preparing medicines and tending to the sick, but he was not a doctor himself.

II is true, as Tuan is described as a good-natured and kind person who helped others in need.

III is incorrect because there is no mention of Tuan being wealthy or giving away his wealth to the needy. He worked hard on his farm and helped others, but he was not portrayed as giving away his wealth.

Thus, only statement II is correct.

172 **Only I** is correct.

I (He began to work hard on his crops) is the correct transformation that Juan made after Tuan's kindness.

II (He became more helpful towards people) is implied, but not explicitly mentioned in the passage.

III (He started a small charity in Tuan's name) is incorrect because there is no mention of Juan starting a charity.

173 5) **He rode to the nearest town to get a better doctor.**

Explanation: Tuan went to the nearest town, which was ten miles away, to fetch a more experienced doctor who could properly diagnose and treat Juan's son.

174 4) **Lighted**

Explanation: The word "doused" in the passage means to extinguish or put out a fire. The opposite of extinguishing or putting out a fire is "lighted," which means to set a fire or make something burn.

175 4) **The direction from which the fire had started**

Explanation: Tuan discovered which direction the fire had started from, which gave him a clue that Juan had set fire to his crops. There is no mention in the passage of a lighter, kerosene, or a neighbor seeing Juan set the fire.

176 5) **Of**

Explanation:

The phrase "What did you make of the lecture?" is a common expression meaning "What did you think about the lecture?"

177 4) **Asks**

Explanation:

The sentence is conditional, and when using the first conditional (present simple in the if-clause and will + base verb in the main clause), the correct structure is "if + subject + present simple." Hence, "if he asks" is correct.

178 The correct phrasing should be: "He loses his temper" because the sentence describes a general action, which requires the present tense "loses" rather than the past tense "loosened." So the correct answer is: **1) He loosened his temper.**

179 The error is in **part 1**: "So longer as." The correct expression should be "**So long as**" instead of "So longer as."

The corrected sentence should read:

"So long as you are honest and forthright, they will support you in this task."

180 The error is in **part 2**: "**Members were dismissed.**"

Explanation: The subject "**One of the party members**" is **singular**, because the main subject is "**One**" (not "members"). Therefore, the verb should also be **singular**, i.e., "**was dismissed**" not "**were dismissed.**"

181 The error is in **part 2**: "**Give him anything what he**"

Explanation: The word "**what**" is incorrect here. When referring to a noun like "**anything**," you should use "**that**" or omit it entirely, not "**what.**"

182 2) **All the problems of the future – X This is awkward or illogical.**

Gandhi lived in the past and couldn't be expected to solve *future* problems.

The sentence is logically flawed here. It's not a grammatical error per se, but it's **inappropriate in meaning or context.**

183 5) **Quintessence**

"**Quintessence**" means the most perfect or typical example of a quality or class.

184 The **correct sequence** to form a coherent paragraph is: **1, 5, 2, 4, 3** Here's the logical flow:
(1) Introduces the breakthrough in gene editing in human embryos.

(5) Provides specifics: scientists fixed a gene mutation causing hypertrophic cardiomyopathy.

(2) Explains the significance of the disease—affects healthy people, common in 1 in 500.

(4) Describes the genetic cause and inheritance pattern of the condition.

(3) Highlights the benefit: not only curing the individual but preventing inheritance.

185 Option 5 Correct sequence: **2, 4, 3, 1, 5**

(2) This introduces the subject: *business executives and their attitude.*

(4) This uses a metaphor to describe the risk they're in. Follows naturally from (2).

(3) Now contrasts the earlier group with *others* — a second type of executive.

(1) Another metaphor for the risky situation they're in. This follows well after (3).

(5) Conclusion or insight after describing both types of executives and their situations.

186 Option 1 2, 1, 3, 4, 5

(2) This seems to introduce the theme of wonder being both positive and harsh.

(1) This follows from (2) — a reflection on the cost of education, which is linked to the theme of wonder being "costly."

(3) This continues the thought, explaining how education has led to the loss of wonder.

(4) This provides a reason for why wonder is costly, as it contrasts with security.

(5) This brings in the idea that wonder, represented by the magician worldview, has evolved into science.

187 Option 5 2, 4, 1, 5, 3

(2) This sets the background for a drought or water crisis.

(4) A direct consequence of failed monsoon.

(1) Logical next consequence of failed monsoon and no sowing.

(5) Reflects the anxiety and hope for the future.

(3) The resolution — an unexpected abundance of monsoon saves the situation.

188 5) Has / gone

"Has gone" is present perfect tense, used for an action recently completed and relevant to the present. It fits best because the sentence is explaining why Rama is not at home **right now**.

189 The correct answer is: option 5

The old woman requested to the boy to help her till he returned.

190 The correct answer is: 5) **To play**

The verb "**force**" is followed by an object (her) and the **infinitive form** of the verb (to play), not a gerund (playing).

191 The correct answer is: 5) **Sums up to**

The idiom "**boils down to**" means "**can be summarized as**" or "**sums up to**." It refers to reducing something to its most basic or essential part.

192 The correct answer is:

2) **The bouquet of flowers was beautiful.**

"**Bouquet**" is a **singular** noun, even though it refers to a collection of flowers. Therefore, it should be followed by a **singular verb** — "**was**", not "**were**" or "**are**".

Also, "**beautifuller**" is incorrect English; the correct comparative is "**more beautiful**", but not needed here.

193 2) Work in great hurry

The idiom "**work against the clock**" means to **work very quickly because you have a limited amount of time to complete something**.

194 Logical Sequence:

B — Introduces the incident (two fishermen killed).

A — Background: they had gone fishing in a remote place.

F — They didn't return, so a search party was formed.

E — The party searched the regular areas.

C — But found nothing.

D — Finally, searched the creek and found the bodies.

Final order: B — A — F — E — C — D 5th statement: C

195 The central idea of the passage is: 1)

The passage discusses how fairness products, once widely endorsed and marketed, are now facing growing criticism, with more people becoming aware of how these products exploit insecurities and the growing awareness that fairness doesn't define beauty.

196 The correct answer is: 1)

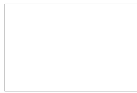

According to the 2015 research report by Nielsen, urban Indian men believed that fair skin could improve their professional prospects.

197 The correct answer is: 1)

The "Dark is Beautiful" campaign, launched by actress Nandita Das, aimed to encourage Indians to embrace a wider definition of beauty and to take pride in their natural skin tones.

198 The correct answer is: 1)

This statement is not true according to the passage. Initially, beauty products primarily targeted women, and it was only in recent years that men became a favored audience for fairness products after companies recognized an opportunity in this market.

199 The correct answer is: **3) Lambaste**

"Trounce" means to criticize or reprimand someone severely, or to defeat someone decisively. "Lambaste" also means to criticize harshly, making it the most similar word in meaning.

200 The correct answer is: **B.**

The passage mentions that the purpose of the Supreme Court's order was to make the states share their distress, not to magically fulfill the needs of farmers in both states.
